

The Web of Dystopian Tyranny – Part 1, The Hunger Games

By Kelleigh Nelson

April 18, 2023

Part One – THE HUNGER GAMES

The way to crush the bourgeoisie is to grind them between the millstones of taxation and inflation. –Vladimir Lenin

Communism has never come to power in a country that was not disrupted by war or corruption, or both. –President John F. Kennedy

For us in Russia, communism is a dead dog, while, for many people in the West, it is still a living lion. –Aleksandr Solzhenitsyn

Everyone may be called “comrade,” but some comrades have the power of life and death over other comrades. –Thomas Sowell, 1930 -, American political thinker

In 1952, as John F. Kennedy was campaigning for the Senate, he addressed the Massachusetts Chapter of the American Federation of Labor. He focused on the expansion of Communism and the priority of containment. The future senator referred to the Communist threat as “an enemy, powerful, unrelenting and implacable who seeks to dominate the world by subversion and conspiracy.” He asserted that, “All problems are dwarfed by the necessity of the West to maintain against the Communists a balance of power.” He also pointed out that containment was

necessary not only for United States military safety, but also because of the threat Communism posed in “political and economic” spheres.

Here is the [full transcript](#) of that amazing speech.

Can you imagine any person running for office, or for that matter, anyone in Congress giving a speech like that today? Congressman Larry McDonald was the last Democrat who spoke words of freedom. He was the Chairman of the John Birch Society.

As Alexandr Solzhenitsyn said, “The simple step of a courageous individual is not to take part in the lie. One word of truth outweighs the world.” Do Not Comply!

Compare John Kennedy’s Senate campaign speech to the speeches of the Democrat Party members today.

America’s Communist Infiltration

The slow destruction of a once beautiful and thriving people has been in the works since the first socialists arrived in America in 1824. Robert Owen created the Utopian Socialist Society of New Harmony, Indiana in 1825. He tested some of his writings and speeches in both Scotland and Indiana and his experiments were very influential on Marx, Engels, and other socialists and communists at the time and later on. This led to Owen being mentioned in the Communist Manifesto and would lead to the creation of other utopian societies around the country.

Robert Owen’s influence reached key members of society. In February and March of 1825, Owen gave two speeches to Congress when figures such as John Adams, Thomas Jefferson, James Madison, James Monroe, John Quincy Adams, and others were present. Wouldn’t you love to know what our early presidents and founders thought of Owen’s speeches!

In 1848 we were flooded with immigrants from Germany, many of whom were Marxists whose socialism had failed in Germany. By 1861, there were 13 high ranking Marxist officers within the Union Army. This is documented.

By the 1930s, communists had infiltrated our schools ([The Turning of the Tides](#) by former Congressman Paul Shafer and John Howland Snow). Teachers were being taught how to subtly teach Marxism. Teachers' unions were started as early as 1916.

From 1950-1954, the public was alerted to growing communism within all segments of our government and it was already late in the game. Senator Joseph McCarthy tried to save the country, but was himself destroyed and his reputation sullied with lies.

Now, Communist China owns most all of America, land, businesses, education, banks, most portions of the government and certainly the military, especially Chairman of the Joint Chiefs of Staff, Mark Milley, who twice disobeyed the orders of the Commanders in Chief. First the treasonous act with China when Trump was President and his recent refusal to shoot down the Red Chinese spy balloon when Biden ordered it shot.

The doors of our country are now open, not for those with skills to increase America's greatness, but to the dregs of the underworld, most of whom are young men, gang affiliates, drug runners, child traffickers and more. Millions of illegals have entered America since Biden took office.

We are owned by the enemies of freedom and I cannot get my fellow citizens to call and write their colluding, money hungry, power seeking bastards in DC nor their state legislatures and tell them what we want and don't want. Only a handful of folks will let their voices be heard.

Have we heard any politician expose the manifest evils of the Great Reset's Klaus Schwab, Yuval Harari and the United

Nations? These are the globalist organizations whose plans are to reduce the population to serfs and slaves.

They are the new communist slave masters.

Will they even wake up when they're loaded in the box cars?

It is left to the people.

Culling America's Breadbox

To say America's breadbox is declining would be an understatement.

A [Texas dairy farm was completely destroyed](#) in a major explosion and 18,000 cattle are dead. U.S. Beef cattle industry is at [the lowest since 1962](#).

Cattle facilities are exploding everywhere. An article in [To the Point News](#) by Mike Ryan explains what is happening. If it doesn't come in for you, join up, as Dr. Jack Wheeler and Mike Ryan consistently score with valuable information.

Belle Carter [reporting for Natural News](#) tells us that nearly two in ten cows injected with mRNA die instantly. For Australian farmers/ranchers to keep their cattle and not go out of business, the government is forcing the mRNA injections containing spike protein on all cattle. Dylan Eleven reporting for [Principia-Scientific](#) that out of a herd of 200, 35 cows dropped dead from the mRNA injections.

There have been over 100 food processing plant fires in the last two years. Too many to be coincidental albeit there are around 5300 processing plant fires every year, but we don't know how many of those process food.

Attorney [Thomas Renz](#) reported that the lobbyists for the Cattleman and Pork Associations in several states have [confirmed they will be using mRNA vaccines in pigs and cows starting in April, 2023](#). Renz states, "No one knows the

impacts of doing this but we are all potentially facing the risk of being a #Died Suddenly if we don't stop this."

Since 2018, pork producers have been using customizable [mRNA-based "vaccines"](#) on their herds, and this has slipped completely under the radar.

Dr. Joseph Mercola's [article](#) on Children's Health Defense is essential reading. He writes:

As described on [Merck's animal health website](#):

"A revolutionary swine vaccine platform, [SEQUIVITY](#) harnesses RNA particle technology to create customized prescription vaccines against strains of influenza A virus in swine, porcine circovirus (PCV), rotavirus and beyond. It's supported by a sophisticated dashboard filled with comprehensive data and insights ...

"The very first [RNA-based livestock vaccine](#), a [swine influenza \(H3N2\) RNA shot](#), was licensed over a decade ago in 2012, and was developed by [Harris vaccines](#). The company followed up with an [avian influenza mRNA shot](#) in 2015. [Harris vaccines](#) was acquired by [Merck Animal Health](#) later that year."

Right, and we're supposed to believe that eating meat from an animal who has been given all these injections won't hurt the human population?! Probably a good idea to do as our Jewish brethren do and avoid pork in all its forms. No more bacon!

Dr. Peter McCullough tells you to do the very same thing in his latest Substack article, [Novel Vaccine Technologies in Veterinary Medicine: A Herald to Human Medicine Vaccines](#).

So, baby back ribs and bacon are gone, and cattle are next.

Depending upon state laws demanding all ranchers and farmers jab their cattle, including their milk cows, which will eliminate butter, milk, buttermilk, cheese, cottage cheese,

steaks, prime rib, chuck roasts, hamburgers, and my favorite, ice cream, etc., beef will also become verboten.

From an AP News article, [No, farmers aren't required to vaccinate livestock with mRNA vaccines](#), "There is no requirement or mandate that producers vaccinate their livestock for any disease," U.S. Department of Agriculture spokesperson Marissa Perry said in an email. "It is a personal and business decision left up to the producer and will remain that way."

Jason Menke, a National Pork Board spokesperson, said in a statement that the "decision to use vaccines and other medical treatments to protect animal health and well-being are made by the farmer under the direction of the herd veterinarian."

For now, vaccinating cattle is optional, but how many states will enforce a law demanding all cattle and pork be vaccinated for the "public health."

But hey, we still have chicken! Whoops! We don't! [Over 151,700,000 Killed Birds: Massive Culling Of Chicken Livestock Under Guise Of Avian Flu Mitigation](#). A massive fire at an [egg farm in Wright County, Minnesota](#), burned down a barn housing tens of thousands of chickens. This means tens of thousands of panicked hens remained trapped in tiny cages as they were engulfed by flames. In total, around [200,000 lives](#) were lost. Yet according to a farm spokesperson, "no one was injured."

Hundreds of thousands of [birds have been burned alive](#) throughout the country, including the largest egg producing company in Connecticut with 100,000 chickens dead. Egg prices are at an all-time high.

According to an [article](#) by The Guardian published Dec 2022: The World Organization of Animal Health says 140 million birds killed across the world in just one year, including 48 million birds killed in Europe and 53 million in the United States.

The CDC put out a November 3rd, 2022 [press release](#) on the destruction of the American food supply:

“Since early 2022, more than 49 million birds in 46 states have either died as a result of bird flu virus infection or have been culled (killed) due to exposure to infected birds.”

Think you're safe if you're a vegetarian? Think again! [WLTreport.com](#) tells us our vegetables may soon contain the mRNA in our salads. The University of California states, *The project's goals, made possible by a \$500,000 grant from the National Science Foundation, are threefold: showing that DNA containing the mRNA vaccines can be successfully delivered into the part of plant cells where it will replicate, demonstrating the plants can produce enough mRNA to rival a traditional shot, and finally, determining the right dosage.*

[Eat your vaccines, I mean vegetables!](#)

Please realize that mRNA is messing with genome. The genome is the entire set of DNA instructions found in a cell. In humans, the genome consists of 23 pairs of chromosomes located in the cell's nucleus, as well as a small chromosome in the cell's mitochondria. A genome contains all the information needed for an individual to develop and function.

Poisoned Soil, Water and Air

What about fish? Well, the Ohio River has been turned off for Cincinnati drinking water since the E. Palestine train derailment. The fish in E. Palestine were all dead. The poisoned soil from that train derailment has been dumped in Indiana and a truck carrying that soil to other parts of Ohio recently overturned. Rain will wash that poison everywhere. And a huge [barge with tons of toxic methanol recently sunk](#), again polluting the Ohio River.

Half of the U.S. [investigators fell ill while studying the E. Palestine disaster](#). Local and state authorities previously

evacuated all residents within one mile of the February 3rd derailment and started a controlled burn of substances on the railcars. Governor Mike DeWine authorized the Norfolk Southern burn. Those poisons could have been drained from the cars and carried away, saving the air, water and soil and most of all, the residents, their farm animals and pets.

But that's not all. One need only look at the massive problems with our oceans. Brazil's plan to [sink a 34,000-ton ship](#) would be an environmental disaster; toxics include, asbestos and hundreds of metric tons of other toxic substances in its electrical wiring, paints, and fuel stores.

Photo credit: [Ishara S. Kodikara](#)/AFP via Getty Images

[Newsweek reported](#) a ship off the coast of Sri Lanka containing 25 tons of toxic chemicals caused significant damage to the planet.

A Nazi shipwreck is [leaking toxic chemicals into the sea](#). The many planes shot down and ships sunk during WWII, Korean War, Vietnam, and the continuing wars against terror have polluted our oceans worldwide. Is it any wonder we see beached whales? I'm not saying that's the cause, but it certainly isn't from the globalist tax-and-control efforts of those claiming "climate change."

Hundreds in Richmond, Indiana were [forced from their homes](#) when a plastics company continued to burn and toxic plumes of black smoke filled the air.

Credit: @EvanAKilgus/Twitter

In Brunswick, Georgia, a massive [fire at a resin plant required evacuation of local residents.](#)

According to a new report, 2022 was the worst year for publicly reported fires at waste and recycling facilities in the U.S. and Canada,

The Midwest is farm country, and the soil, water and air is being polluted. Ask the folks of E. Palestine as well as those around them how safe they feel when no one in the government is doing anything to ameliorate the tragedy allowed by their Governor, Mike DeWine.

There is something you can do to fight this. So do it!

[Big Ag Panicking Over Bill to Require Labeling of Gene-Altering Products](#)

Conclusion

“Wherever the carcass is, there shall come the vultures ... out of the mountain fastnesses, the rocky crags, the vultures of the sky come down to this glittering rottenness in order to devour it. These winged creatures are a kind of avenger and a punisher. They are a judgment upon death and corruption. Just as soon as corruption sets in, these winged monsters appear shrieking and croaking and winging their way to death itself... Whenever a civilization begins to die morally or spiritually, then there begin to appear vultures. That is the mission of Communism in the world. Communism is the scavenger of a decaying civilization.” Archbishop Fulton J. Sheen

Yes, our battle is against communism/fascism; two feathers of the same bird. It is demonic. We battle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places. And we've surely seen plenty of that wickedness.

Those of us who belong to the Creator, who worship the One True Lord, know His will is life, not death. In Proverbs 1:33, He tells us, "But whoso hearkeneth unto me shall dwell safely, and shall be quiet from fear of evil."

The day will come wherein the evil ones will be exposed. The masks they've cloaked themselves with, will be torn away.

"Vengeance is mine," sayeth the Lord.
