

# The path to understanding Pt. 12

THE SAME OLD BEAT, STILL ON TRACK

What the title of this article is referring to is this thing of our continually being confronted, over and over, with the contrived and manipulated series of crises.

What we have been currently going through, and are about to have forced upon us by the Obama Administration, is the Trans-pacific Partnership (TPP). It will be followed by the Transatlantic Trade and Investment Partnership.(TTIP). This will be done with help from the traitorous Republican leadership, along with the rank and file members.

These two so-called “free trade” proposals are being pushed, supposedly, or ostensibly, as a cure for our economic woes. The beginning of this insanity initially began with another “free trade” fiasco by the name of NAFTA. It too was also contrived. NAFTA was supposed to bring us an unimaginable amount of prosperity, but remember what happened – it was just the opposite, wasn't it? Our jobs are gone, manufacturing is gone, and the trade deficit is huge.

The result was the beginning of an economic crises. So, now, since we have this crises, with people being out of work, then something has to be done. Everyone can see that. What is their Hegelian Dialectic answer is to this mess, is that we must bring forth another “free trade” agreement to get us out of this crises. However, they're selling this pig in a poke by stating that it must be much stronger than the one before that resulted in us being in this fix. The previous one, NAFTA, GATT, etc., was just too weak.

I'm being satirical here – I hope you can see that, yet it's true!

Congress has been sucked into supporting this so-called “free trade” scheme. How? By all the hype about how it’s going to boost our economy, including the fear tactic that is being spread by the Obama Administration, along with practically all the Republican leadership.

The way it plays out is as follows: The New York Times reported that “U.S. Allies see the Trans-Pacific Partnership as a check on China.” What hogwash!

Congressional aides have claimed that the TPP would stop Chinese economic aggression in the Pacific. And, neoconservative groups, i.e., Neo-Cons – Trotskyites, are promoting the same idea.

This is a sample of what has resulted in the buildup to promote the passage of the TPP among conservatives in the U.S. Congress and, seemingly, throughout most of the American business community.

It’s all about trade, they say. Nothing is ever said about the loss of sovereignty. This, of course, tells me they are well aware that it (LOSS OF SOVEREIGNTY) will happen. Since they never mention anything about this, that means it is purposely being omitted from the dialog, and they don’t want it being discussed.

This, of course, reveals that the promoters of, and subscribers to, this scheme are in collusion with the forces which have as its/their goals, the complete destruction of all fundamental American principles. This, of course, coincides with what Obama has declared as his goal, “TO FUNDAMENTALLY TRANSFORM AMERICA.” However, he may claim it as his goal, but the agenda for it was being followed before he came along, or was even heard of. He only had the baton handed to him to possibly bring it to fruition.

Even though it is being touted as a means to deter China from its economic aggression, according to what I have seen in my

limited research, the plan is to bring China in later. So it's just a scare tactic to suck conservatives in who don't know anything, and haven't the desire to learn or research.

In addition to the so-called "free trade" agenda which is being pushed by the Obama Administration, and supported by the Republican leadership including all the contenders for the Republican nomination with exception of Trump, we now have this refugee crises which is a threat to our domestic security.

There is no doubt in my mind that it too has been contrived.

It plays into Obama's goal of "Fundamentally Transforming America." This is what he said he was going to do, and everything he has done, or proposed, has been toward that goal.

Consider this: If the "free trade" fiasco becomes law, it will practically put an end to our sovereignty as an independent nation. We will be nearly all the way into the European Union which will put us about one step away from Total World Government. This will practically destroy all freedom from the earth.

Now, if that isn't enough, just think about all these illegals, plus the untold thousands of refugees, which we know will be saturated with future terrorists, to be turned loose on the people at some future date. And couple that with the possibility that this president and these Congress criminals all have the desire to totally disarm us, resulting in our inability to protect our lives and property.

Next in the drama is, if our local law enforcement is being controlled by the Federal Government, which has been in the plans for some time now – then all our foundations for protection of Life, liberty, and property will be no more. This brings to mind a quotation from the Bible, "IF THE FOUNDATIONS BE DESTROYED – WHAT WILL THE RIGHTEOUS DO?"

Moreover, what will any of us do – righteous or not?

All of this fits in with the Lefts' Modus Operandi (Method of Operation), which they advance through a series of crises. If one exists, they use it to bring about change; if one doesn't exist, then they create one. Then, through their control of the media they denounce it; while at the same time they ostensibly, or supposedly, appear to be with the people. When the people get stirred up enough to begin clamoring for a solution to the crises, then those who started it will come forth with the solution.

That very solution was what they had in mind at the beginning which was calculated to bring about more change, but always in the direction desired by the left. This always leads to a subsequent crises, and the process starts all over again.

Call your Congressman, and Senators now; tell them to oppose all so-called "free trade" legislation as well as any support for the refugees being resettled here. Also, tell them to oppose any attempts to control the internet, for in order for us to work against all this, we need the internet. I know we've called before and many believe it does no good, but if enough of us raise Cain and close down their rotten phone lines, then perhaps we can at least stop some of this for the time being. C'mon America, we are supposed to be land of the free, home of the brave. It's about danged time we get up and show them that's what we want and what we're willing to fight for!
