

The Demonic Carnage of Vaccines, Part Three

By Kelleigh Nelson

The evil of using aborted fetal cell lines involves not just the original murder, but the ongoing commercialization of the child's body, as well as the ultimate refusal to bury his desecrated remains. We cannot sit back as the use of aborted human babies in medical research is gradually normalized as an "unfortunate" part of modern-day medicine. – [Statement in a letter](#) by eighty-six Catholic women from 25 countries opposing what they called "abortion-tainted" COVID-19 vaccines

Destruction of the embryo in the Mother's womb is a violation of the right to live which God has bestowed upon this nascent life and that is nothing but murder. Dietrich Bonhoeffer (On April 9, 1945, Lutheran pastor and theologian. Dietrich Bonhoeffer was hanged at [Flossenburg Concentration Camp](#), only days before the American liberation of the POW camp. The last words of the brilliant and courageous 39-year-old opponent of Nazism were "This is the end—for me, the beginning of life.")

Always, vaccinations were given with greatest enthusiasm to children and the elderly – the most immunologically vulnerable and the easiest to damage with vaccines. – Dr. Vernon Coleman

Many commonly used vaccines, especially those for children, have their origin in cell lines that were originally developed from an aborted baby. If we stand against abortion and the murder of the unborn, the use of baby's bodies for science creates a serious moral dilemma for believers. May a believer in our Creator use vaccines derived from aborted materials or

should we refuse them? And should parents refuse to allow these types of vaccinations for their children? Before submitting ourselves or our children to government vaccines, we need to be aware of what they contain and answer these personal questions.

Vaccines for common childhood ailments are available today, but what is in them may be more damaging than suffering from the ailment. As a child, I had the measles and chicken pox within the same two weeks. I remember the itching, the Calamine lotion and baking soda baths. My poor mother was distraught trying to keep me from scratching and creating scars. Back then we had parties so that these childhood diseases would spread through all the school children and finally be over. Now we have vaccines.

Vaccine Contents

It is astonishing to me how many vaccines contain cells from aborted babies. Normal vaccines are grown from a weakened strain of a known virus in a culture. When this is injected into our bodies, it creates antibodies to that disease allowing the body to fight off the infection.

These are not the deadly Pfizer, ModeRNA, and AstraZeneca vaccines promoted by Dr. Fauci, Bill Gates and our government that install a kind of “operating system” into the human body, hijacking the body’s cells to produce alien proteins via an mRNA “software code” that isn’t even human.

No, these cell lines are taken from electively aborted fetuses and used to manufacture vaccines including MMR III (measles, mumps, rubella), chickenpox, shingles, Hepatitis A, hepatitis A & B, polio vax, and rabies.

Aborted baby cells were originally used because [viruses tend to grow better in cells from humans](#) than from animals. Fetal cells do not divide as many times as other cell types, so they can be used longer.

In addition, because of the ability to maintain these cells at very low temperatures, such as in liquid nitrogen, scientists are able to continue using the same fetal cell lines that were originally isolated in the 1960s.

Therefore, when inoculating children with these vaccines, we are also injecting them with residual aborted fetal DNA and cellular debris, although some deny there is DNA involved. These contaminants put children at risk for autoimmune disease, gene insertion and mutations. Today's children are routinely vaccinated by pediatricians performing what they believe to be "preventative" medicine. By age six, most children have been exposed to more than 100 viral strains. [Commercial markets](#) are created by [abortion and are profiting from the fetal distribution chain](#).

In 2019, President Trump tried to [end the use of aborted baby's bodies](#) for scientific research at the National Institutes of Health who spent about \$100 million in 2018 on fetal tissue research. Use of aborted baby's tissues in vaccines, pharmaceutical and medical research [obscures the value of all human life](#).

The human cell lines used to grow these kinds of vaccination strains are [derived from the lung tissue of aborted babies](#).

MRC-5 and WI-38 are two of these cell lines used in normal vaccines. The German measles vaccine

(Meruvax) is sold by Merck and Co., Inc., and uses the WI-38 cell line. The chicken pox vaccine is called Varivax and uses both MRC-5 and WI-38 cell lines. This is what we're putting in our children's bodies. Havrix, which guards against scarlet fever, rheumatic fever, hepatitis A infections and kidney inflammation, is a vaccine offered by Smith Kline

Beecham and it too uses MRC-5.

Janssen/Johnson and Johnson, one of the largest companies in America catering to baby needs, is also ironically one of the leading corporate sponsors of abortion. Their Covid-19 vaccine contains aborted baby cells. [Fetal retinal cells](#) are used in the making of the Covid-19 Johnson and Johnson vaccine.

The Roman Catholic Archdiocese of New Orleans [urged its parishioners](#) to avoid the Johnson & Johnson vaccine, calling it “morally compromised” because it was developed and tested using cells derived from aborted baby tissue. Nevertheless, the Vatican, [said in December](#) that it was “morally acceptable” for Roman Catholics to receive any COVID-19 vaccine, even one based on research that originally used cells derived from aborted fetuses. Where is the rest of the clergy?

I believe we're facing a carnage, not only the murder of nearly 65 million unborn babies since 1973, but also the travesty and evil of [selling their little bodies for scientific and medical use](#) and the atrocity of using their cells in vaccines, food, drinks and cosmetics. ([The Culture of Death](#) – 2012)

Operation Warp Speed

The deaths and adverse reactions from the untested mRNA vaccines, which were rushed to the public via “[Operation Warp Speed](#),” are killing many recipients today. Animal testing was bypassed for the Covid-19 vaccines, but in previous mRNA testing, all the animals died, not from the vaccine, but because the vaccine created hyper immune system changes in the animals' bodies. When another virus exploded on the scene, they died of sepsis and cardiac failure. This is likely a binary poison...part one is the vaccine and part two is a new virus that overwhelms the system.

AstraZeneca has now been banned from 20 countries because of

blood clots...Austria, Estonia, Latvia, Luxembourg, Lithuania, Romania, Denmark, Norway, Iceland, the Netherlands, Ireland, Germany, France, Italy, Spain, Slovenia, Cyprus, and Sweden. Bulgaria and Thailand have also stopped the jab. While the AstraZeneca vaccine hasn't been authorized for use in America just yet, White House Chief Medical Officer Dr. Anthony Fauci told lawmakers that there will likely be enough safety and efficacy data to grant the vaccine authorization in April.

Governments and pharma companies have rushed this new experimental RNA technology into use for the first time in history. Prior to the Covid injection, all attempts to force approval of RNA tech had failed; dangerous and deadly over-reaction of the immune system was the reason.

Fauci and his communist collaborator, [Dr. Zhong](#), are now pushing a new lie. They are saying your children shouldn't play together until they're fully vaccinated. I thought the science proved that Covid wasn't a danger to children? What changed?

Zhong, who is often called "China's Fauci," is a pulmonary specialist and a long-time Communist Party member. He's Fauci's communist pal. He and Fauci just appeared together on a Covid panel and both expressed hopes that **Covid restrictions and mass vaccinations worldwide** would continue well into the future, "It will take about two-or three-years' time with global collaboration." Their plan is to make Covid panic and enslavement the new normal, for a virus that 99.75 percent of the people recover from.

Oh yes, go get your vaccine and once you've had both injections, Krispy Kreme will give you a free donut every day when you show your vaccine papers.

Dr. Stanley Plotkin's Rubella Vaccine

My paternal grandmother and actress [Gene Tierney](#) were great friends; they met when both of their husbands were stationed

at Ft. Riley, Kansas in 1943. Gene's first child with legendary designer Oleg Cassini was a daughter named Daria who was born with birth defects. Tierney contracted rubella during a World War II USO appearance at the Hollywood Canteen because a female marine with the illness had sneaked out of quarantine to meet her favorite star.

Years later, the woman saw Gene again and told her she had broken quarantine and asked if she had contracted German measles from her. Gene turned and walked away. The disabilities of Gene's first child Daria, had a devastating lifelong effect on Tierney even though her second daughter with husband, Oleg Cassini, was fine.

Had it been 1965 and Gene had received the rubella vaccine, her baby would have been born without disabilities. Rubella was devastating, and the vaccine has saved many unborn babies from defects, but there's a dark side to the injection.

Dr. Stanley Plotkin, pediatrician and vaccinologist, developed vaccines in the United States during the mid to late twentieth century. He began his research career at the [Wistar Institute](#) in Philadelphia, Pennsylvania, where he studied the rubella virus. (Wistar focused solely on biomedical research.) This [20-minute film](#) on Plotkin and Wistar shows their pioneering use of aborted baby's cells to make the rubella vaccine.

In pregnant women, the rubella virus caused congenital rubella syndrome in the [baby](#), which led to various malformations and [birth defects](#). Using WI-38 cells, a line of cells that originated from tissues of aborted fetuses, Plotkin successfully created RA27/3, a weakened strain of the rubella virus, which he then used to develop a rubella vaccine. Plotkin's rubella vaccine has prevented [birth defects](#) due to congenital rubella in developing babies and newborns. Rubella is the "R" in today's Measles, Mumps and Rubella vaccine (MMR).

Under oath for a [deposition in January of 2018](#), Dr. Stanley Plotkin admitted to using 76 normally developing aborted babies to develop human cell lines to make vaccines. They harvested pituitary glands, hearts, lungs, kidneys, skin, and spleens to develop vaccines. I hate that word harvested...it's not like picking corn or threshing wheat. Dear Lord what euphemisms are given for pure ungodly evil. Plotkin ends by stating he is an atheist and does not believe in religious exemptions from vaccines. The seven-minute video eliminates the opening legalities. In another [longer video](#), Plotkin states the aborted babies were three months or older, but that researchers had nothing to do with the abortions.

Dr. Plotkin stated, "From my personal point of view, having seen the suffering of families with Congenital Rubella Syndrome infants, I consider that what was done is 100% moral." His research contributed to the development of multiple vaccines, including those for rubella, rabies, rotavirus, polio, and varicella. He also worked on [cytomegalovirus](#) (chicken pox and mono) and HIV vaccine development. Both of which have proven elusive and remain unsolved.

A rubella vaccine was first licensed in 1969. It is on the World Health Organization's [List of Essential Medicines](#). As of 2009, more than 130 countries included it in their routine vaccinations.

Stanley Plotkin's conflicts of interest were discussed when he was questioned by US lawyer Aaron Siri during the same deposition. Details of the extent of his industry conflicts of interest were elicited from him by Mr. Siri, e.g., Plotkin's consultancy work for Sanofi, Merck, Glaxo and Pfizer, and his association with Dynavax Technologies, MyMetics, Inovio, CureVac AG, SynVaccine, GeoVax Labs, GlycoVaxyn AG, Adjuvance Technologies, BioNet-Asia, Abcombi Biosciences, and Hookipa Biotech.

Your Papers Please!

Starting April 2nd, 2021, New York Governor Andrew Cuomo will [require New Yorkers to show “vaccine passports,”](#) proof that they have received the COVID-19 vaccine in order to re-enter society.

The illegitimate Biden administration is set to launch a [Covid-19 passport](#) that Americans must have to engage in commerce and would track Americans who took the vaccine.

Statistics prove that 99.75 percent of Americans recover from this virus; yet the goal is for all Americans to take the untested jab.

How can a “vaccine passport” be legal when our medical records are private and there are [HIPAA laws](#)? And forced vaccines? What about the [Nuremberg Code](#)? It addresses experimentation and that is exactly what these vaccines are!

Conclusion

Most states have mandatory vaccinations especially prior to children entering school. As early as 1905, the [US Supreme Court ruled that parents do not have a constitutional right not to vaccinate their children](#), regardless of the reason, since these laws are justified in order to protect the general public health.

One out of five American children now have “special needs.” These include learning disabilities, attention-deficit disorders and behavioral issues, all of which create a whole new market for certain kinds of prescription drugs.

Polio was on its way out in the late 50s yet children and adults in the early 1960s were given the polio vaccine. The vaccine was grown on Simian monkey kidneys which caused SV40 contamination and soft tissue cancers not only in the recipients but also in their descendants. It is genetically

passed.

The government has used Americans as guinea pigs for decades. Bill Gates and his buddy, Dr. Anthony Fauci are [UN Agenda 21](#) proponents of depopulation wherein the earth accommodates only 500 million people. They have strong monetary ties to the untested mRNA vaccines as well as the vaccines that are grown via aborted baby cells. [Gates says we can eliminate population through vaccines.](#)

America vaccinates more than any other country. The reality is that vaccinations have never, in all of history, diminished the incidence of disease.

Please research states with non-medical [exemptions for vaccines](#) and write your legislators to pass bills protecting your medical freedom.
