

Therapeutic Nihilism by the Lords of Healthcare, Part 1

By Kelleigh Nelson

March 14, 2023

Those who profess to favor freedom and yet depreciate agitation, are men who want crops without plowing up the ground. They want rain without thunder and lightning. They want the ocean without the awful roar of its many waters. This struggle may be a moral one or it may be a physical one; or it may be both moral and physical; but it must be a struggle. Power concedes nothing without a demand. It never did and it never will. –Frederick Douglass

History fails to record a single precedent in which nations subject to moral decay have not passed into political and economic decline. There has been either a spiritual awakening to overcome the moral lapse or a progressive deterioration leading to ultimate national disaster. –Douglas MacArthur

The most dangerous man to any government is the man who is able to think things out for himself without regard to the prevailing superstitions and taboos. Almost inevitably he comes to the conclusion that the government he lives under is dishonest, insane and intolerable. –H. L. Mencken

The greatest perpetrator of misinformation during the pandemic has been the United States government. –Dr. Marty Makary

I believe the entire hospital protocols were purposely murderous. Remember, five governors put C-19 patients in

nursing homes and killed off hundreds of thousands of elderly Medicare/Medicaid and Social Security residents. Governors [Newsom](#) (D-CA), [Whitmer](#) (D-MI), [Cuomo](#) (D-NY), [Wolf](#) (D-PA), and [Murphy](#) (D-NJ) all stated that hospitals were running out of room, but what were their real motives?

Those hundreds of thousands of deaths helped to plant fear, and the oldsters needlessly died alone and without their loved ones.

The public was poisoned against repurposed cheap drugs that prevented and/or cured the virus called COVID. Taking Hydroxychloroquine early in treatment for C-19 kept the virus from gaining a deadly foothold. When C-19 had progressed, Ivermectin twice a day according to weight gave quick recovery to most of those without extensive comorbidities. Adding Azithromycin and prednisone, an antibiotic and anti-inflammatory, helped to quell the cough and respiratory problems in short order.

In Argentina, Dr. Hector Carvalho's prevention trials, with many of the repurposed-drug early treatments and prophylactic treatments, showed a **100% prevention of acquisition of Sars-coV-2** on patients who were on prophylactic ivermectin. The molecule in ivermectin doesn't just treat parasites, it has **22 mechanisms of action against Sars-coV-2, has seven or eight anti-viral mechanisms and it has multiple immune modification mechanisms**. In Dr. Carvalho's study, two months of healthcare workers taking one ivermectin a week, zero contracted COVID. In the placebo control group of 400 people, 57% contracted COVID. This is how effective ivermectin was in prevention in a hospital setting. You cannot make the same claim for these "vaccines."

Those inexpensive repurposed drugs would have saved a majority of the lives lost. Instead of allowing physicians the ability to save their patients by trying various treatments that would attack the symptoms the government, i.e., unelected

councils...NIH, CDC, FDA, AMA, Medical Journals and mainstream media, claimed the 50- and 60-year-old drugs of IVM and HCQ were dangerous.

Why?

Because money was to be made, and massive reports of death created fear. And fear created compliance and compliance was necessary to create the goal of a cure via inoculations.

The incompetent, devious and nihilistic Lords of Healthcare laughed all the way to the bank while Americans died.

Fear porn had won.

Murder for Gain

Allowing inexpensive treatments to restore health would not fill Big Pharma's pockets. All of the **unelected entities** were slobbering over the filthy lucre flowing into their pockets. The deaths didn't matter, money was to be made. Mass murder via government protocols was collateral damage that fueled depopulation advocates' goals and saved government funding of the elderly who were quickly dispatched. Hospitals loved the federal payouts for C-19 deaths. Why wouldn't they? [The government allocated \\$175 billion for hospitals and other providers](#) in April of 2020.

Control won...first we donned the masks, then we locked down for months, closed our businesses, declared bankruptcy and when we got sick, most physicians would do nothing for us until we couldn't breathe and then we entered the hospital to die. Most who tested positive for C-19 ended up on a ventilator...and 80% of them died. The C-19 tests were faulty, never should have been used and resulted in excessive positive results.

Ultimately, the majority of Americans willingly signed up for untested experimental injections available through Emergency Use Authorization and given "free" by the government.

If anything goes awry, Big Pharma has total immunity from legal liability under the Public Readiness and Emergency Preparedness Act (PREP Act). The controversial Act was signed into law by George W. Bush in December of 2005. It provides immunity for the “manufacture, testing, development, distribution, administration, and use of covered countermeasures.” Health and Human Services Secretary Alex Azar declared COVID-19 an emergency and invoked the PREP Act on February 4, 2020.

On March 27, 2020, Congress quickly enacted legislation through the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) which provided over \$2 trillion in funds to address the economic impacts of the pandemic. Brookings reported unheard of [massive waste, fraud and corruption](#).

Federal funds were disbursed to hospitals to help them cope with the C-19 emergency. The feds paid hospitals a fee for giving a C-19 test, another fee for admittance of the patient to hospital, plus the full daily Medicare with 20% added onto the hospitalization rate, no matter the insurance status. Admission nets the hospital \$13K, but when they ventilate a patient, it soared to \$39K.

Medicare even announced it would pay 20% more as an add-on if hospitals used the new FDA-approved drugs for C-19! In other words, hospitals can rake in even more if they give three treatments of remdesivir at \$3100. per treatment. Kidney or liver failure didn't matter to the hospital administrators...more money in their pockets. WHO recommended against using remdesivir, but Gilead raked in over \$7 billion on the sale of their drug which cost them about \$10.00 per dose to manufacture.

Early HCQ or IVM treatment for COVID would have jeopardized all the hospital payments.

As Minnesota State Senator, Scott Jensen M.D. told us in

countless interviews, hospitals were incentivized to code admissions as having COVID-19 even when they didn't have positive tests! I know of too many elderly family members who, upon autopsy, were found to have bacterial pneumonia or flu, which could have been treated and saved their lives. Oh, that every C-19 diagnosed patient who died been autopsied. And now with the poisonous injections, we even need more autopsies to document the effects of the jabs.

The CARES Act also provided immunity for guess who...healthcare workers treating C-19 patients. State governors added more immunity via executive orders.

Check out the state-by-state [National Survey of COVID-19 Medical Malpractice Immunity Legislation \(As of November 18, 2020\)](#).

States like New York covered civil liability for injury or death alleged to have been sustained directly as a result of an act or omission by person/persons covered.

Persons included in coverage were physicians, physicians assistants; specialist assistants; nurse practitioners; licensed registered professional nurses; licensed practical nurses.

The only conduct not covered was gross negligence.

But wait a minute...isn't "gross negligence" exactly what we saw with the promotion of these one-size-fits-all hospital protocols and the untested, unstudied, untrialed Big Pharma medications?

Remdesivir Kills

Remdesivir, sold under the brand name Veklury, is a broad-spectrum antiviral medication developed by the biopharmaceutical company Gilead Sciences. It was a pre-existing drug candidate developed by Gilead Sciences as part

of an antiviral development effort, with initial results against Ebola virus (EBOV) reported in **2015**.

Dr. Anthony Fauci claimed Gilead's remdesivir would aid in COVID recovery. The National Institute of Allergies and Infectious Diseases, (NIAID) headed by Fauci, asserted remdesivir studies proved it effective against COVID-19.

It actually can damage your kidneys and liver. Despite the lack of positive studies, the [FDA approved Remdesivir](#) with another Emergency Use Authorization (EUA).

Remdesivir didn't work. Results were terribly negative.

In late August 2020, a [disproportionately high number](#) of reports of liver and kidney problems in patients receiving remdesivir were reported compared with patients receiving other drugs for COVID-19. The European Medicines Agency (EMA) also announced that its safety committee had [started a review to assess reports of acute kidney injuries](#) in some patients taking remdesivir.

Patients who knew that remdesivir was not a reliable or safe drug, were told they could instead receive Veklury, which is remdesivir. One has to wonder; how many were fooled into being given the drug.

The oral C-19 medication, Paxlovid, wasn't much better. Paxlovid **didn't significantly reduce the risk of hospitalization or death in people.**

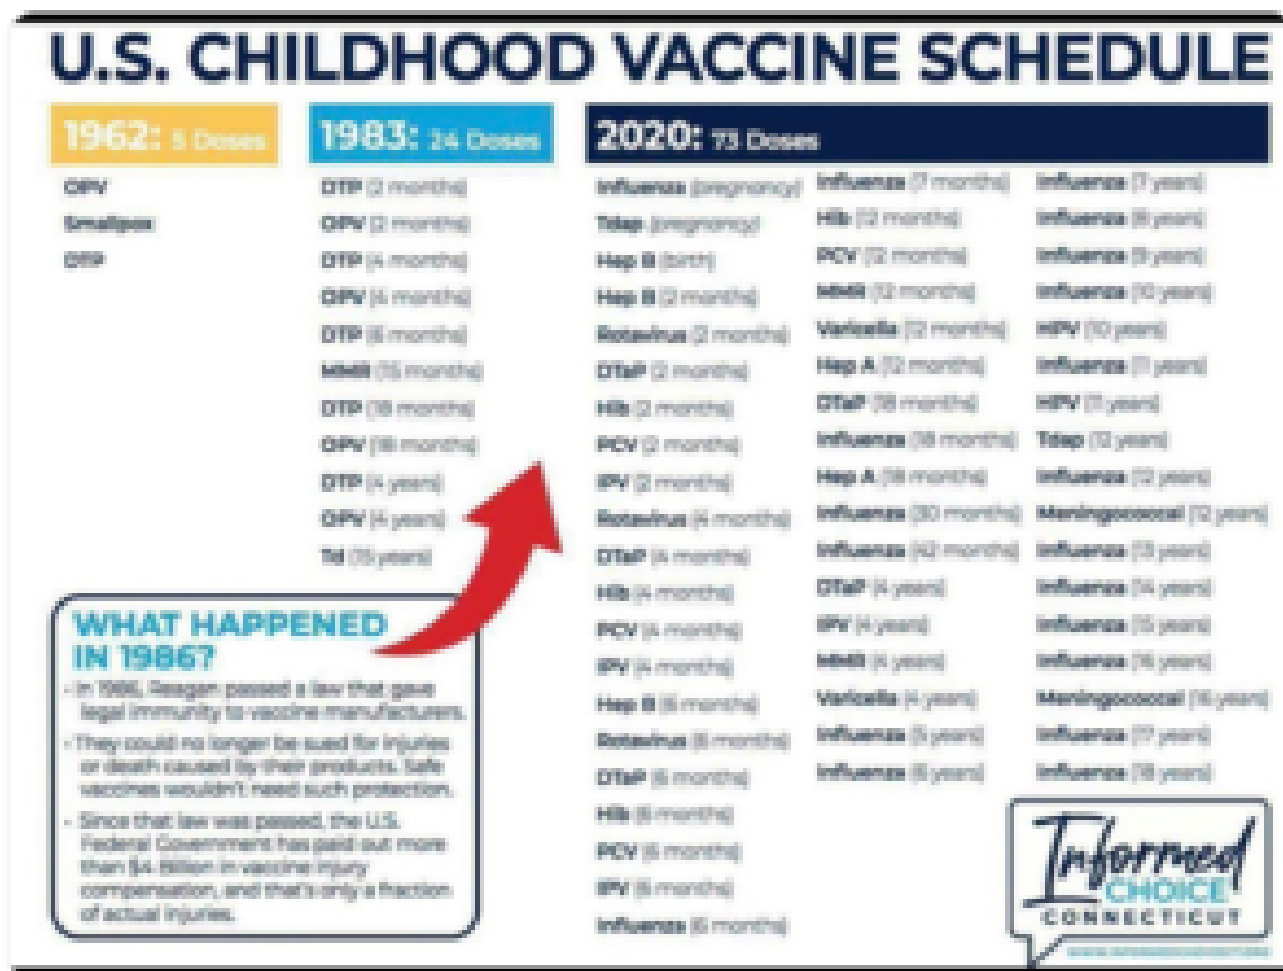

And that's not all! What about Operation Warp Speed Death Jabs?

Jabs, Jabs and More Jabs

You can't tell me that pharmacists, physicians and nurses didn't know that vaccines were supposed to be tested for years and that you never vax during a pandemic. And what about if you'd had and recovered from C-19? Why would you need a jab

if you have natural immunity? Common medical knowledge was thrown to the wind...and the media hawked the jabs day and night...even offering incentives. Now this evil poison is to be given to our children before they enter the perverted government schools. Children don't even get COVID, so why?

rific number of injections our children must now submit to?

The documents of Pfizer and Moderna, those they wanted to keep hidden for 75 years, tell the story of betrayal. The infertility, the miscarriages, the heart damage, the blood clots, the cancers, the evil destruction of healthy young bodies and the sudden deaths, all caused by one, two or five injections of the Big Pharma poison to depopulate.

Zoetis is a subsidiary of [Pfizer and has quietly injected 100 million animals](#) with the horrific mRNA technology. Livestock has also started to receive mRNA injections.

Why?

Worse yet, Bill & Melinda Gates Foundation just announced a \$4.7 million grant for a company that [sells face masks for cows to stop their methane belches](#). This is the most insane thing yet.

It isn't evil enough that they're forcing these injections on our babies when they enter school. Messenger RNA and abusive and abrasive contraptions on cattle for a fabricated non-existent problem.

Mass murder of man and animals.

If ever truth fully comes to light and the American people wake up, those culpable will stand trial.

"I was just following orders" won't hold any more water today than it did in 1945-1946.

Those who have needlessly lost loved ones want to see justice today.

The gallows await them.

"Vengeance is mine," sayeth the Lord.

Ivermectin Saves

How many people were able to secret Ivermectin (IVM) into sick family or friends in hospital with Sars-coV-2? I know of several, especially where the hospitals still allowed family to visit. When this life saving drug was given, the recovery

was rapid. Within a couple days, the patient was feeling so much better and within a few more days was released to go home.

The resistance by hospitals for Ivermectin was incredibly difficult, even when an attorney had taken the case to court and the judge had instructed the hospital to give IVM. The court battles were unconscionably difficult with IVM witnesses being called quacks. Dying men and women were fighting for the last chance to save their lives and many were denied their "right to try" a cheap, FDA and WHO approved drug as their last and only hope since nothing but remdesivir was being offered. Hospitals retained "godlike power" over the patients, telling them they could not choose their own care. As John Leake explains in his and Dr. Peter McCullough's book, [The Courage to Face Covid-19](#), "for most gravely ill patients and their families, this power resulted in death."

The patient's families would state in writing they would indemnify the hospitals of liability for any adverse effects of IVM and that their primary care physicians would administer the drug. In many cases, if the court told the hospital to give the drug, one pill would be given, the patient would improve, but then the hospital would refuse to give additional medication.

Dr. Pierre Kory had testified before the Senate and showed the studies proving IVM was a valid treatment for Sars-coV-2. Yet, the resistance was phenomenal. After one dose, attorneys would need to return to court to order the hospital to give more than one dose of IVM. Families would beg and plead with the hospitals to no avail. Many had to fight to have the family doctor administer IVM or to be able to take the patient home. The hospitals demanded the patient's physician come to the hospital to administer the drug.

Many had to find ways to smuggle IVM in to patients before they were put on vents, and those who were successful had a

100% recovery rate.

Every medical facility had bought into the government lies by the unelected councils, which used to be called Soviet, but now are pure American. Those unelected county health departments decided masks, lockdowns, closures, mandates etc.

Conclusion

Dr. Vernon Coleman, who refers to himself as “the old man in a chair,” has been telling us the hard facts regarding the destruction of our medical industry.

He states, “The goal of healing has been replaced by the goal of perpetual treating. The ugliest part of this new business model is that, to keep overhead cost as low as possible, when severely handicapped and older people become ill, hospital staffs increasingly are discreetly prescribing kill shots for them, much like what might be given to an old dog or cat to end their misery. This is not a conspiracy theory, not hyperbole, and not even unusual. It is now a recognized policy in every country in which the medical system has been captured by the pharmaceutical cartel – which is most of them.”

In Part Two, we’ll discuss America’s modern-day eugenics, revived again from the 1920s and expanded to parallel Hitler’s murder of the physically and mentally unfit.
