

The Growing Nightmare for America: Loss of Culture and Way of Life

By Frosty Wooldridge

September 9, 2024

Part 3: Third World Gangs, terror groups, Hitler's actions, enormous costs, societal breakdown, something rotten in America.

"There is something rotten in Denmark," said Marcellus in Shakespeare's Hamlet. He referred to all the nefarious goings-on, the rotting of characters, and the corruption pervading that country.

"Something is rotten in America in 2024," report historians like Victor Davis Hanson, one of the most trusted academics of our time. He wrote, *The Case for Trump*. He also wrote, *Mexifornia*. His wisdom and knowledge surpass any of the talking pundits on America's airways. I met him in Washington DC 20 years ago. I heard him speak. He made common sense then, and he makes more common sense today as to his take on what's happening to America.

One reader responded, "Frosty, per your essay on America's Growing Nightmare, the kicker is that the majority of voters in California keep voting for people like Gavin Newsome, Adam Schiff, Maxine Waters, the late Diane Feinstein, and Nancy Pelosi, who promise to give them even worse conditions in the future. They can't get enough of it. If you can come up with a

good answer for why the California electorate keeps voting to cut their own throats, then we will have a much better idea of how to save this country. Ditto for the voters in Washington State, Oregon, New York, Massachusetts, and all the blue cities and states throughout the country. Those people seem to WANT their country to become a third world hell-hole, and they keep on voting for anyone who promises to make that happen. Dear God in Heaven, how did we get to the point where so many Americans seem to want to destroy their own country and culture." Milt

"In 2008, prior to the November election, Barack Obama spoke to a large, seemingly adoring, group in Chicago. In summarizing his potential plans for America as its next president, he said he was planning the 'fundamental transformation of America'. Except for 2016-2020. Democrats have been in control of the White House, Antonio Gramsci's proposed 'march through American institutions' has been completed, and should Harris and Walz win in November, Obama's promise may become a fait accompli by 2028. Klaus Schwab, head of the World Economic Forum, also made a prediction for us: 'By 2030 you (we deplorables) will own nothing, and be happy'." Gary/MI

What did Muslim Obama/Barry Soetoro do? He exploded Muslim immigration into America. He fomented incredible racial chaos and anger. He and Kamala Harris supported the 2020 Black Lives Matter riots and destruction of \$2 billion in property. Along with "defunding the police," Kamala Harris created a "Go Fund Me" bank account to bail out homegrown terrorists to get back out on the streets to burn, steal and kill.

Not only that, but we also now endure a growing Islamic Caliphate in Detroit, Michigan, where Sharia Law dominates those 300,000 foreign-born Muslims. Who, by the way, live on our welfare systems with no incentive to work or support America. In fact, those Muslims have been chanting on videos, "Death to America." And, you won't see a single American flag

in that area of Detroit. You will see the Palestinian and Islamic flags being flown. Talk about, "Something rotten in America..." How do I know? I visited Detroit, Michigan last summer.

Now, we've got ISIS terrorists proudly burning America's flag at Columbia University, Harvard and many more. They desecrate our founding fathers with paint and stickers, and celebrate that most sickening Hamas terror group that slaughtered 1,200 Jews on October 7, 2023. In fact, you will see their American Muslim proxies celebrating October 7th in our own streets. Does that remind you of Adolf Hitler?

How could America, a country that guarantees freedom of religious choice become the next birthing grounds for Hamas, Nazi's, Iran, et al.?

Let's talk about those 12,000,000 (million) illegal aliens who Biden-Harris invited into our country for the past 3 1/2 years. What happens if Kamala reaches the White House? How would you like another 12 million of those third world people residing in our country? How do you hope to pay for their food, housing, transport, medical and schooling? Do you have any idea as to their ability to contribute to anything in America other than lining up in soup kitchen lines or sleeping in the streets?

If Kamala Harris reaches the White House, much like the voters in California who keep voting in those lunatics, she would have a green light to invite 20 million or 50 million or more illegal aliens into America. You must understand that Congress didn't stop Joe Biden. You must understand that Congress won't stop this invasion with Kamala in the White House? How can I say that? Answer: Congress didn't stop Joe Biden, and it won't stop Kamala Harris. Most of them are ALL "rotten in America."

How will the fabric of our culture withstand such God-awful numbers and such horrendously incompatible cultures,

languages, and world views? What if Laken Riley, a University of Georgia nursing student out for a run, were your child? That Venezuelan illegal thug raped her, brutally murdered her, and destroyed her body. Well, there are thousands of Laken Riley's who have been killed by illegal alien gang members, MS 13 drugs (over 250,000 drug overdose deaths in the past three years), and Muslims rapists who possess no social contract inclinations. All of them brought to you by Joe Biden, Kamala Harris and our indolent, useless and "rotten" Congress.

Do you know what happens in third world countries? Answer: NO LAW AND ORDER! That's right! Your property, your well-being, your community, mean nothing to illiterate, hungry and sociopathic criminals on the hunt for turf, money, and gang status. Look to my own Denver, Colorado where Venezuelan gangs have overrun apartment buildings and shot them up. Our "beyond stupid" open borders U.S. Senators Hickenlooper and Bennet, along with Governor "Open Borders" Polis, along with Sanctuary City Mayor Johnston, all support the 45,000 homeless illegals marauding around Denver...defecating on our streets, selling drugs, shoplifting, and sucking up our welfare dollars by the millions.

Do you think it's all going to work out? Do you think the next 12 million illegal aliens under Kamala Harris won't "fundamentally change America"? Do you think we're safe from another 9/11 event with all the terrorists that have taken up residence in our country?

If you think it's all going to be "just fine" because this is America, you would be a damn fool.

Part 4: What it costs us? Our national \$35 trillion debt. The \$150 billion we pay for immigrants. Monsanto and our poisoned food chain. The sheer numbers that we cannot sustain.
