

Stops Foreign Spending, Funding Illegals, and Obey the Constitution!

By Andrew Wallace

September 27, 2025

As an Economist and student of the Constitution, I can guarantee that the title is absolute fact. Not part of it, but all of it. We have the best Constitution in the world that is totally ignored by a mostly-corrupt Blood-Sucking Parasitic Congress operating as a mostly Criminal Enterprise.

We can get an instant start on prosperity by halting foreign expenditures of \$428.4 Billion and more. This money is a criminal waste, it kills millions, destroys entire countries and makes the world hate us for justifiable reasons. We spend \$ 150.7 Billion on welfare for Illegal Invaders which is Constitutional Treason. Add this to the previous \$428.4 Billion and you have \$579.1 Billion to immediately spend on returning the American Dream to the people, who could then afford babies, if they want them, and most other things. It's called prosperity.

Many will take strong exception to terminating Foreign Aid and Troops overseas, but they have no proper Justification for their opinion.

All foreign aid and overseas deployment of troops is without merit or justification that benefits the American people; it actually makes people hate us.. We have reciprocal treaties to

defend Europe and they to defend us. We are fools because Europe can't defend us, nor can anyone invade us because of the Atlantic and Pacific.

The only people who benefit from our foreign expenses are the Parasitic Super-Rich Ruling Class (PSRRC), Bureaucrats of the Administrative State and, of course, Congress who get bribes and kickbacks.

In simple terms, Members of Congress routinely violate their Solemn Oath of Office by voting the food out of the mouth of Americans. Specifically, Congress Funds Foreign Aid, Troops overseas, Wars for profit of the PSRRC, Welfare for illegal Invaders (Treason!), Welfare for Communists in Blue cities, all payments to states, and more. Not a penny of these expenditures is legal or justified. An honest federal law enforcement agency would put a stop to this criminality and Treason.

It is pretty much accepted by most serious writers that the PSRRC, Jewish Lobby and its Media controls our government, all of it. Trump could not have been elected without their support. He is paying for their support in spades. It is not anti-Semitic to abhor Israel's Genocide and our government's funding of it. Even if Israel was doing right, it would be wrong to support them or any other foreign government. It is the opinion of many that Israel is digging its own grave.

You can't blame Trump; his support of Israel was only way to be elected and he did prevent a Second Civil War by his election. He also knows that Israel has the best Assassins in the world.

President Trump may turn out to be our greatest president for what he has done for the country, regardless of his faults. So far he has prevented a Civil War and his programs for Tariffs, Energy, Manufacturing, etc., may buy us enough time to prevent a major Economic Collapse.

Ultimately he must free himself of control by the PSRRC, Jewish Lobby and Media, which has never been done before by other presidents. If he survives, he can once again follow the Constitution, which is the only way to achieve sustained prosperity.

Few people realize that the underlying cause of our Economic problem is that the role of the states and the federal government were reversed when Income Taxes were legalized. The States are Sovereign governments with all of the required powers. The Federal Establishment has only a few powers that states have given them in the Constitution. The Income Tax deprived states of income, and Washington usurped powers of the states, which is why much of Federal Government is Unconstitutional and Criminal.

Everything I said is for naught if Illegal Invaders are not deported prior to the 2030 Census, regardless of cost. Otherwise we are destroyed like Europe.

May God Bless You and our Republic
