

TX Gov. Abbott Doesn't Want to Stop Chemical Castration & Mutilation of Children

By: Devvy

I've lived in W. Texas since June 2006, having escaped the wasteland of my home state, California. Texas has a reputation for being tough: Don't Mess With Texas. But, too many conservatives in this state believe just because Republicans continue to hold the majority in both chambers in Austin at the state capitol, the Democrat Communist Party USA and their sick, dangerous ideologies won't advance.

They would be wrong and they are wrong to believe Greg Abbott is a great governor. Back in 2011 when the fight against those dangerous "smart" meters was in full swing after I filed the first salvo to the Public Utility Commission, Abbott had \$24 million bux in his war chest from energy corporations. We didn't stand a chance. We got droppings known as opt-out.

When the panic button was hit last year over COVID-19, Abbott caved like a pup tent during a hurricane. Despite Texans like me in his face to not lockdown this state, he did it anyway to "protect the lives of 29 million Texans". What he did was destroy our economy. 10,000 bars and restaurants will never re-open. Millions of Texans lost everything. Their businesses, their homes, cars repossessed, arrests for defying the lockdown order, severely damaging their children by closing schools, suicides, depression and the list goes on.

[H.B. 1399](#) is a bill stalled in our legislature which goes out of session in a couple of weeks and doesn't come back until Jan. 2023. The bill will stop chemical castration and mutilating confused children who believe they should be the opposite sex. The term used is transgender. Tragically, the "trans" movement out there has destroyed the lives of thousands of children and young adults.

[Regret Isn't Rare: The Dangerous Lie of Sex Change Surgery's Success](#) – "Transgender advocates have worked to create a false narrative, hoodwinking the world into believing that no one ever has regrets from a surgical change of gender. They say the transgender ideology they promote is harmless, safe, even beneficial. But what happens when we dismiss the rhetoric, look at the research, and apply basic critical thinking? We see the reports of success fade and those of regret rise."

[30 Transgender Regretters Come Out Of The Closet](#) – 'Trans Life Survivors' is a godsend for people struggling with trans regret, no matter what stage of transition or de-transition they are in."

Pay attention Gov. Abbott, Speaker Phelan and Rep. Burrows: [The transgender suicide epidemic: is accepting their confusion really the answer?](#) – "Over 41 percent of active 'transgender' people try to kill themselves. That's ten times the average 4.6 percent suicide attempt rate." You wanted to save lives over COVID, governor, but how about children being brain washed that mutilating their body is a great thing...until they kill themselves, end up on drugs for depression or become addicted to booze and illegal drugs? Don't you want to save them or is all that filthy lucre you get from corporate interests more important?

"Sex reassignment" does not turn a female into a male and visa versa. Much hay was made when Bruce Jenner announced he is running for governor of California. Darling of the "trans" world, Bruce slapped on some lipstick, women's clothes and

pronounced he was a she.

In 2017, Bruce went on 20/20 to confirm he went under the knife. Said in the interview, "The reality star clarified that even though she opted to undergo the surgery and decided to write about it in her new memoir, she "wasn't less a woman the day before I had the surgery than the day after the surgery, because that did not define who I am as a human being." Rather, she said, what makes a woman a woman is "what's between your ears."

No, Bruce, it's what was between your legs and your DNA which is and always will be male. Cutting off your manhood, having a couple bags of silicon sewn into your chest and wearing women's clothing will never make you a woman. I'm sorry he decided to mutilate his body but of course, at the time he was old enough to make that decision.

Back in 2018, there was a big court battle here in Texas: [Texas Mother To Force Healthy 6-Yr-Old Son To Undergo Chemical Castration.](#)

"A Texas father is fighting for his beloved 6-year-old son who is currently being forced to undergo a sex change by his cruel mother. Court documents show that James (whom the mother refers to as "Luna") only identifies as a girl when he's with his mother. According to the disturbing documents, the mother wants her son to undergo a chemical castration after his eighth birthday.

"The father has reportedly been legally prohibited from talking to his son about gender and sexuality from both scientific and religious perspectives, and from seeking to dress his son in boys' clothes. Instead, he is required to offer both girls' and boys' clothing, although he claims that his son consistently refuses to wear dresses. And according to a report by The Federalist, the mother "is also seeking to require him to pay for the child's visits to a transgender-

affirming therapist and transgender medical alterations, which may include hormonal sterilization starting at age eight.”

“The father has also obtained eyewitness accounts from family friends and a religious leader, all of whom testified that they’ve never seen the young boy attempt to identify as a girl.

“Based on the three occasions I’ve spent time with him, I’d say he acts and looks unmistakably like a healthy six-year-old boy,” wrote Bill Lovell, senior pastor of Christ Church Carrollton. “...I am praying for James, an average six-year-old boy, a sweet-natured, intelligent, lovable and at this point particularly vulnerable young man, caught up in a titanic clash of worldviews.”

“Family friend Sarah Scott, whose sons regularly play with James and his fraternal twin brother and who reportedly wants to be sensitive to James’ wishes when it comes to gender, also offered her perspective.

“His mother came to pick up the boys to take them to [his brother’s] soccer game,” remembered Scott. “[He] hugged his dad and said, ‘Love you.’ He refused to go to the soccer game as a girl with mom and stayed with dad. That evening they came to our house.”

“Walt Heyer, who authored the report at *The Federalist*, is himself a man who formerly identified as a transgender woman. Heyer writes and speaks regularly about his own experiences, and about the dangers of promoting transgender ideology to children.

“The diagnosis is critical,” Heyer wrote in *The Federalist*, “because labeling a child with gender dysphoria can trigger a series of physical and mental consequences for the child and has legal ramifications in the ongoing custody case.”

“Get it wrong,” Heyer continued, and the boy’s “life is

irrevocably harmed.”

“Heyer believes that James’ “precious young life hinges purely on the diagnosis of gender dysphoria by a therapist who wraps herself in rainbow colors, affirms the diagnosis of gender dysphoria, and dismisses evidence to the contrary.”

In 2019, a jury ruled in favor of the mother to allow that little boy’s life be destroyed to fulfill *her* sick ideology. Shame on them. James’ father was devastated. The jury ignored the father’s deeply held religious beliefs and treated him as he were nothing more than a sperm donor.

Here in Texas, one would think with a Republican controlled House, Senate and governor that bill would sail through committee, brought to a vote and Abbott would sign it. Well, that line of thinking continues to be eroded by politics and filthy lucre and not just on this issue.

[Texas Republicans conspired to kill bill protecting kids from sex reassignment, insiders say](#), May 12 2021 – GOP House members used a stall tactic to avoid voting on legislation that Gov. Greg Abbott reportedly opposed.

“*National File* added that its sources say Republican Gov. Greg Abbott opposes the bill and wants to avoid having to be seen vetoing it, as were Republican Govs. Kristi Noem of South Dakota and Asa Hutchinson of Arkansas. Abbott has endorsed a conservative bill on a different transgender issue, protecting women’s sports programs, but the entire subject faces intense pressure from both media and **corporate interests**.

“We assume that (Calendars Committee chair and state Rep. Dustin) Barrows was given this important position in order to protect the priorities of Governor Abbott and the current Speaker (Dade Phelan),” said former U.S. House candidate Chris Ekstrom. “He’s their hatchet man, he’s there to snuff conservative bills. Abbott’s woke corporate cronies have decreed that we can’t be Texas anymore, and no one’s taken

more money from them than Greg Abbott, no one in the country, not even Joe Biden."

This session we were finally rid of the former Speaker of the House, RINO Joe Strauss, only to be replaced with another party hack, Dade Phelan.

What needs to get done nationwide. Is chemical castration and mutilation of children legal in your state? If so, every conservative organization headed up by your GOP State Chairman/woman must get a bill into your legislature. It might be too late this year as many go out of session soon and don't return until Jan. 2022, but now is the time to get it started.

In most states bills for the new session have to be in the hopper by Thanksgiving. Churches throughout your state should also form coalitions to get a bill into the system and then put the heat on your legislature come January of next year.

Here in Texas (or if you know someone who lives in this state or do business with them), get the word out to start hammering on Phelan and Abbott to get that bill passed and signed into law *before the end of this legislative session*. Contact churches in your city and town and get them on board now as time is an issue.

Phelan's office number in Austin: (512) 463-1100. And, call his district office: (409) 745-2777. Gov. Abbott's phone number at the capitol: (512) 463-2000

The good news is we finally have a solid challenger to hopefully beat Abbott in the primary next year. If you live in Texas, please get the word out. **We don't need or want Abbott for another four years; his money bag 'woke' corporations won't be getting my money.** Abbott is bought and paid for and the sooner conservatives in this state understand that, the better chance we have of seeing him defeated in the primary.

As for Huffines losing his seat to a Democrat in 2018, don't believe it for a second. Vote fraud was rampant in 2018 and not just at the federal level. Like Trump, Huffines is very wealthy in his own right.

[Republican Former State Sen. Don Huffines Launches Primary Challenge To Gov. Greg Abbott](#), May 10, 2021

Here's my May 3rd letter to Rep. Dustin Burrows *and* the authors of the bill:

Rep. Dustin Burrows

CF: Rep. Matt Krause, Rep. Tom Oliverson, Rep. Cole Hefner, Rep. Tan Parker

Dear Rep. Dustin Burrows:

It's my understanding you are the one holding up passing H.B. 1399 to keep children from being mutilated. So-called transgenders are mentally ill. Any parent who subjects their minor child to hormone treatment and surgery in an effort to change their biological sex is guilty of child abuse in the extreme.

Despite the psychobabble from Democrats, politicians and imbeciles like the immoral Hollywood crowd, there are only two sexes, male and female. You are born with the DNA of one or the other and no amount of surgery can change science.

Have you done any research about how many kids/teens and adults who fell for the propaganda are sorry they ever underwent such surgery? Perhaps you should because the numbers are a lot bigger than you know.

'I wish I could go back': Girl voices heart-wrenching trans testimony, April 28, 2021

"A victim of contemporary society's transgender agenda – which promotes the concept that individuals can change from boy to

girl, or girl to boy – has posted online a heart-wrenching testimony. Against the socially and politically correct movement.

“Today is 5 years since my double mastectomy. I didn’t think it would hit me this hard but it’s really tough to deal with. My scars are so large and I want to crawl out of my skin,” she wrote. **The transgender girl is outraged at a system that encouraged her to make these decisions and lied to her so she would adopt the depraved lifestyle of delusion.**

“I can’t believe I was allowed as a child to have this procedure. No one could have prepared me for the reality of it. I was promised sunshine and rainbows. Happiness. All my sadness and gender dysphoria would go away. Of course a kid who was miserable would take that immediately,” she wrote.

“She will live the rest of her days in regret after being enabled by a wicked society that puts Sodom and Gomorrah to shame. “I don’t even feel as if I fit into any gender anymore. My dysphoria is worse than I could have imagined, the fever dream that is transition blinded me. I’m so tired. I wish I could go back to being a little girl and tell myself no, this is the wrong path,” the transgender girl wrote.

“The rant can be seen here: Many such cases pic.twitter.com/kQ52yKI0g – Gar? J?man (@Gee2TheAitch) [April 25, 2021](#)

“Big League Politics [has reported](#) on the movement of ex-transgender individuals who are attempting to detransition and urging young people not to adopt this lifestyle: “A movement is building of [hundreds of transgender individuals who desperately want to return to their birth sex](#) after realizing they made a grave mistake with their transition, Sky News has reported.

“The movement is starting in Britain, where a charity called The Detransition Advocacy Network is being set up to help

people return to their birth sex. They intend to provide support to detransitioners against pressure from the rabid LGBT community that is actively recruiting to their dangerous lifestyle.”

Endocrinologist: Study on Puberty Blockers in Teens ‘Confirms Massive Decrease in Bone Density’, Dec. 17, 2020: “California endocrinologist Dr. Michael Laidlaw observed on Twitter this week that a 2020 preprint of a study on puberty blockers administered to 12-15-year-old gender-dysphoric youth confirmed a “massive decrease in bone density of patients relative to their peers.”

Detransitioners Open up About How Transgender ‘Medicine’ Left Them Scarred for Life, March 12, 2021: “I experienced transition regret. I had injected testosterone for four and a half years, I underwent a double mastectomy, only to very gradually realize over time that I had made a massive mistake and wanted to detransition,” Sinead Watson, one of the organizers of the Twitter campaign #DetransAwarenessDay, said in a YouTube video.”

Satan’s Pimps, LGBT advocates, care nothing about what their sick agenda does to young, impressionable kids and young adults. Transgenders are mentally ill and should be treated with compassion. We can stop more of them from ruining their lives.

I urge you to get this bill passed so it can, hopefully, be signed into law this session.

Cordially, Devvy Kidd

I included the information below with my letter.

Princeton Prof: Transgenderism Not Scientific, ‘Superstitious Belief’, May 16, 2016 – Robert P. George, the McCormick Professor of Jurisprudence at Princeton

“A noted Princeton University professor has attacked the very notion of transgenderism, saying that the belief “that a woman can be trapped inside a man’s body” is ludicrous and superstitious, with no basis in medical fact.

“George’s concerns over the transgender movement echo the recent [statement](#) by the American College of Pediatricians, which argued forcefully against encouraging young people to question their own biological sexuality.

“A person’s belief that he or she is something they are not is, at best, a sign of confused thinking,” the doctors stated. “When an otherwise healthy biological boy believes he is a girl, or an otherwise healthy biological girl believes she is a boy, an objective psychological problem exists that lies in the mind not the body, and it should be treated as such.”

Johns Hopkins Psychiatrist: Transgender is ‘Mental Disorder;’ Sex Change ‘Biologically Impossible’, Nov. 26, 2020

“Dr. Paul R. McHugh, the former psychiatrist-in-chief for Johns Hopkins Hospital and its current Distinguished Service Professor of Psychiatry, said that transgenderism is a “mental disorder” that merits treatment, that sex change is “biologically impossible,” and that people who promote sexual reassignment surgery are collaborating with and promoting a mental disorder.

“Dr. McHugh, the author of six books and at least 125 peer-reviewed medical articles, made his remarks in a recent commentary in the Wall Street Journal, where he explained that transgender surgery is not the solution for people who suffer a “disorder of ‘assumption’” – the notion that their maleness or femaleness is different than what nature assigned to them biologically.

“He also reported on a new study showing that the suicide rate among transgendered people who had reassignment surgery is 20 times higher than the suicide rate among non-transgender

people. Dr. McHugh further noted studies from Vanderbilt University and London's Postman Clinic of children who had expressed transgender feelings but for whom, over time, 70%-80% "spontaneously lost those feelings."

American College of Pediatricians: Gender Ideology Harms Children

"No one is born with a gender. Everyone is born with a biological sex. Gender (an awareness and sense of oneself as male or female) is a sociological and psychological concept; not an objective biological one. No one is born with an awareness of themselves as male or female; this awareness develops over time and, like all developmental processes, may be derailed by a child's subjective perceptions, relationships, and adverse experiences from infancy forward. People who identify as "feeling like the opposite sex" or "somewhere in between" do not comprise a third sex. They remain biological men or biological women. 2,3,4

"A person's belief that he or she is something they are not is, at best, a sign of confused thinking. When an otherwise healthy biological boy believes he is a girl, or an otherwise healthy biological girl believes she is a boy, an objective psychological problem exists that lies in the mind not the body, and it should be treated as such. These children suffer from gender dysphoria. Gender dysphoria (GD), formerly listed as Gender Identity Disorder (GID), is a recognized mental disorder in the most recent edition of the Diagnostic and Statistical Manual of the American Psychiatric Association (DSM-V).⁵ The psychodynamic and social learning theories of GD/GID have never been disproved. 2,4,5"

Updated, Sept. 2017:

The American College of Pediatricians urges healthcare professionals, educators and legislators to reject all policies that condition children to accept as normal a life of

chemical and surgical impersonation of the opposite sex. Facts – not ideology – determine reality. 1. Human sexuality is an objective biological binary trait: “XY” and “XX” are genetic markers of male and female, respectively – not genetic markers of a disorder. The norm for human design is to be conceived either male or female.

Human sexuality is binary by design with the obvious purpose being the reproduction and flourishing of our species. This principle is self-evident. The exceedingly rare disorders of sex development (DSDs), including but not limited to testicular feminization and congenital adrenal hyperplasia, are all medically identifiable deviations from the sexual binary norm, and are rightly recognized as disorders of human design. Individuals with DSDs (also referred to as “intersex”) do not constitute a third sex.¹²

No one is born with a gender. Everyone is born with a biological sex. Gender (an awareness and sense of oneself as male or female) is a sociological and psychological concept; not an objective biological one. No one is born with an awareness of themselves as male or female; this awareness develops over time and, like all developmental processes, may be derailed by a child’s subjective perceptions, relationships, and adverse experiences from infancy forward.

People who identify as “feeling like the opposite sex” or “somewhere in between” do not comprise a third sex. They remain biological men or biological women.^{2,3,43} A person’s belief that he or she is something they are not is, at best, a sign of confused thinking. When an otherwise healthy biological boy believes he is a girl, or an otherwise healthy biological girl believes she is a boy, an objective psychological problem exists that lies in the mind not the body, and it should be treated as such. These children suffer from gender dysphoria.

Gender dysphoria (GD), formerly listed as Gender Identity

Disorder (GID), is a recognized mental disorder in the most recent edition of the Diagnostic and Statistical Manual of the American Psychiatric Association (DSM-5).⁵ The psychodynamic and social learning theories of GD/GID have never been disproved.^{2,4,54} Puberty is not a disease and puberty-blocking hormones can be dangerous. Reversible or not, puberty- blocking hormones induce a state of disease – the absence of puberty – and inhibit growth and fertility in a previously biologically healthy child.⁶⁵

According to the DSM-5, as many as 98% of gender confused boys and 88% of gender confused girls eventually accept their biological sex after naturally passing through puberty.⁵⁶ Pre-pubertal children diagnosed with gender dysphoria may be given puberty blockers as young as eleven, and will require cross-sex hormones in later adolescence to continue impersonating the opposite sex. These children will never be able to conceive any genetically related children even via artificial reproductive technology. In addition, cross-sex hormones (testosterone and estrogen) are associated with dangerous health risks including but not limited to cardiac disease, high blood pressure, blood clots, stroke, diabetes, and cancer.^{7,8,9,10,117}.

Rates of suicide are nearly twenty times greater among adults who use cross-sex hormones and undergo sex reassignment surgery, even in Sweden which is among the most LGBTQ – affirming countries.¹² What compassionate and reasonable person would condemn young children to this fate knowing that after puberty as many as 88% of girls and 98% of boys will eventually accept reality and achieve a state of mental and physical health? 8.

Conditioning children into believing a lifetime of chemical and surgical impersonation of the opposite sex is normal and healthful is child abuse. Endorsing gender discordance as normal via public education and legal policies will confuse children and parents, leading more children to present to

“gender clinics” where they will be given puberty-blocking drugs.

This, in turn, virtually ensures they will “choose” a lifetime of carcinogenic and otherwise toxic cross-sex hormones, and likely consider unnecessary surgical mutilation of their healthy body parts as young adults.
