

The Knights of Senator Johnson's Round Table

By Cherie Zaslowsky

June 29, 2022

The one and only good I see coming out of the Covid Plandemic and catastrophic, quasi-mandatory vaccine policies, is that we're seeing some Americans emerging as heroes during this dark time.

Many of us have long since known the names of key villains in our fight for the Republic and for liberty—people in the psychopathic billionaires' club such as George Soros, Bill Gates, Klaus Schwab, Ted Turner, —and lesser, but equally destructive players, such as the Clintons, the Bushes, the Bidens, Pelosi, Newsom, Canada's Trudeau, France's Macron, etc.

But most of us likely had never heard of Dr. Scott Atlas, Dr. Lee Merrit, Dr. Jay Bhattacharya, Dr. John Ioannidis, or the U.K.'s former Pfizer VP, Dr. Michael Yeadon. Along with dozens of others, these men and women have risked their careers by taking a stand to save lives and speak the truth—which, in a time of universal deceit, as Orwell warned us, has become a revolutionary act.

THE KNIGHTS EXPOSE A MASSIVE CRIMINAL CONSPIRACY

But, lest we forget, I want to focus on a particular group of similarly remarkable men and women who, in January of this

year, participated in a 5-hour hearing conducted by another hero who has taken a brave public stance: Senator Ron Johnson.

Senator Johnson (R-WI) has emerged as perhaps the most courageous, principled and insightful man in Congress—and I do mean both houses. Here's a short sampling of our true American heroes featured in this roundtable: Dr. Peter McCullough, Dr. Pierre Kory, Dr. Paul Marik, Dr. Harvey Risch, Dr. Aaron Kheriaty, Dr. Christina Parks, and a number of others including some brave nurses, some tragically vaccine-injured individuals, and a pair of formidable attorneys including firebrand Tom Renz, fighting for doctors and their patients.

Speaking of Thomas Renz, even among so many horrific tales, his brief presentation was mind-blowing. Attorney Renz, working with several brave DoD whistleblowers who furnished him with data we weren't supposed to see, shocked the room with his findings: among our mandatorily-vaccinated military, miscarriages increased by 300%, cancer by 300%, and serious neurological disorders by 1000%. Says Renz, "[Our soldiers are being experimented on injured, and sometimes possibly killed.](#)"

DOD CAUGHT RED-HANDED

Senator Johnson followed up by sending a [letter to DOD Secretary Lloyd Austin](#), in which he wrote:

"Based on data from the Defense Medical Epidemiology Database (DMED), Thomas Renz, an attorney who is representing three Department of Defense (DoD) whistleblowers, reported that these whistleblowers found a significant increase in registered diagnoses on DMED for miscarriages, cancer, and many other medical conditions in 2021 compared to a five-year average from 2016-2020. For example, at the roundtable Renz stated that registered diagnoses for neurological issues increased 10 times from a five-year average of 82,000 to 863,000 in 2021."

I wish I could say that this became front page news throughout

our nation. But instead, the DOD, with backup support from the Leftwing rag [Politifact](#), ran to the rescue with damage control. Politifact's Jeff Cercone had the gall to announce there had been a "glitch" in the data. More brazenly yet, [DOD spokesman Peter Graves](#) claimed the entire Defense Medical Epidemiology Database (DMED) was discovered to have been wrong from 2016 to 2020—meaning it can't be used for comparison to assess any anomalies in 2021. Hmmm... Graves announced DMED has been "taken offline" to "identify and correct the root-cause of the data corruption."

Anyone think we need Sherlock Holmes to identify the root cause of this mess? Forget the fake "data corruption"—I mean the real thing: the DOD's corruption! I guess it was too late for them to simply erase the injuries the whistleblowers had discovered among the vaxxed, so they went for the other side of the equation instead—nullifying the grounds for comparison.

THE REAL EXPERTS

All told, Senator Johnson's five-hour roundtable delivers a shocking exposé of the American medical system gone completely off the rails. The stories these brave men and women told brought some of them to tears, as they did this viewer.

These are the real experts—men and women who went into medicine for the right reasons—to actually heal patients. It is heart-wrenching to watch Dr. Marik announce that the hospital he'd worked out for decades tied his hands, refusing to allow him to treat his patients with proven safe and effective therapeutics. Here's what this expert physician said, while blinking away his tears: "I had to stand by idly, watching these people die!" Dr. Marik is the only one present whom I heard use the word "evil", though he applied it only to the hospital and its phony review board as they stripped him of his hospital privileges, ending a stellar decades-long medical career.

And another of our nation's most distinguished and highly esteemed physicians, [Dr. Peter McCullough](#), may even lose his license to practice medicine if the American Board of Internal Medicine has its vindictive way. His crime? Trying to save lives—I mean spreading “misinformation.” It doesn't get more Orwellian than this.

ALL ROADS LEAD TO THE “VACCINES”

If you connect the dots, it quickly becomes apparent that all the atrocities we've seen—from denial of therapeutics, to enforced use of Remdesivir, to pumped up “positive cases” through inaccurate PCR tests, to vaccine mandates, etc.—serve to ensure and promote widespread inoculation with a novel, highly experimental, genetic-disrupting “vaccine technology.”

How so? Well, the rampant PCR testing at high threshold cycles makes it look like we have a “pandemic” crisis, as the numbers of “cases” climb. This ramps up fear and makes it more likely people will willingly take the sometimes fatal shots.

The deaths of thousands of our countrymen resulting from the horribly cruel denial of safe therapeutics such as Ivermectin and Hydroxychloroquine, various steroids, etc., is likely viewed as mere collateral damage by the perpetrators of this heinous crime, as they needed to preserve the Emergency Use Authorization for the Pfizer, Moderna and J&J “vaccines.” You see, if doctors everywhere started saving lives by using safe, repurposed and readily available drugs, Big Pharma would lose its [Get Out of Jail Free card: the EUA](#) that protects them from liability. Not only that, but the “emergency” disappears if Covid becomes treatable with therapeutics. And they couldn't have that, now, could they?

And what about hospitals forcing Fauci's Favorite “Remdesivir” on helpless patients—a drug known to cause kidney failure? As I learned from Robert F. Kennedy's blockbuster book “The Real Anthony Fauci,” nurses have dubbed this drug “Run-death-is-

near.”

Why inflict this on patients? Well, there’s a hefty perverse incentive, as hospitals receive huge bonuses for every “Covid death” and even more if they prescribe Remdesivir, and another lump sum for finishing the patient off on a ventilator. Hmm.. Besides, isn’t death of the victim the purpose of bio-weapons? So if Covid didn’t do the job, they evidently have their hospital backup plan, as attorney [Thomas Renz](#) and brave whistleblowers have documented. Renz estimates hospitals that play this game get around \$100,000 per “Covid” patient.

CO-OPTING THE MEDICAL PROFESSION

So how do you get hundreds of hospitals and thousands of physicians to perform in lockstep? Simple—though the Rockefeller/Gates/JohnsHopkins consortiums spent a good deal of money to figure this out.

You use two trusted methods: bribery and threats. You bribe the venal and the pushovers, and you threaten those who seem to have a stronger moral compass.

Sadly, as we’ve seen, the majority succumb to these pressures. It is not an easy decision to risk losing one’s medical license and therefore livelihood and means of supporting one’s family. It takes courage—what Aristotle called the first of the virtues, upon which all the others are dependent—and, as we’ve seen writ large in the past few years—it’s rare.

THE BILLION DOLLAR QUESTION

After listening to several hours of horror stories about unnecessary deaths from Covid-19, and maiming and deaths off the charts from vaccine injuries, I think it was Senator Johnson who asked the key question: Why?

Why are the CDC, FDA, NIH, medical boards, hospitals, etc., all seemingly on board with such obviously cruel and unusual

practices?

Dr. Pierre Kory provided this answer: "Corruption!" "They're putting profits ahead of lives!"

Well, yes, we see the money sloshing around, and hospitals, Big Pharma, and Dr. Mengele Fauci, among others, are making out like bandits, but as for the "why" question, I beg to differ. After all, we've seen corporate corruption and profiteering at the cost of lives before. Take the tobacco industry moguls. They knew cigarettes caused lung cancer fairly early on. But hey, there was big money to be made. So...they hid that knowledge and kept selling cigarettes.

That's how corruption works. It's got to be secretive. But that's not what we're seeing now. The downright coldblooded murder of our fellow citizens in hospitals is not hidden. Nor is the carnage from the vaccines for anyone who knows how to search for it on the internet. Besides, given enough time, the truth will out. And Senator Johnson and the heroes he assembled are doing their best to speed that up.

MOTIVE AND OPPORTUNITY: THE GREAT RESET

So if it's not primarily about money and corruption, what could the motive be?

Ask Dr. Michael Yeadon, former Pfizer VP in the UK. Early in this saga, Dr. Yeadon detected a "whiff of evil." He was the only one at that time who used that word, thus making him one of my early heroes, since I detected that same whiff.

What Senator Johnson's group may not understand is that America, and indeed, the world, is now in the grip of evil. We're in the End Game of the psychopathic billionaires' One World Government club, and they long since announced they want to drastically reduce the world's population. And they didn't mean over the next hundred or two hundred years. They mean in the next three to five years. Make that in the next seven

years, if you sense a Biblical connection.

We're witnessing planned genocide being enacted. The parallels with Nazi Germany are legion. I was horrified listening to Dr. Richard Urso saying that in the early days of Covid, hospitals would not only refuse to let family members enter the room of their loved one who was dying, but after death, they would not release the body to the family for burial! What did they do? They incinerated it! The Nazis would have been proud.

The globalist cabal call it "depopulation" which is Orwellian doublespeak for mass murder. That's why this is happening, Senator Johnson. These maniacs have bought up politicians, medical associations, hospitals, doctors, and the entire mainstream media which they use as their PR mouthpiece day in and day out. They own the narrative. And while they and their minions like Fauci and Big Pharma moguls no doubt love the blood money they're raking in, the New World Order oligarchs don't need money—that's not what they're after. They want absolute power and they want a much smaller population to control. They're simply culling the serfs.

The globalist cabal behind this entire evil agenda are all in for maximum deaths of those they likely regard as "useless eaters" after the manner of past psychopathic power-mongers like Stalin.

And of course all their Covidian machinations translate into preserving the all-important narrative: the world's first never-ending "pandemic," necessitating never-ending vaccine booster shots, digital vaccine passports, digital currency, tracking, tracing, 24/7 surveillance, ID2020, Social Credit Scores, the Great Reset, and Internment Camps for dissidents, while everyone else will "own nothing and be happy" under a One World Government that makes Orwell's masterpiece *1984* look like a walk in the park.

That's why they're doing what they're doing.

And that's why they must be stopped!
