

The Hunters Have Now Become The Hunted: Their Cruelties Are Swelling the Ranks of The People Worldwide

"You can only oppress a people for only so long."

The history of oppressors is that they are going to be allowed to oppress the people for only so long before the oppressed respond.

Anyone and everyone that paid attention to the repeat criminals such as Anthony Fauci, Bill Gates, CEO of CDC Rochelle P. Walensky, etc. already knew what the whole plandemic was all about, a planned crisis (Jeremiah 11:9).

It just so happens that over in New Zealand that the hunters have now become the hunted.

The People's Voice reported: "[Vaccinators in New Zealand Fear for Their Lives As Public Rise Up Against 'Pandemic Genocide.'](#)"

Thousands of nurses in New Zealand say they now fear for their lives as the public begin rising up against the genocide committed against them during the pandemic.

The names and details of over 12,000 vaccinators in New Zealand was recently leaked online. The Te Whatu Ora data breach has left nurses who administered the deadly shots fearing a backlash from an angry public.

One nurse, who did not want her name used, said she was shocked to receive an email from Te Whatu Ora on Friday telling her her name was on the list.

Nzherald.co.nz reports: She was not sure what else to do to feel safer, and so far had asked her landlord to fix her fence.

"I just worry that someone will come to my house and threaten me and my children," she said.

The email to the vaccinators said their names were found on a document on the US site on January 25.

"To the best of our knowledge, your name was removed from the publicly available file on 29 January," it said. "In saying this, I also need to acknowledge that the information is still held by one or more parties outside of our control."

The nurse worried people might track her down years later and wanted Te Whatu Ora to guarantee it would support any nurses with safety help long-term.

She felt let down by the breach. The importance of privacy was drilled into her and her colleagues in training and she had expected the same from Te Whatu Ora, she said.

"I assumed that their standard of confidentiality and privacy would be top-tier, pretty much everything sealed so nothing like this could happen," she said. "I'm quite frustrated they haven't upheld their side of keeping us, as nurses, safe in New Zealand during a pandemic."

Union the Nurses Society represented about 6000 nurses, and its director David Willis said they had heard from a lot of

worried people. They were also concerned that they could be approached.

Wills said he had not spoken to anyone who had been threatened or harassed, but the union had emailed advice to all its members on what to do if they were.

“Of course, people are mindful that [the data] is still in the hands of people outside their control and that is concerning and disturbing and hopefully Te Whatu Ora has taken steps to make sure that doesn’t happen again.”

In a statement, Te Whatu Ora chief of people Andrew Slater said any unauthorised release of data was a gross breach of trust and they were very disappointed.

Maybe this is the reason for increased security for those who are to serve the people. The people are coming around that they have been deceived by those who are supposed to protect them (Luke 22:48).
