

The Magnaforce of Trump's DC is Blowing Minds

By Kat Stansell

April 5, 2025

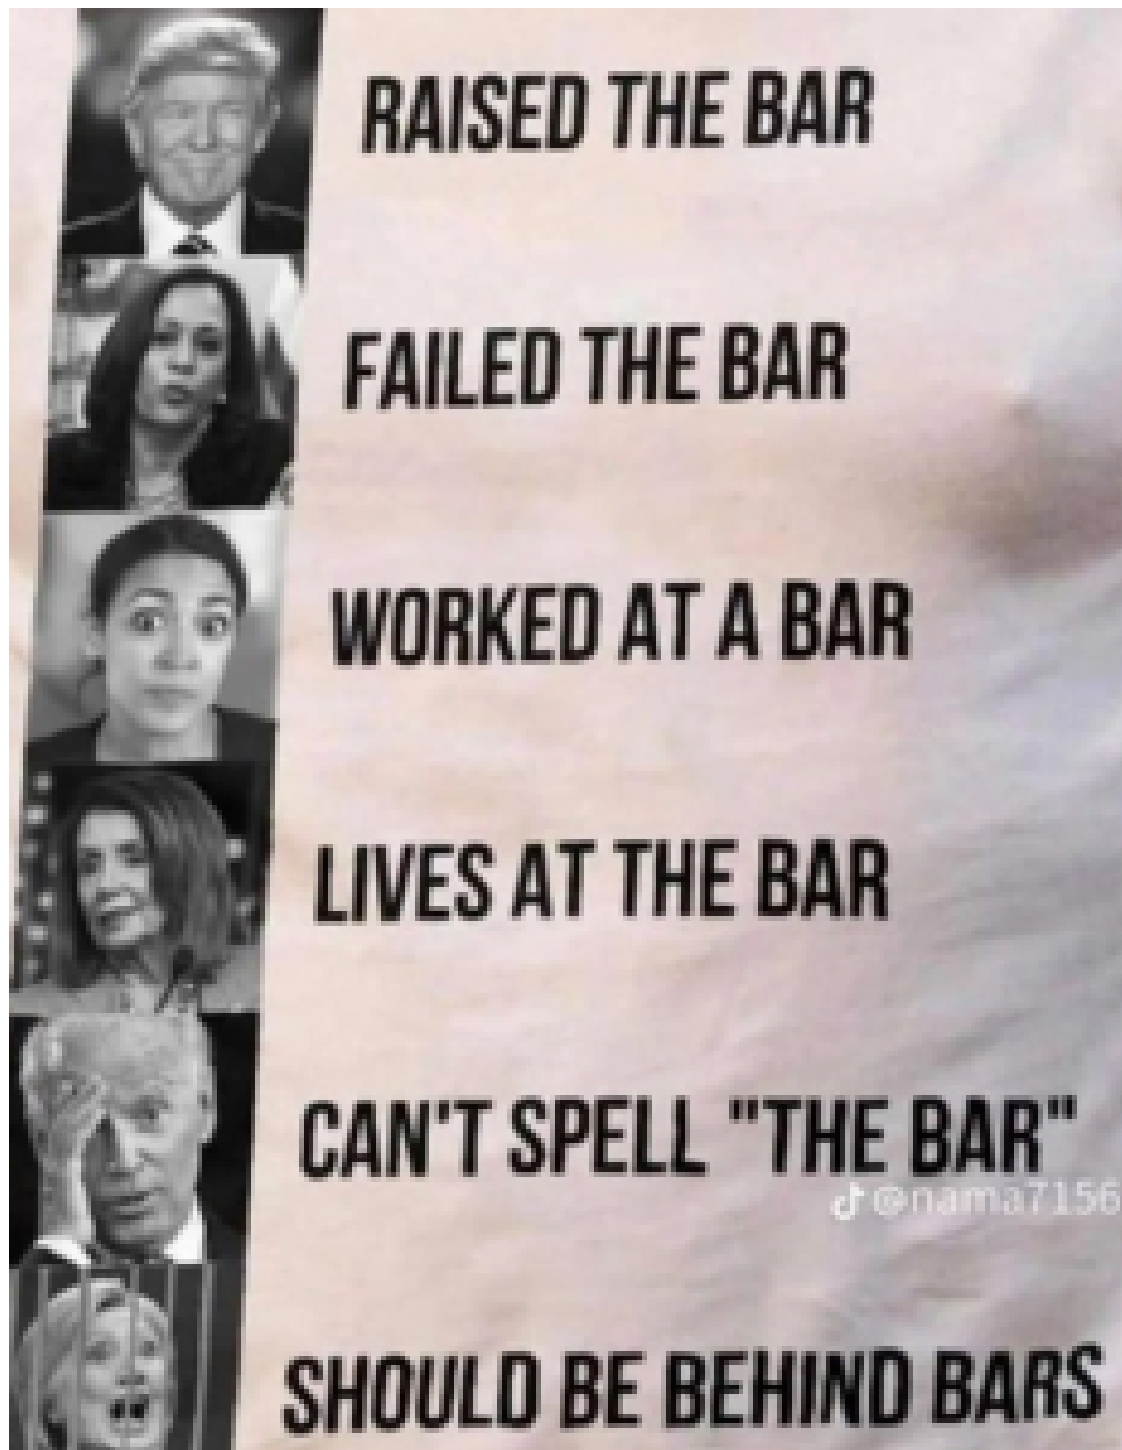

A First Quarter Like None In History Has Raised the Bar

I start out joking, because we NEED a touch of lightness. What has risen from the swamp is a darkness like we could never have imagined. The clouds of it can frighten the very soul of the caring American. I know they do, mine.

Since God and the American people have managed to get Donald Trump back to the White House, truly incredible political dirt has surfaced. Since the 2020 Coup delayed his second term, President Trump spent those four years assessing what real progress was needed in our nation, and how to make it happen. He chose players and programs, and had a pre-election list of Executive Orders ready to roll. Then, he got the electoral and heavenly go-ahead.

Now, he is in full throttle, with lots more to come. I want people to give him the chance. Some people promise but don't deliver. Trump is delivering and then some.

I believe that most of the nation agrees with most of what he is doing. His approval rating bounces around depending on which news source is whining about what. The way I see

it, the 2024 election was our vote of approval for him, so let's let his accomplishments speak without tons of stage dressing. It's only been three months.

Thank God voters woke up, in those four years, 2020 – 2024, and stormed the polls to the degree they did. Election fraud was beaten back. The strength of the election integrity work from some, enabled us to regain our country. But, only for 24 months. I pray that fact is clear to everyone.

The polls have been trying to change your mind, since Trump's inauguration. DON'T LET THEM. Think for yourself; I know most of you will do this without thinking, if that makes any sense...

Until these last months, none of us realized the dark forces that had set up shop behind the scenes. Even in the minds of average lefties, there has surfaced an evil that few of us could have anticipated before. The "Summer of Love" gave us a clue, but 99+% of us thought that would somehow go away.

If anyone ever had a doubt about the existence of true EVIL, and its power over the human mind, that has now been dispelled.

Daily, we face headlines about Christianity under attack, "democracy" under attack, the dollar under attack, food supplies, under attack, the stability of the life systems on our planet under attack.

Even our HOME OWNERSHIP is under attack. The very land that Will Rogers said was the "best investment because they ain't makin' no more of it.," is under attack from the poison skies and from the poison surrounding the DC Dome. Rogers was a well-loved American figure, a vaudeville performer, actor, columnist, and radio personality, born in the Cherokee nation, in 1879. That's one of my favorite quotes.

The massive property tax scam is making the ownership of your own home unaffordable. Already, 37% of American home owners cannot afford their homes due to skyrocketing property taxes. Will Rogers is spinning in his grave, where he's been since 1935.

The Trump administration's look into the net worth of Congress Critters should be interesting. VERY much so. I admit I am looking forward to the results. Their votes were quite precious, I'm sure, and worth the purchase for exorbitant, illicit amounts. It would take an entire series to find the source of their wealth; some, may even be honest, but the

majority is NOT, I believe. Will's spins will pick up speed as we learn, I am sure.

One of my favs, in the category of Government Grift, is the "Inflation Reduction Act". The title was aimed at all those who had been complaining about the inflation under Biden (according to Investopedia, 4.95% Y-o-y). Only Jimmy Carter had worse, and that was just under 10% y-o-y. Year over Year (YoY) growth is the percentage change in an annualized metric over two comparable periods, most often the current and prior period.

Everyone knows that the IRA had ZERO to do with inflation, but was, instead, a deep reservoir of our money, created by Congress, tucked away for scams and programs, many of which were non-existent. How much of it – and USAID, et. al., went into Congressional pockets, we may never really know.

As The Heartland Institute points out in a new policy study, The High Costs of Climate Scams: Assessing the Green Giveaways in the Inflation Reduction Act, the true cost of these and all the other open-ended subsidies tucked away in the IRA is hard to quantify, but they are also certainly an order of magnitude higher than the \$369 billion the Biden administration claimed.

Goldman Sachs pegged the actual cost (of the IRA green scam) at \$1.2 trillion through 2032. Now, THAT's some "pocket change."

Is there any wonder Trump and DOGE are spending nearly 24/7 bringing our economy back to some basis of reality?? Ah, but the harder they try, the more high-pitched whining, some even from our own side. And, then there are, of course, the riots, attacks on anything Tesla, and even the attempted murder of Virginia Giuffre, the Epstein and Prince Andrew accuser. The Lord only knows – literally – what went down on THAT.

A few people in the Cabinet might be doing a better job, but that is not the point here. What we need to keep, front and

center, is the key element of our survival: keeping President Trump functional for four years.

The sine qua non of a future for our Constitutional Republic is election integrity – the systematizing of honesty at the ballot box, as surely as possible. There a lot of people out there, trying to grab the President's attention, to be included on this most important team; some, not in synch with what needs to be done. I know who I would choose, but it is not my call. Clean voter rolls are a MUST, whoever can help us attain them, across as many of the 50 states as possible.

It's nice to hear states like Michigan want to clean things up, but there's a world of crime to dig into up there. Wisconsin, too, and PA. Combined with the usual partisan judicial interference, they have a LONG way to go. I do wish everyone real luck. We all need elections in every state to be honest.

We must watch the judiciary. Only in British Common Law does a judge have any power over the Chief Executive – NOT IN A DEMOCRACY.

Common Laws are laws that have come about of been enacted based on court rulings. These laws are developed based on rulings that have been given in older court cases. Constitutional Law is the body of law that defines the relationship between different entities within a nation, most commonly the judiciary, the executive and the legislature bodies.

Although they have no Constitutional power over the President, the Soros judicial purchases will make things as hard as they can – wasting more precious resources of time and money, as they illegally wave their legal robes.

If we can put more good Constitutional conservatives into Congress in 2026, we have two more years at least, to save the American Republic. If not, 2026 – 2028 will be more

impeachments, and more theft of our money and our government.

Trump has raised the bar. Let us help him – and our nation – over it

America will not come back if we lose in 2026. This IS our last rodeo. Please remember that and do everything you can in your own community. We want to ride our families and our future off into decades more of a beautiful America.

You know what to do. You are good people.
