

Trump will win if he does these 4 things

The election battle of the ages is upon America and the stakes are very high. The results of this election will affect our very safety and national security at its core. It will dictate whether we have a healthy economy and real jobs and whether taxes take over our lives and sky rocket. It will spell out if Christians will have protection and freedom of speech or be rewritten and destroyed.

Trump must win and he will if he does the following

1- Trump must continue to focus his passion, emotion and vision on what he will do for America, and how he will bring us back and protect us. His focus and speeches on Immigration, the military, jobs, moral and Christian heritage of America are spot on and they do the following: Separate the men from the boys, the sell outs from the committed, the heroes from the traitors, the sincere Christians from the posers and Trump and his 'deplorables' from Hillary and her confused, America and God hating hordes

2- Trump must continue to be a man of God – pray to the Lord and seek HIS wisdom, strength, direction and power. He must surround himself with real and high integrity Christians, not wanna be's who pose and quote scripture to gain an audience or political power. Trump is doing this already and has power in his faith in the Lord, people he is surrounding himself with and a historically American and Christian combination of – compassion, freedom and moral underpinning.

3- Be a man of courage and strength regardless of what he may face in this election with Hillary and afterward when he is President. In the Holy Bible, God told Joshua to be a man of courage and strength and take on the evil giants in the land

using unheard of strategy and ideas. Joshua obeyed and did the absurd and marched around the walls of Jericho 7 times, making lots of noise, playing horns and lighting lanterns – boom, the walls came tumbling down.

4- Trump must keep his vision and ideas for America cutting edge, fresh and real. Trump knows we must fix our endlessly broken immigration nightmare – our military must be honored and built back – jobs must be created and made – energy must be harnessed – our Constitution and Judeo – Christian values must be cherished. Trump knows our broken and forced health care system must be overhauled, Common Core must be stopped and Americans must be treated fairly and protected again.

Trump is doing the 4 things above and is running for President out of concern and love for his country, not an obsession to find more money and power like Hillary. Trump already has fame, money and power....boring already. Vote this election like your very life, freedoms and country depends on it no matter who you are.
