

# Trump Did NOT Participate in Jeffrey Epstein's Child Sex Ring+Suicide

Jeffrey Epstein was a self made billionaire. Not from being a clever stock trader, expert investor. or economic genius, mind you. He made his fortune on very weak men in the clutches of sexual lusts for little girls, that could not be controlled or contained. With this savage, totally uncontrolled behavior, man has sinned beyond all limits and God has stated in His Word, specifically Matthew 18:6, "But whoever shall offend (harm) one of these little ones it were better for him that a millstone were hanged about his neck, and that he were drowned in the depth of the sea." The fate of all these men will be horrifying. That also goes for those other than Christians. One will never escape severe punishment for this sin against God and any harm against His children.

Bill Clinton who never saw an empty dress he didn't like, has a strange track record with both

documented sexual assaults and vanishing acts of former associates who are later found dead. Clinton stated that he only began socializing with Epstein in 2002. Since this is 2019, that means they have been socializing for 17 years. One can get to know someone pretty well in 17 years, but Clinton pontificates that it was only a short time. He said he only

took about four flights on the Lolita Express. That is four too many. Why did he take those? Those planes picked up men from all over the world to dispatch them to this kiddy sex nest. But Clinton said that this is no big deal. Sure. But this is what made pervert Jeffrey Epstein a billionaire. There is a lot of money in sex trafficking.

"Lolita Express," flew men from all over the world to his sex nest. Just four flights? Even four flights on that plane, to that location, is too many. Yet Clinton said 'it's no big deal. A check of flight plans shows that Bill Clinton, who once occupied the White House with a blue stained dress on the premises, made 26 flights to the kiddy rendezvous. And it is noticeable that five of those flights were made without secret service men accompanying him for which strings were pulled to get him that freedom. Most of these things occurred while Clinton was in the Oval office in the mid 1990s.

Epstein kept a book of all his "clients." There was a long list of sexual maniacs who were hooked on pedophilia. The guilty names on that list were kept fairly quiet. However, the demoncrats chose to spotlight one as a customer who was not.. But let us state clearly that PRESIDENT DONALD TRUMP WAS NEVER IN THAT CIRCLE, even though the democrats are trying to make it appear as though he was. That is a LIE!.

As a matter of public records, Trump was purportedly the only one to help a prosecuting attorney representing one of Epstein's victims. So the demoncrats again, lied, in a statement about President Donald Trump.

Did Jeffrey Epstein REALLY Commit Suicide??

This columnist does NOT believe he did. For years I worked in the field as a chaplain and dealt with many suicide cases. Many called me before committing the act. It is good to report that there was 100% success rate in suicide prevention. Too often ( it is regrettable to say), the call came after the

suicide had taken place. One thing that stands out. There was never one case where someone committing suicide screamed as they did it. They just wanted to get out of life which had become too painful to handle. Again, not once did any suicidal person scream as they checked out of this world. Screaming was heard coming from Epstein's cell along with rustling of objects in that cell. So we think the answer is obvious.

So there is your case. Nobody on that list wanted to be exposed. It could have been any number of people who did it, and since those who booked Epstein's services feared being named, and were all billionaires, they could have bought their way into the prison to commit the deed or have it committed. And frankly had he gone to trial, that would have taken years, mass publicity, while victims of the child rape would not have seen any semblance of justice. His death prevented this all from happening. This columnist is not saying that this was a good thing....However.....
