

# Trump's Lethal "Operation Warp Speed" Jabs

By Kelleigh Nelson

December 28, 2021

*Unless we put medical freedom into the Constitution the time will come when medicine will organize itself into an undercover dictatorship. To restrict the art of healing to doctors and deny equal privileges to others will constitute the Bastille of medical science. All such laws are un-American and despotic.* –Dr. Benjamin Rush

*Freedom of choice must be brought to bear upon the US Medical practice.* –Congressman Phil Crane

*One of the first duties of the physician is to educate the masses not to take medicine.* –William Osler (1849-1919)  
*Described as the Father of Modern Medicine*

*They do not cover the new variants; patients are failing on these vaccines. They're being hospitalized and getting sick despite having had the vaccines. The vaccines at this point in time have amounted to record mortality and injury and should be considered unsafe and unfit for human use.* –Dr. Peter A. McCullough

Dr. Stephen Hahn, the mild-mannered former chief medical executive of the MD Anderson Cancer Center, became the commissioner of the Food and Drug Administration shortly after the coronavirus broke out in China.

He quickly found himself in an uncomfortable position. The

White House wanted an emergency approval of one of the vaccines being developed to treat COVID-19. Under a massive and secretive government effort, "Operation Warp Speed," was one of the most consequential public health decisions in American history. The FDA's scientific determinations, as to whether a vaccine is safe and effective enough to give to millions of healthy Americans, are dicey enough. But Hahn, like so many top federal health officials, seemed to have found himself in a tightening vice.

President Trump, his chief of staff, **Mark Meadows**, and his son-in-law and special adviser, **Jared Kushner**, all called Dr. Hahn directly, urging him to accelerate emergency authorization of vaccines and treatments, i.e., Remdesivir.

If Hahn didn't cave and accelerate the approval, potentially jeopardizing safety, the decision could be taken from the FDA and rammed through by Trump's Health and Human Services Secretary, [Alex Azar](#), the former President of Eli Lilly USA.

Hahn also knew that if he stood up to Trump, he would be fired. He was willing to be dismissed rather than serve as a presidential puppet.

On December 10, 2020, Dr. Hahn testified during a Senate "Senate Health, Education, Labor and Pensions Committee Hearing" on the federal government response to COVID-19. White House Chief of Staff, Mark Meadows had pressed Hahn to grant emergency use authorization (EUA) for Pfizer's coronavirus vaccine by the end of the day on December 11, 2020.

## **Biopharmaceutical History**

The history of all four pharmaceutical companies involved in creating the COVID-19 jab is certainly not pretty. [America's Medical Mafia: Biopharmaceutical Companies](#), written in May of this year, exposed the past of these companies and the many lawsuits against them. Because the COVID vax is an EUA, it is

protected from lawsuits by the federal government via the [PREP Act](#) signed into law by President George W. Bush.

The US Government has a secret history of grisly experiments on animals and humans, and these COVID jabs are no different; [Americans are human lab rats](#).

In 2010, I wrote a ten-part article entitled, [American Citizens as Guinea Pigs](#). Part two [included](#) the detrimental polio vaccine tainted with Simian Virus-40 which causes soft tissue cancers and is genetically passed. It was never pulled from the market.

CHOOSING YOUR COVID-19 VACCINE FACTS YOU NEED TO KNOW	
	<b>Pfizer:</b> \$4.7 billion in fines for false claims, drug and medical equipment safety violations, off-label promotion, corrupt practices, kickbacks, and bribery.
	<b>Moderna:</b> Has never brought a vaccine to market since its founding, despite fielding 9+ vaccine candidates, none of which made it through phase 3 clinical trials.
	<b>Johnson &amp; Johnson:</b> Named in hundreds of thousands of lawsuits for toxic and/or dangerous products, including drugs, shampoos, medical equipment, and asbestos-contaminated baby powder.
	<b>AstraZeneca:</b> Suspended by two dozen European countries due to severe, lethal adverse reactions, like blood clots.

**Don't worry, you're in safe hands!**  
If you're vaccinated, remember to wear a mask and socially distance because you can still spread COVID-19. Trust The Science™

Here is a [partial list](#) of the many failed drugs taken off market after dangerous side effects or deaths. This does not include the [1976 swine flu vaccine](#) pulled after 25 to 50 deaths.

### Trump Promotes Vax/Boosters

If you've had the CCP virus, you have [lifetime immunity as evidenced in 140 studies](#). You do not need the Sars-coV-2 jabs, or any of the boosters. Dr. Peter McCullough states, "Once and done." There is no need to worry about getting the virus again.

Dr. McCullough [writes](#) that there are risks for those who have recovered from the CCP virus who then receive the Sars-voV-2 jabs. Medical research concludes that the COVID-19 jabs are dangerous for those who have already had the virus and have recovered with inferred robust, complete, and durable immunity. A medical study of United Kingdom healthcare workers who had already had COVID-19 and then received the vaccine

found that they suffered higher rates of side effects than the average population.

So why has former President Trump taken both jabs and now the booster when he obviously recovered from the virus while he was still the 45<sup>th</sup> president? Or did he take them? Did he get the placebo instead? Doesn't he have physicians who will tell him the truth? Doesn't he do any research? Doesn't he read? Why wasn't he and his family put on Hydroxychloroquine or Ivermectin to keep them from ever contracting the virus? Where was Dr. Scott Atlas with this important information, or did Trump rebuff him? There are simply too many unanswered questions and too many statements by Trump that are untrue.

Trump tell us we're playing right into their hands when we doubt the vaccine. Whose hands? He made the remarks during a [live event](#) with former Fox News pundit Bill O'Reilly. "We did something historic, we saved tens of millions of lives worldwide," said Trump, before going on to credit the vaccine for preventing a repeat of the Spanish flu, which infected nearly a third of the world and killed as many as 100 million people. The reality is the carnage from the lethal injections will make the 1917 flu pale in comparison.

The comparison is somewhat alarmist given that the Spanish flu had a 2.5% global mortality rate, which is substantially larger than Sars-coV-2's actual mortality rate when you discount the many PCR false positive tests. Many who had bacterial pneumonia and could have been saved with antibiotics were left to die because C-19 was diagnosed, and that's not even mentioning the worthless stakeholder/medical protocols used on C-19 hospital patients.

Despite Trump's glorification of the vax, he said it shouldn't be mandatory. Well, it isn't mandatory for federal politicians and stakeholders, and

the hundreds of thousands of illegal aliens crossing our southern border.

When interviewed by Candace Owens, our 45<sup>th</sup> president claimed no one had been hurt by these jabs, when that is just a flat out lie! Over 111 airline pilots are dead from the jab, over 75 sports figures have died on the fields, young men are getting myocarditis, which destroys their heart muscle with inflammation. Even Trump's buddy, Franklin Graham ended up with pericarditis. Graham told us we all should get the vax, that if Jesus were here, he'd get the vax. What absolute total rubbish!

Trump should take a look at the Vaccine Adverse Effects Reporting System (VAERS) [numbers out by Lifesite News from Dec. 14, 2020 to Dec. 10, 2021](#). Only one percent is reported, so multiply the numbers by 100 and you'll get the actual death and adverse effect figures since the clot shot came out.

To top it off, Trump echoes the commie Pravda media and [tells Candace](#) that 90% of the people in hospitals are unvaccinated, when exactly the opposite is true. Those in hospital sick with Sars-coV-2 are jabbed with one or all of the clot shots including the booster, but if you've had the jabs within the last two weeks, hospitals count you as unvaxed. And many get sick or die within the first two weeks after the inoculation. Trump is spewing information from CNN, MSNBC, Fauci and the snakeholders.

There has never been a vaccine for a virus! We know this is not a real vaccine! Why would Trump promote such a thing? Is it pride? That's the only thing that makes sense. He keeps lauding the fact that he and he alone created "Operation Warp Speed" and saved the country from COVID...a virus 99.8% recover from. We all know, "Pride goeth before the fall."

## **COVID Jabs are Shielded**

Take note that the federal government shields Pfizer/Moderna/J&J from liability and has given them billions of dollars and is forcing Americans to take their product. But they won't let you see the data supporting its safety/efficacy. Just who does the government work for?

The FDA has [asked](#) a federal judge to make the public wait until the year 2076 to disclose all of the data and information it relied upon to license Pfizer's COVID-19 vaccine. That is not a typo. It wants 55 years to produce this information to the public. It's been 58 years since John F. Kennedy was assassinated and even Donald J. Trump did not release the truth to the public.

As explained in this [article](#), the FDA repeatedly promised "[full transparency](#)" with regard to Covid-19 vaccines, including reaffirming "[the FDA's commitment to transparency](#)" when licensing Pfizer's COVID-19 vaccine.

More than 30 academics, professors, and scientists from this country's most prestigious universities requested the data and information submitted to the FDA by Pfizer to license its COVID-19 vaccine.

The FDA's response? It produced nothing. In September, Attorney Aaron Siri's firm filed a [lawsuit](#) against the FDA on behalf of this group to demand this information. To date, almost three months after it licensed Pfizer's vaccine, the FDA still had not released a single page; finally it released under 100 pages which you can read [here](#).

## Support for Trump

I know in my heart the 2020 election was rigged, that Donald J. Trump won the election, hands down. Our 45<sup>th</sup> president did many wonderful things for this country, and we had a four-year Nineveh. (If you don't know the story, read the book of Jonah in the Old Testament; it comes right after Obadiah, and right before Micah and is important history.)

My 2016 support for Donald Trump never wavered. I wrote article after article supporting him, two of which he actually used in rallies and the first one helped him to [get rid of Jeb Bush](#). The second article he used at a rally in Alabama explaining why the media is allowed to lie about public figures. Why Alabama? Because that's where these legal suits started and then ended with the Supreme Court decision in [NYTs v. Sullivan](#).

The mere fact that it took President Trump four years to realize just exactly who and what his Vice President really was, and who and what his Senior Counselor, Kellyanne Conway was...tells me the man has little discernment as to those who are really on his side. Pence sent Trump to controlled-opposition Heritage Foundation and Conway sent him to the Federalist Society, both of whom steered Trump to Supreme Court nominees who, we now know, are anything but conservative. Conway and Pence have been friends for years and have family who are intermarried. They worked together.

Pence was given challenge after challenge by Trump, and failed at every one of them, including being in charge of the Coronavirus Task Force. He gave us Fauci, Birx and Redfield and they destroyed our economy and Trump...just as their handlers planned. Read Pence's history... [\[Link\]](#), [\[Link\]](#), [\[Link\]](#), [\[Link\]](#).

On January 6<sup>th</sup>, 2021, Pence stabbed Trump in the back and the Republic in the heart. Finally, after four years, Trump saw

the real face of his Vice President...one who had no problem elbow bumping with Pelosi.

Throughout Trump's administration, he never chose people outside the Deep State. He hired from the swamp over and over and over again. He took Chris Christie's suggestion and hired Christopher Wray as FBI Director. Then he listened to Attorneys Joe diGenova and Victoria Toensing and hired [Deep Stater Bill Barr](#) as Attorney General.

Only once did he hire outside the swamp when he appointed Lt. General Michael T. Flynn as National Security Advisor. General Flynn was his finest choice and was terminated within weeks by the deceit and duplicity of the FBI and their backdoor into Pence's office. Pence's Chief of Staff was Josh Pitcock whose wife worked for Peter Strzok and Lisa Page allegedly checking Hillary Clinton's emails.

Trump listened to Deep Stater Pence rather than the General who had decades of intel knowledge. He needed General Flynn, but he ended up with Deep Staters in that very important position over and over again. Far too many people saw his choices as guided by those from the swamp and completely incompatible with Trump, which they proved to be. A prime example is that Christopher Wray is still head of the FBI and Trump should have pulled his nomination during Wray's Senate hearings.

## **Conclusion**

Around the world hundreds of thousands have died, not from Sars-coV-2, but from the messenger RNA vaccines, millions have suffered permanent disabilities and adverse effects. The buck ultimately stops with Trump. He chose to put Pence in charge of the Coronavirus Task Force, and Pence brought in the  Deep State stakeholders. The NIH, FDA, CDC or AMA never approved any early home treatment and banned long approved safe and cheap drugs that would have cured.

People were told there was nothing to be done, go home...and when it got worse, they went to the hospital, were put on oxygen and then ventilators, and 80% of them died. The ultimate goal was the huge moneymaker for Big Pharma...the "vaccines." Dr. McCullough tells us that 86% of the people who died of the virus could have been saved, but obviously that was not the goal of the snake holders.

Excuses for Trump can be made, yet the buck stops with him. He was our Commander in Chief. There is no question that the guilt of negligence is Trump's, but the guilt of homicide belongs to Big Pharma. They were the ones that knew what they were doing. Trump's negligence was not blowing the whistle on them and firing Fauci and the heads of these fraudulent government entities. You can make the case of malicious contempt in the action of Fauci and the officials of Big Pharma, all of whom need to do time at the very least. Trump keeps pushing the lethal vax, why? Is it pride alone? Is it stupidity? Or is it that he is not what he represented himself to be?

Would I ever support Trump again? Only if he is man enough to admit that he made a mistake and provide leadership that results in correction. Repentance is the foundation of our Judeo-Christian faith.
