

The Strange Death Of Europe: Multiculturalism And Diversity Prove Destructive

Part 3: Multiculturalism & diversity shoved down the throats of Western countries only—Canada, America, Europe, Australia

Several dozen letters poured into my inbox in the past week from this series. One from Great Britain rendered these sobering words, *“And the faster and greater the dilution of citizenship due to immigration and multiculturalism, the less likely it will be to find anyone with enough courage to speak out, until finally the real truth of this terrible mistake will be lost forever.”*

As Douglas Murray states in his book, **The Strange Death of Europe: Immigration, Identity, Islam**, mass immigration and competing cultures wreak havoc on European culture like a 1-million-pound steel ball smashing into a skyscraper at the base. No matter how strong or tall the building, and no matter how long it soared into the sky—it will collapse.

At some point, with enough of the Middle Eastern and African immigrants flooding into Europe, every country will meet its end. It's called exponential growth, and/or, you could address it from the sociological angle, which means European ethos from each country will fall into the quagmire of diversity and multiculturalism.

Murray notes that Japan doesn't allow immigration nor does China. Nobody wants to immigrate into India. Notice Muslim countries like Saudi Arabia won't allow refugees, whatsoever, even though they are Muslims. Yet,

someone in power demands that Western countries accept every refugee that flounders onto their shores from across the Mediterranean or the Atlantic or Mexico.

The question: how many refugees can Europe, Canada, Australia and America absorb? Because the sad reality remains that in the 21st century, the United Nations expects more than a billion refugees as the human population adds another three billion by 2050.

One reader said, "There are only three basic ways of looking at all the issues Wooldridge raises here. Pessimistic, realistic and optimistic.

I would say Wooldridge is clearly being realistic, and certainly not OTT! [Murray is spot on as to what's happening in the United Kingdom] It is only the fear of being called racist and other condemnations including the "need" for all the benefits immigrants bring to our country. (Sic) I think we really mean to our economy and ourselves; we are not really that concerned about helping them. This fear of being called a racist prevents the average truly British citizen from speaking out."

The very freedoms of speech of Western countries allows the

immigrants to trash their hosts in the name of racism, xenophobia and nativism.

Murray wrote as to multiculturalism and diversity, "At the same time, the only culture that couldn't be celebrated was the culture that had allowed all these other cultures to be celebrated in the first place. In order to become multicultural, countries found that they had to do themselves down, particularly focusing on their negatives. Thus, the states that had been so open and liberal that they allowed and encouraged large scale migration, were portrayed as countries which were uniquely racist."

Today in America, charges of "White Supremacy" rain down on President Trump from "Black Supremists" who command the upper hand because of their minority numbers. We see Black Lives Matter, but no chance for White Lives Matter when only two percent of crimes against blacks are committed by whites, but 98 percent of killings of blacks are done by other blacks.

In Europe, 99 percent of rapes find Muslim immigrants as the culprits, but top officials do everything in their power to hide the facts so as not to espouse 'racism'.

Murray states that Merkel of Germany finds herself in a nasty fix, but Macron of France faces riots daily and Theresa May of the United Kingdom can't bow down fast enough or often enough to the growing Islamic immigrant mob ruling London.

In America, we see a failed gubernatorial candidate from Georgia, Stacey Abrams, who owes \$50,000.00 in back taxes and a reported \$150,000.00 in campaign debts—do a hatchet job on the State of the Union speech by Trump. She charges unfair voting and voter rights violations. How do you combat that from a black lady? You would immediately be labeled as a racist.

Today in Europe, Europeans sit shuttered in their homes, afraid to walk their own streets. Immigrants of every race,

creed and color hang out, harass and beat people up, especially women, if they travel in 'no go' zones in most cities dominated by immigrants.

I'm almost half way through this vital book. It portends a tenuous future for Europe. It almost cannot help but end in racial and religious conflict we haven't seen since medieval times.

In his book, *Clash of Civilizations*, Samuel P. Huntington wrote, "It is my hypothesis that the fundamental source of conflict in this new world will not be primarily ideological or primarily economic. The great divisions among humankind and the dominating source of conflict will be cultural. Nation-states will remain the most powerful actors in world affairs, but the principal conflicts of global politics will occur between nations and **groups of different civilizations**. The clash of civilizations will dominate global politics. The fault lines between civilizations will be the battle lines of the future."

Any culture that will not defend itself against displacement through mass immigration faces extinction. That includes both time-tested and successful cultures. Embracing diversity results in cultural suicide. America's multicultural path guarantees its destruction via cultural clashes and conflict with Islam, Mexican and African cultures that diametrically oppose American culture. The more diverse a country, the more destructive and broken-down its future. The more people, the more it destroys its quality of life and standard of living. The more it adds immigrants, the more destruction to its environment. The more it imports refugees, the faster America, Canada, Europe and Australia lose their own ability to function and worse, their identities. Exponential growth of any civilization leads to ultimate collapse. You see it in Africa, India and China today. You will see it in Europe, Canada, Australia and America in the coming years, "IF" Western countries don't stop all forms of immigration.

Part 4: What can Western countries do to save themselves?
How can they preserve their cultures? What can the third
world do to save itself?
