

Trump is Obeying Only Parts of the Constitution, Guaranteeing Armageddon and Dystopia!

Andrew Wallace

April 5, 2025

It is impossible to return to a Constitutional government with prosperity if you don't adhere to the Constitution, ALL OF IT. Income Taxes also make a Constitutional Government impossible.

I support President Trump; he has stopped our rapid decline into Communism and gross economic decline. But it is only a brief respite unless he follows the whole Constitution ... which he has not indicated that he would. Armageddon is the last battle (World War Three) between good and evil in a Dystopian setting.

President Trump has the knowledge, courage and mass backing of the people (and God) more so than any president in 100 years. It's now...or maybe never.

Our Founding Fathers gave us a Constitutional Republic containing specific enumerated operating instructions and restrictions in our Constitution. However, our Government has ignored key provisions of the Constitution such that we can't and don't function as a Constitutional Republic, with the inherent benefits and protections for the People.

The greedy Parasitic Super-Rich Ruling Class (PSRRC) consist

of the wealthy families controlling and directing large corporations who in turn direct and bribe the whores in government (Congress, Bureaucrats and many Judges).

I say again, it is impossible to return from the brink of Economic and Social collapse unless you follow the Constitution, ALL OF IT, and expunge the unlawful changes. There are too many unconstitutional functions to list in this short article, so I will note only the most detrimental.

The complete takeover of our government accelerated after the Coup of 1913 when we unconstitutionally introduced the Income Tax to replace Tariffs, the Privately-Owned Federal Reserve Bank, and Tax-Free Foundations.

Tariffs/Excise taxes until 1913 funded the government since its founding, protected workers and industries, but were inadequate to fund wars for profit of the PSRRC. (None of the wars in the last 80 years were Constitutional or for national security).

The privately-owned Federal Reserve Bank caused inflation, deflation, financed wars for profit and financed all kinds of corruption. They couldn't print gold (constitutional money), so they printed Fiat Dollars, causing all kinds of havoc.

1. Trump's first move must be to terminate the Privately-Owned Federal Reserve Bank, Tax-Free Foundations, return to Gold Currency (Constitutional Money), and Terminate the Income Tax and finance government with Tariffs.

2. President Trump must then terminate all Foreign Aid (unconstitutional). We can't afford it and it does nothing but bribe governments, with kickbacks to our bureaucrats and officials and the Military Industrial Complex of the PSRRC.

3. Terminate all unconstitutional payments to states (they are all unconstitutional). This will force the Communists and illegal Invaders to work for their money. The Constitution

specifies that all payments to invaders are both unconstitutional and Treasonous. The Federal reserve Bank must be terminated, Tax- Free Foundations must be terminated,

4. It has been reported that we have 250,000 of our military in 150 countries. These troops are like canaries in a coal mine; they are expendable for no good purpose. We can't afford this; we need the troops on our soil to defend us from the millions of invaders brought in by the Democrats. Except to combat piracy, our troops belong on United States soil because we can't be invaded. We can only be defeated in Nuclear War or by internal forces.

There is a real danger that if President Trump does not comply with the total Constitution that we could rapidly descend into a severe Economic decline. This would lead to civil war between workers and able-bodied Communists (welfare recipients) who produce nothing of value. This highlights another reason that income taxes are impossible. Without Income Taxes, every state pays its own way and Communism in the cities is dead. Communism always fails when it runs out of other people's money. (Worker taxes given to able-bodied non-workers.)

To summarize in a few words,

1. Tariffs must replace Income Taxes.
2. The Federal Establishment must stop performing state functions.
3. All military must return to our soil.
4. All federal payments to states must stop.
5. Return to gold and silver money.
6. Terminate all foreign aid.
7. Deport all illegal Invaders as fast as possible before we

end up like Europe.

8. Terminate all payments and services to Illegal Invaders; it is Constitutional Treason.

9. Stop all wars without a Congressional Declaration of War.

10. Prosecute those in Congress who vote for unconstitutional laws.

As is my wont, I have only covered the most important subjects to increase readership and understanding. You will note that I refer to the Federal Establishment because it is not a Sovereign Government, as are the states. Please share this article with your politicians and friends.

God Bless You and the Republic
