

The “Why” Of Racism In America

This week, former NFL quarterback Colin Kaepernick received his “Muhammed Ali Legacy Award” from singer Beyonce’ at the annual banquet. Beyonce’s fame stems from her Superbowl “Black Power” songs that criticized White Americans for being racists.

Kaepernick spoke about the inequality facing Blacks in America. In the last bastion of racial equality in America, on the sports field, he created a national division of Whites and Blacks by kneeling against the National Anthem and America’s Stars and Stripes.

He blames White Americans for African-Americans’ struggles in a racist society. However, he never mentioned that American taxpayers spent in excess of \$3 trillion in the past 50 years since Lyndon Baines Johnson created “The Great Society” welfare system. Very little of that money changed Black Americans’ behavior or conditions in the inner-city projects, jobs, 70 percent children from out of wedlock births, millions on food stamps and Section 8 Housing.

How does White racism figure into this national tragedy? Are Whites at fault for Black men fathering 7 out of 10 children out of wedlock? Are whites guilty that as high as 78 percent Black students drop out of high school? Are Whites guilty of not providing jobs for illiterate Black kids who drop out of high school?

Unfortunately, the call for endless diversity and multiculturalism by America’s elites creates conflict, confusion and bewilderment. Americans stand guilty as to racism, xenophobia, Islamophobia and nativism.

Racism In Choices and Nature

But after centuries of mixing different ethnic groups, diversity becomes a pariah and misnomer. Every night on local news stations, racial unrest dominates most big cities.

African-Americans struggle with racism in America because they remain a minority ethnic group. Where they dominate in Africa, other races struggle to survive racism. Racism in Mexico remains a steadfast component to keep people of color at the lowest economic echelons. Japan features strong racism, so much so, it does not allow immigration into that country.

In reality, from my worldwide travels, I discovered 'racism' stems from biological differences. It stems from tribal dissimilarities. Every race, when in power, practices racism against subordinate ethnic groups. Racism plays out in the animal world everywhere on this planet.

At best, humans must come to respect one another when they cannot understand each other. They must honor each other's lives while they choose to remain in their own tribes.

Multiculturalism Creates Racism in All Countries

Sweden, once the most peaceful and vibrant country in the world, today, struggles with rapes, crime, car bombings, failing schools, parallel societies, conflicting religions and a fragmenting society.

What changed? Sweden along with the rest of Europe began immigrating Moslems from the Middle East and Africa. They imported Indians from the Sub-Continent. They introduced aberrant cultures and religions into their midst as a grand social experiment by intellectuals bent on proving that ethnic groups and cultures might live in happy celebration of their cultures within an alien culture.

One Moslem imam boasted: "Sweden will become Europe's first Moslem caliphate."

France faces similar consequences to its endless immigration.

French writer Giulio Meo said, "In 2017, the French authorities are sending compensation to more than 2,500 victims of the jihadist attacks in Paris and Saint-Denis, who will be compensated with 64 million euros. Important victories were also attained by anti-terrorism forces. According to an enquiry by the weekly L'Express, in the last two years, 32 terrorist attacks were foiled, 625 firearms were seized, 4,457 people suspected of having jihadist links were searched, and 752 individuals were placed under house arrest. But the general impression is that of a country "failing from within".

"After two French girls were murdered by an Islamist in Marseille last month, the social commentator wrote that France is experiencing a process of national and civilizational decomposition that authorities have decided to accompany and moderate, without claiming to fight and overthrow it, as if it were unavoidable."

Fact: every culture strives for dominance. When it finds itself in large enough numbers, any culture competes with any adjoining culture. Today, Moslems contend for dominance in every city their numbers grow in Europe. Moslems struggle for dominance in Australia, Canada and America. Today, Chinese immigrants in Vancouver, Canada control that city via their majority numbers. The Canadian Chinese ran native Canadians out of that city with money, businesses, hiring, housing and numbers. Vancouver no longer remains a Canadian city.

Multiculturalism decomposes any country where it takes a foothold. It starts small, such as a city like Lewiston, Maine; Minneapolis, Minnesota; Fremont, California and Dearbornistan, Michigan. Take a look at Spanish Miami, San Diego and Los Angeles. Look at Chicago, Illinois.

All of them decompose into mini-third world countries: poverty, failing schools, illiteracy, welfare, crime, drugs

and loss of the rule of law.

I spoke about the “Perfect Storm Gathering Over America” at a political club last fall. If you want to be shocked into what’s coming, this 42-minute video needs to be seen all over America. Why? Because your children face this future with an added 100 million immigrants within 30 years.

“Perfect Storm Gathering Over America” by Frosty Wooldridge

With every 1.1 million added immigrants added to the USA annually and another 100 million by 2045, our culture cannot nor will it survive the onslaught of multiculturalism. It’s that simple. We either stop immigration or we become the victims of it.

[“Islam Is Not a Nice Religion”](#) by Anne Marie Waters: This 8-minute video profoundly exposes Islam’s intentions and actions:

View this video to see uselessness of endless immigration. It solves nothing, but in fact exacerbates population growth:

In a five-minute astoundingly simple yet brilliant video, [“Immigration, Poverty, and Gum Balls”](#), Roy Beck, director of www.numbersusa.ORG, graphically illustrates the impact of overpopulation. Take five minutes to see for yourself:

As you can see from the video, no amount of immigration will solve the starvation, misery, suffering or hopelessness of people around the world. Why? Because they keep adding 80 million, net gain, annually.

But on a sociological level, America, Europe, Canada and Australia find their countries becoming “Everybody Else’s Countries.” Whether it’s the impact of cultural conflict, religious conflict or linguistic chaos – first world countries will not survive the “Clash of Civilizations.”

As stated, all cultures and ethnic groups compete for dominance. With 100,000,000 added immigrants from 196 different countries by 2050, the USA finds those millions pulling for their own culture, ethos, language and religions. America today, already fractures and fragments in the big cities with Black Panthers and Black Lives Matter calling for a separate Black Country. With the advent of more terrorist Muslims, you will see them demanding Islamic caliphates in the USA much like Europe.

Our country faces ultimately pulling apart at the seams. It will not be able to hold in the center as "Americans." Kaepernick and Beyonce' work to make that happen.
