

The 1913 Coup Was the Beginning of the End of Freedoms and Constitutional Republic

By Andrew Wallace

July 12, 2025

The Parasitic Super-Rich Ruling Class (PSRRC) has been actively stealing from the people and attempting to control our government since its founding. But their Coup in 1913 was the nefarious beginning of the end of our freedoms and our Constitutional Republic.

The PSRRC started digging our grave with four consecutive tools in the Coup of 1913. These started with the ratification's of the 16th and 17th Amendments, authorizing income taxes and direct voting for Senators. The newly-formed IRS then authorized Tax-Free Foundations. The Congress passed another unconstitutional law in 1913 authorizing the privately owned Federal Reserve Bank as the last nail in the coffin.

Now let's look at the four pillars of our destruction in more detail: 1. Income Taxes, 2. Direct Voting for Senators, 3. Tax-Free Foundations and 4. the privately-owned Federal Reserve Bank.

The Federal Reserve Bank and its branches are unconstitutional and privately-owned. This Bank is the single greatest threat to our freedoms and prosperity. It is generally accepted that

those who control the money supply (and you surely know who they are!), control the country, regardless of election results.

The Federal Reserve Bank's Power to print fiat currency allows them to finance wars for profit and other government boondoggles for the benefit of the PSRRC at the expense of the public.

The bank prints unconstitutional fiat money out of thin air to buy government bonds to finance government deficits, which exceed 37 trillion dollars. To the extent that this fiat money exceeds production of goods and services, it is also inflationary.

Our Constitution requires the use of gold and silver for currency. The Federal Reserve unlawfully prints fiat dollars because they can't create gold and silver to finance wars for profit or fund Communist cities. The Federal Reserve has the power to expand and contract fiat currency, causing inflation and depression, which in turn causes redistribution of wealth to the PSRRC. They could not do this with gold and silver lawful money.

The Second Pillar for the demise of our Republic was the 17th Amendment that allowed Senators to be elected rather than appointed by state legislatures. The result was that states and the people lost their voice in the Senate and gave it to big money, the PSRRC.

The Third Pillar was Tax-Free Foundations enabled by the new IRS. This allowed the wealthy to retain the power of their money, with strings, thru eternity. This gave them additional power to control corporations with control of additional stock.

These four Pillars were the foundation for the gradual cumulative destruction of our Constitutional Republic over the last 112 years.

We must remember that the Media is mostly owned or controlled by the PSRRC. The media, along with the educational system, brainwashed much of the population and were especially effective among the ill-educated in the Communist inner cities.

The end result is an all-powerful corrupt Federal Establishment, half of which is a Criminal Enterprise because of its usurped powers rightfully belonging to the states. The federal income tax was the key, because it gave the Federal Establishment all the money needed to fund usurped state functions, concentrating all power in Washington DC.

The Federal Income Tax reversed the Constitutional relationship between the States and the Federal Establishment. Constitutionally, each state is in fact a Sovereign Government. The Federal Establishment is not a Sovereign Government and has very limited powers under its creation document crafted by the several states, the US Constitution. The Income Tax unlawfully gave the federal establishment the money to usurp and control state functions.

Democrat politicians, leaders and funders are simply promoting a Communist agenda. Their power is centered in the Communist cities where unconstitutional federal funding of able-bodied Communists and illegal invaders is the rule. If this continues with tax money extorted from working people, there will be Civil War, It is inevitable.

I don't see how any Democrat can be reelected if people are informed, when every last Democrat voted against massive tax cuts for the average person. I am well-aware that this latest bill does not reduce the deficit, but we must pray that Trump's great vision comes to fruition...otherwise we are doomed.

I have written on the specifics of the unlawful existence and actions of federal agencies and departments in the past, and

will do so again. But, I leave you with this thought:

Any unlawful functions or actions not under the Constitution are null and void, and President Trump can (and should!) cancel them with the stroke of his pen. That is, of course, if the PSRRC and their minions in government don't kill him as it is alleged that they did to the Kennedy Brothers and so many others who oppose their criminality against the people.
