

Sanctuary Cities: A Growing Nightmare for American Citizens, Part 2

By Frosty Wooldridge

December 19, 2024

Part 2: Forcing Americans into a criminal hole. Forcing Americans to deal with consequences brought directly to them by illegal immigration and sanctuary cities.

At a city council meeting this past week in Chicago, Illinois, a Sanctuary City, Mayor Brandon Johnson forced another \$40 million borrowing debt on the people of Chicago to house, feed and care for 51,000 illegal aliens in their midst. Even while hundreds of African-American Chicagoans screamed at him to serve them instead of the illegals, he tossed them out of the meeting. Then, the council passed the \$40 million loan to care for the illegals.

At the same time, Illinois Governor Pritzker houses 400,000 illegals all over the state. They constitute a new criminal class of shoplifters, anchor babies, Section 8 Housing recipients, educational nightmares, medical super-nightmares, and total degradation of life in the Land of Lincoln. (Source: www.americanimmigrationcouncil.org) What's the cost for all this to Chicago residents? Answer: \$527.5 million as of this year to house, feed, and sustain those enormous numbers of illegal aliens. Worse, there's no plan or solution as to what to do with them.

This kind of insanity continues in democrat strongholds around the country. It's like democrat leaders put illegals first and Americans last.

What does it cost Americans? Remember this, "Corruption is a mechanism by which third world countries operate." Because it is, when a person arrives from a third world country, that person brings his or her culture and criminal proclivities with him.

Right now, illegal aliens constitute an enormous amount of gang shoplifting that costs Americans \$112 billion annually, and another \$85 billion in fraudulent returns. That's up from five years ago when the national shoplifting rate stood at \$52 billion. With Biden's open borders and another 15 million illegals in the country, it's almost tripled because that's how those third world people operate.

"In 2022, US retailers lost \$112.1 billion to retail theft, which was a 19% increase from 2021":

* Shrink: This is the term for inventory losses, which are mostly due to theft and organized retail crime (ORC). In 2022, the shrink rate was 1.6% of sales, which is the same as 2019 and 2020.

* Fraudulent sales returns: Retailers also lost \$84.9 billion in fraudulent sales returns in 2022.

Who pays for all that fraud? Answer: you do in higher prices because merchants need to make up their losses with higher prices.

Who else suffers? In Sanctuary City San Francisco, 17 Walgreen Drug stores bankrupted from shoplifting. Whole Foods bankrupted within one year of operation. Two hotels closed. Dozens of small businesses bankrupted because 50,000 illegals in San Francisco continue to rob, shoplift, steal and cheat wherever they can work their thievery.

If you walk down a city street in San Francisco, you would be dodging piles of human waste, stench of urine, needles everywhere, filthy tents, and drugged up and stoned bums on every block. How do I know? I walked down those streets to see it for myself.

Additionally, Sanctuary Cities won't prosecute criminals so I witnessed a 30 second "Smash and Grab" of a BMW car. They stopped their car, smashed the back windows and the driver-side window, and within 30 seconds, they stole a purse, camera and three suitcases and vanished into traffic.

To show you how bad it is in Sanctuary Cities, Los Angeles "tents" 175,000 homeless illegals and legal immigrants along with a bunch of drunk or stoned Americans. It's ugly to walk among them. They constitute a collection of America's loss of the rule of law. They constitute the growing third world conditions within our own country. They constitute a breakdown in the civility of humanity.

And, Biden keeps pouring them across our borders, and he's doing everything he can to thwart Trump's attempts to build a border wall, and to engage ICE.

What's happening in our major cities with all these illegal aliens now numbering over 30 million? Answer: a total breakdown in our civilization. At some point, if their numbers continue growing in America, we will not be able to maintain law and order. There will be a tipping point where there are no solutions. That tipping point has already been reached in LA, San Francisco, New York City, Detroit, Seattle, Atlanta and more cities that aid and abet illegal aliens.

The question that we should ask ourselves, "How many Laken Riley's that die at the hands of illegal foreigners does it take to finally convince Washington DC Congressional Critters that we Americans deserve to live in our country with law and order, secure borders, and safety within our communities?"

It's obvious that the people commanding Joe Biden could care less about America's sovereignty. They could care less how many of us are murdered or raped. They don't care about the massive costs to us as to shoplifting.

But the real killer with Sanctuary Cities stands out as Islamic Jihadists who work at creating another 9/11. How many of us will die at their hands? You must understand that religious zealots will stop at nothing to kill as many Americans as possible. Just think of that nut case Luigi Mangione who point blank executed Brian Thompson the CEO of United Healthcare. His blind hatred caused a complete loss of sanity to shoot Thompson in the back. Thompson is dead and his family suffers a lifetime of devastation. And, Mangione will rot in jail for the rest of his life.

Well, that's how Islamic Jihadists think. They want to kill as many Americans as possible in order die and enjoy 72 virgins in the afterlife. They are THAT crazy...and they live in our sanctuary cities with total immunity.

This column covers a tiny bit of what Americans face as their leaders deny reality. Biden is flat out incompetent, suffers from dementia, and cannot comprehend what he's doing, or his handlers are doing, to our country.

What is the answer to Sanctuary Cities? We must demand our Senators and House Reps to outlaw them, once and for all. Those leaders of those cities need to be thrown into jail to get the point across. They can start with my Denver Mayor Johnston. He's willing to go to jail to protect our 45,000 illegals in the State of Colorado. I'd love to see him sit in a jail for a few years. Whatever it takes, we need to bring law and order to the forefront and deport all illegal aliens. We don't need them. We don't want them. We cannot tolerate them. They are ruining our country on multiple levels. Let's be done with the utter stupidity of Sanctuary Cities.
