

# San Francisco Is Destroyed! To be Followed by New York, Chicago, Etc.

By Andrew Wallace

June 10, 2023

San Francisco used to be a unique and beautiful city...until it was taken over by Democrats and their Communist associates.

Now it is a destroyed city, paved with human waste, degradation, drug addicts, crime, illegal invaders, homeless tents, and clueless commissars (officials of the communist party) who know not what they have wrought or how to reverse it...even if they so desired.

Since destruction of America is the obvious objective of the Establishment Machine, the Parasitic Super-Rich Ruling Class (PSRRC), then the commissars are doing their jobs to perfection.

My description of San Francisco applies to New York, Chicago, Portland, and all large Democratic, Communist cities. San Francisco is just slightly further along in the process of destruction.

A large dose of law and order with zero tolerance for violations, along with moving the human debris to camps, could help to solve the problems they have wrought.

But those in charge would not allow it. The stupid snowflakes in these cities will wring their hands until they are in the

face of death at the hands of the monsters they created.

In simple terms, these cities are in a Death Spiral that can't be reversed for decades, if at all. Let's look at the facts.

Millions of people are deserting these cities, depleting their tax base, and reducing the production of goods and services. Federal funds paid to non-producers increases inflation.

Most importantly, their anti-police and pro-criminal actions have deprived citizens of protection, and forced retailers to leave the cities. These idiots want to use social workers rather than police to solve family disputes, which is one of the most dangerous assignments in police work.

These Democrat, Communist cities have deprived their people of a proper and useful education, and brainwashed them to be dependent and lawless Communists.

The problem with a dependent population is that the funding comes from federal government taxes on working Americans, which is unconstitutional and unlawful, and can be terminated by congress or the courts.

Families and religion are the keys to prosperity. But the Communists are solidly against both, which is why 70% of the mothers are single, and 50% of the babies are aborted.

The result is a high level of unemployment, with most young people hopelessly dependent on the government and crime.

Then we unlawfully add millions of illegal invaders who don't speak English, have no education or skills, and bring only diseases and crime.

Being almost totally dependent, they are bankrupting hospitals, school districts and cities. In New York, they are given hotel rooms which they trash, three meals a day, medical care, and are now replacing Americans on the organ transplant list. Reports are that many invaders are dangerous people and

citizens are fearful of them.. Do not forget that the invaders are also degrading all federal programs including welfare, Social Security, Medicaid and Medicare.

Tourism used to be an important source of income for the major cities, but no more. Hotels, gyms, and every available space is now being used to shelter and feed illegal invaders. Is this not treason?

Who wants to visit an ugly, dangerous hell-hole to be attacked by "entitled" criminals where, if you defend yourself, YOU go to jail?

Money is not the solution, but without money there is no solution. No one in their right mind would invest in the Democrat cities. The tax base is rapidly eroding. Vacant buildings are a liability. Public services can't be adequately funded. Police protection does not exist for large areas. Police professionals are moving to Red states for decent working conditions, safety, and more money. Cities are financed by taxes, fees and the federal government. But Federal Government expenditures in the cities and states are unconstitutional, and subject to termination at any time.

The loss of federal welfare would convert a large percentage of the city into a starving and homeless population.

Even if there were jobs, most of these people don't want to work...and never have.

When I was teaching, I had a project to teach the unemployed to sell appliances.

They all did a good job in class, and I got them employment. But they all failed because they wouldn't get up to go to work!

To be viable, a city must have honest and intelligent elected officials, an educated population that wants to work,

businesses that hire people, a tax base, and a safe place to live with proper services and police protection.

None of this will be possible in less than twenty or thirty years, and then only if the children are properly educated, and have religion and families. Today's young people in the cities are mostly beyond redemption.

We should finance the federal government with tariffs that would generate good middle-class jobs (as in the past) and eliminate need for income tax. If we retained the income tax, we should give it to the states to compensate them for performing the state functions unlawfully and unconstitutionally usurped by the federal government.

May God Bless You And Our Republic
