

Seismic Political Shift 2024

By Lex Greene

November 14, 2024

The global Marxist democrats in the USA are reeling from the seismic political shift underway in the 2024 elections, lashing out in all directions looking for who to blame for their massive loss, taking crazy to a new level, as they wrestle with a clear and compelling message from American electors that they just refuse to comprehend.

The “MAGA” movement is much bigger and stronger than they had imagined, as they were Pavlov-trained by their elitist leaders to believe it was all about one man, Donald J. Trump, and that all of his supporters were mere mindless members of his alleged “cult.” That was a fatally flawed belief...promoted by the “legacy media.”

The legacy of the “legacy media” is they no longer control the hearts and minds of the American electorate. It was bound to happen sooner or later, thanks to social media, making it possible for people to get to the truth with a little honest research, and walk away from the mass-propaganda machine known as the “legacy media.”

A full week after election day, a few democrat-controlled states like California and Arizona are still having trouble counting their votes and reporting their final numbers. But we can already see exactly what happened in the 2024 elections, and the people should have seen it coming for years.

The Trend Started Years Ago

In 2016, the political outsider Trump upset “sure thing” Hillary Clinton to become President with only 62,984,828 popular votes, but 304 Electoral College votes to take the White House. The Left was enraged, calling for the termination of the Electoral College, without which Hillary Clinton could have become the 45th President of the United States by an alleged popular vote of 65,853,514, with a total combined national popular vote of 128,838,342.

So, the democrats went to work on how to seize back the White House in 2020 by any means necessary. By 2018, as democrats worked around the clock to destroy Trump and his administration via numerous fake investigations, false accusations, two failed impeachments and a global “plandemic” used to undermine election integrity across the country by a multitude of measures, not the least of which included the CV19 lockdowns, they were on their way.

But despite all of their maniacal efforts, Trump would still receive 11,239,147 more votes in 2020 than he received in 2016, with a grand total of 74,223,975 popular votes, a record 17.8% increase in voter support for a second term. Never before in history has an incumbent President gained that much popularity in a bid for reelection, much less lost the race. Such a dramatic increase in votes for a second term would normally be an impossible task for any challenger, but not in 2020.

2016 Total Popular Vote – 128,838,342

2020 Total Popular Vote – 155,507,476 (a 26,669,134-vote increase, 20.7% up)

2024 Total Popular Vote – 147,893,931 (a 7,613,545-vote decrease, 4.9% down)

Still, Joe Biden was declared the winner of the 2020 election with a reported 81,283,501 popular votes, allegedly defeating

Trump who received 74,223,975 popular votes.

The election results from 2008 and 2012 provide a stark contrast to what allegedly happened in 2020.

In 2008, Barrack Hussein Obama allegedly won the Presidency with 69,498,516 popular votes, out of 129,446,839 total votes. But in 2012, Obama allegedly won reelection with only 65,915,795 votes (a loss of 3,582,721 votes or a 5.1% decrease) for his second term bid. Yet, Obama was still declared the winner even though he lost over 3.5-million votes from his first campaign.

So, how did Trump allegedly lose the 2020 election, with 11,239,147 more votes in 2020 than in 2016? The answer to this question is the same as how Kamala Harris just lost the 2024 election to Trump. It all revolves around the abnormally high overvotes counted for Biden in 2020, which are now missing for Harris in the 2024 election.

Indeed, Trump increased his votes again in 2024, from 74,223,975 in 2020 to 75,520,058 in 2024, continuing his increase in voter popularity that started in 2020 when his popularity jumped by 17.8% over 2016. But this isn't what caused the outcome of the 2024 election.

The Missing Votes

The HUGE shift in the electorate trend actually started for Trump in 2020 when he increased voter support by 17.8% over 2016. His new 2024 increase in voter support is only a 1.7% increase over 2020.

The BIG shift in 2024 isn't in the increased votes for Trump, it's the obvious decrease in votes for Harris, as compared to the votes declared for Biden in 2020. The obvious question is, where did the overvote come from for Biden in 2020, and where did they go in 2024?

As of this writing with 99% of the 2024 votes in and counted, approximately 7.6-million democrat votes from 2020 are missing. This does not include the 1.3-million new votes for Trump. There are over 7.6-million votes missing for Harris that Biden allegedly received in 2020.

Like many who have spent four years looking into the many anomalies in the 2020 election, I expected to find some if not most of these missing votes in the swing states. But Trump took all seven swing states in 2024, and six of the seven had more votes in 2024 than they had in 2020. So, where did we find the missing votes?

<u>STATE</u> <u>2024</u>	<u>2020</u> <u>DIFFERENCE</u>	
Arizona 3,240,711	3,333,829 -93,118	
California -3,865,837	17,117,157	13,251,320
Colorado -103,750	3,168,959	3,065,209
Illinois 5,363,951	5,918,806 -544,855	
New York -690,527	8,496,883	7,806,356
New Jersey -427,248	4,491,713	4,064,465
Washington -372,247	3,954,263	3,582,016
Oregon 2,038,218	2,298,831 -260,613	

Massachusetts	3,549,404	3,307,532
	-241,872	
Maryland	2,961,437	2,678,077
	-283,360	
D.C.		335,909
	307,446	-28,463
Virginia		4,375,998
	4,247,595	-128,403
Connecticut		1,795,971
	1,726,492	-69,479
Hawaii		562,994
	505,553	-57,441
New Mexico		903,508
	889,206	-14,302
Rhode Island		507,408
	495,131	-12,277

For the most part, these are the states where the 2020 Biden votes are missing in the 2024 election, and they are all missing between Biden and Harris...democrat votes. The vast majority of missing votes in 2024 were easily found in the above list of states.

These states have a few other things in common...

1. With the exception of Arizona, these are states Harris did win in 2024
2. All of these states are democrat party controlled, including Arizona
3. All of these states are "sanctuary" states with sanctuary cities and millions of "illegals"
4. None of these states require absolute voter ID to vote

Why Did These Votes Vanish?

It's likely there are a number of reasons, starting with people leaving these states for greener pastures in the better run RED states in recent years. But that won't account for all of this, or even close.

It could be that the Democrat Party and Harris campaign was just that unpopular in the ranks of their own party loyalists. But the fact that Harris received more votes than Obama ever received, indicates that she wasn't as unpopular in her own camp as she should have been.

It could be they alienated too many Americans with hateful attacks on everyone who wouldn't vote for them, including the minority groups they built their party upon.

But none of this explains the 7.6-million votes missing for Harris, that allegedly went to Biden in 2020. There's only one reasonable explanation for that! This crude graphic does explain it though...what did happen in 2020, simply didn't happen in 2024. The only question is why didn't it happen again in 2024?

Entering the 2024 elections, forcing Biden out and Harris in, without a single American primary voter behind her, you would think that democrats would have seen Harris as, at best a long shot. But no, they were entirely confident in their unelected candidate and her goofy running mate.

It wasn't the under-qualified candidates they had any confidence in though, it was the "steal" they had in place that gave them that confidence. They had quadrupled down on the election theft of 2020 for 2024, and they had zero doubts they would be able to carry it off again.

So, what happened to make all of those fake Biden votes from 2020 vanish into thin air?

Yes, Trump gained 2024 support over 2020 and 2016 in all voter demographics. His rise in voter popularity has been a continuous upward trajectory since his first election in 2016. In 2024, Trump received a whopping 12,535,230 more votes than his victory in 2016. An increase of 19% since his first win.

Meanwhile, Harris-Walz received 7,613,545 fewer votes from democrats in 2024, than Biden allegedly received in 2020, not counting the 1,296,083 democrat votes from 2020 that switched to Trump in 2024, bringing the total vote deficit for Harris-Walz 2024 to 8,909,628 votes down.

There's only one reasonable conclusion from these hard number facts... Biden did not receive these same 7,613,545 votes in 2020, that vanished for Harris-Walz in 2024. These were "fraudulent votes," cast and counted in a number of democrat-controlled "sanctuary states" in 2020, that were not cast or counted for Harris-Walz in 2024, as shown in the list above.

THE STEAL WAS STOPPED IN 2024!

If we deduct 7,613,545 fraudulent votes from sanctuary states for Biden in 2020, Biden had exactly the same number of votes Harris just received in 2024: 72,373,873 real votes. This means that Trump did actually win 2020 by a popular vote margin of 74,223,975 to 72,373,873, a Trump margin of victory of 1,850,102 votes, Trump 50.6% to Biden 49.4%... 2020 was stolen, not counting additional margins for Trump made possible via electronic machine vote manipulations, fake ballot harvesting, and mail-in ballots.

In 2024, Trump defeated Harris by a 51.1% to 48.9% margin. The biggest difference is the missing Biden votes from 2020.

Why didn't the democrats carry out their embedded steal for 2024?

We know the answer to this question, and it will be presented in a detailed report in the coming days. Now we know how to

stop the steal for all future elections.

Trump was right and so were his millions of voters. They were right about all of it. But by all means, please verify all of the numbers and facts presented here for yourself. Other than the 1% yet to be reported, these official numbers are dead-on accurate as of the reported counts the morning of November 13, 2024.

Politicians lie... but the forensic numbers don't!
