

UFO Second-Hand Hearing: Another Distraction?

By: Devvy

July 31, 2023

Do UFO's really exist? Well, I can tell you I know a few people who absolutely believe with every ounce of their being UFO's and extra-terrestrials do exist. The proof is in the sky and crash sites! The government's been covering up such a phenomenon so as to not create panic. It's also a national security issue – alien “beings” attacking earth.

I've been to Roswell, NM; made a relax time stop during one of my many road trips. Visited the Roswell UFO Museum and Research Center out of curiosity as I am, by nature, a curious person. Really nice people, true believers. I learned nothing new at the museum nor did it change my mind.

After my late husband retired from the military in 1991, we moved from Colorado Springs, CO (He was DEH at Ft. Carson; 06 Colonel) to Lakewood, CO., a suburb of Denver. That whole region (including near Denver) is heavy military installations like the *amazing* Cheyenne Mountain; I was fortunate enough to go inside for one of my contracts when I worked at Peterson AFB Space Command NORAD. (Cheyenne Mountain *is* inside a huge mountain.)

One night while driving home from some event, in the sky there was an odd light formation. Six lights one side, six on the other, kind of like a cylindrical shape. It hovered for a few minutes and then slowly moved into space. Of course, the

nightly snooze and Denver [Com]Post all had a hey-day with a UFO sighting! Except me. You see, even back then I didn't believe there were spaceships, flying saucers and non-human aliens flying around the country. I thought it's something being tested by the Air Force. I've always thought if there's other life out there, we would know by now.

[NASA](#): "Our solar system is made up of a star—the Sun—eight planets, 146 moons, a bunch of comets, asteroids and space rocks, ice, and several dwarf planets, such as Pluto. The eight planets are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune... It takes the Earth one year to go around the Sun."

No life (human or non-human) on any planet except Earth has ever been detected. How many gazillion miles would an alien space craft have to travel to get to us in our solar system? Pluto is 4.7 BILLION miles from earth. If aliens are manning space ships traveling billions/trillions of miles – **how come they keep crashing once they get here?** Not a single verified landing, just crashes. The alleged crashes have been rural or desert areas, never near someplace like NYC, LA or New Orleans. Same in other countries.

Many UFO sighting stories all seem to have the same theme: Not long after the crash witnessed by Mr. Smith, **conveniently** along comes some government types who threaten them to keep quiet so vamoose. So many crash sites yielded nothing more than spy balloons, meteor debris and metals. Unless and until we get a fully intact space craft with or without alien beings, I'm not convinced.

The first "proof" of aliens and UFOs began in 1947. This is a short history piece: [Roswell Incident](#). By the early 1960's, UFO's, flying saucers and extraterrestrials became a new cottage industry – especially for Hollywood. Who can forget the loveable 1982 movie, E.T. the Extra-Terrestrial? All around the country kiddies were joyfully chanting, [ET Phone](#)

[Home!](#)

Over the decades there's been no provable remains of an extraterrestrial being – unless the government has one stored in Iron Mountain (PA). Over the decades it's been kind of a cat and mouse game the government has been playing with those who absolutely believe we've been 'visited' by aliens from outer space.

Dozens and dozens of testimonials from average every day sincere people who saw with their own eyes a flying saucer. Or, "I was taken by space aliens", but somehow still ended up at home. Or, like me and probably ten thousand people in the Denver area just happened to see those lights which obviously was not a commercial air plane. Over the decades, pilots, Air Force and private, have seen what can't be explained, *no question about that*. Pentagon double-speak responses only fanned the interest and claims of a cover-up.

There's been UFO or 'strange' sightings in the skies all over the planet since 1450 A.D. Lots of crashes by alleged space ships, however, no provable space craft or aliens ever recovered going back many decades from Greece to Russia and the U.S. Interesting but no proof of extra-terrestrial life.

The hearing last week [is available on C-SPAN in full](#): "During the first congressional hearing on UFO sightings in more than 50 years, Pentagon officials told lawmakers extraterrestrial life is not the cause of what the government calls "Unidentified Aerial Phenomena." During the hearing, three unclassified videos of UAPs were shown to members of the House Intelligence Subcommittee on Counterterrorism and Counterintelligence.

"Scott Bray, deputy director of naval intelligence, told lawmakers after a UFO sighting is reported, an investigation usually results in one of the following categorizations: airborne clutter, natural atmospheric phenomena, U.S.

government or U.S. industry developmental programs, foreign adversary systems, or unexplained sightings that merit further investigation. Pentagon officials said they conduct lengthy investigations on any report due to possible national security implications.”

One take-away from the hearing. [Non-Human Body Recovered From Crashed UFO](#) –“ While she understands that Grusch can’t answer some questions, Mace asks about the “bodies of the pilots” from the shattered ship. To that, Grusch responds that the UFO victims were not of a human body but of something from another planet.

“To further bolster his claims surrounding the UFO crash, Grusch says that the pilot’s body that was found at the site was biologically studied by specialists who still work for the program that he was attached to. Pushing for proof, the South Carolina Representative asks Grusch if there is any physical or eye-witness evidence that could back up his statements.

“To this, Grusch said that there was evidence but that he wasn’t allowed to release it and that it would be something to address another member of the team about.” Not allowed to release the evidence? Who won’t let him release the evidence? While Wikipedia cannot be trusted because of political and cultural bias, the posting on Grusch is quite balanced. I clicked on a lot of the links which proved to be accurate. [It is worth the time to read.](#)

Grusch has never seen a UFO space craft/ship or extra-terrestrial alien. Don’t get me wrong. I fully support whistleblowers who see something wrong or have uncovered government corruption that have evidence to back up allegations. What bothers me is second hand “someone told me” or “had knowledge of” without anything to back it up. Time will tell what comes of that hearing. I do have an open mind because truth matters.

I read a lot of books. Always striving for truth, I read a couple on UFOs that were unconvincing. One however, I've kept because it's well-written and backed up by sources a mile long. The Great UFO Hoax: The Final Solution to the UFO Mystery by Gregory M. Kanon published in 1997. 170 pages plus all the sources. For those interested, I **highly** recommend Kanon's book so you can make up your own mind. If someone wants to believe in UFOs and alien creatures, no problem.

Kanon is very thorough in his research listing known hoaxes, sightings and very interesting, verified facts in Chapter 2: **Ignore That Man Behind the Curtain**. "Ostensibly, the so-called Robertson Panel was set up to scientifically analyze recent reports of unidentified flying objects, but it soon became apparent that the CIA had a hidden agenda. The agency's real focus turned out to be not UFOs per se, but rather the effects of UFO reports upon the general public.

"The CIA focused on the potential of such reports for use in 'psychological warfare.'" The panel's final report emphasized the public's "current gullibility...and consequently their susceptibility to clever hostile propaganda."

Chapter 9: **Lights! Camera! UFO's!** Oh, boy. Remember the really good movie, [Wag the Dog](#)? "The movie starts with a scandal at the White House where the unseen and nameless President of the USA is accused of fondling a young girl scout visiting the Oval Office just a few weeks before Election Day. Being the third-party observers, we know the truth: he's guilty.

"Conrad Brean (Robert DeNiro), a notorious political "spin doctor" is called to a secret midnight meeting at the White House underground command bunker by Winifred Ames (Anne Heche), one of the President's many advisers, where she asks for his help to engineer a way and a means to divert the news of the scandal when it breaks in the newspapers the next day. Brean suggests creating an artificial war for television only

to distract the American public and let the President get on with the job at hand... thus protecting the free world.

“Brean and Ames fly to Hollywood where Conrad hires brash Hollywood producer Stanley Motss (Dustin Hoffman), whom worked for Conrad several times in the past, to help fabricate this non-existent war with the selected country of Albania to divert the public with the real news about the President’s extra-marital trysts. Motts is glad to help out of blind loyalty to service for his country.”

Wag the Dog was released in January 1998. Bill Clinton was impeached by the U.S. House on Dec. 19, 1998. [Wag the Dog: Bill Clinton Unleashed](#), Nov. 19, 2019: “The investigation into Clinton’s sexual affair with Lewinsky was getting worse by the day for the president. His emphatic denials were learned to be outright lies. It was learned he encouraged Lewinsky and others to lie. The final nail in Clinton’s coffin occurred when Lewinsky turned over to federal investigators her semen-stained blue dress. Testing proved the DNA belonged to Clinton. The president could no longer lie his way out of his difficulties.

“Desperate times call for desperate measures, and Clinton had his own wag-the-dog moment. On the same day Monica Lewinsky was to testify before the grand jury regarding Clinton’s attempts to suborn perjury, Clinton ordered strikes against the Al-Shifa pharmaceutical factory in Khartoum, Sudan. Clinton claimed the medicine plant was producing chemical weapons for Osama bin Laden and that there were financial ties between the plant and the Al-Qaeda leader. Neither Clinton claim was true.”

Do I believe the government – specifically scientists and military personnel – have been creating the UFO/UAP “phenomenon” using technology so far advanced very few over the decades had/have knowledge of? Yes, I do believe under DARPA (Defense Advanced Research Projects Agency) and other

'black' budget programs we have no idea what exists and maybe only a handful in Congress do. Just my speculating. I doubt an imbecile like Gen. Milley would be in the loop.

One of the reasons I'm convinced is Nikola Tesla, a true genius way ahead of the world. Over a decade ago I started reading about Tesla here and there. Curious me. [The Mystery of Nikola Tesla's Missing Files](#) – The FBI has finally declassified its files on Nikola Tesla, but questions remain. June 1, 2023 – “After Nikola Tesla was found dead in January 1943 in his hotel room in New York City, representatives of the U.S. government's Office of Alien Property seized many documents relating to the brilliant and prolific 86-year-old inventor's work.

“It was the height of World War II, and Tesla had claimed to have invented a powerful particle-beam weapon, known as the “Death Ray,” that could have proved invaluable in the ongoing conflict. So rather than risk Tesla's technology falling into the hands of America's enemies, the government swooped in and took possession of all the property and documents from his room at the New Yorker Hotel.

“What happened to Tesla's files from there, as well as what exactly was *in* those files, remains shrouded in mystery—and ripe for conspiracy theories. After years of fielding questions about possible cover-ups, the FBI finally declassified [some 250 pages of Tesla-related documents](#) under the Freedom of Information Act in 2016. The bureau followed up with two additional releases, the latest in March 2018.”

Very interesting article to say the least: “The scientist's name undoubtedly rings a bell, as John G. Trump was the uncle of the 45th U.S. president, Donald J. Trump. The younger brother of Trump's father, Fred, he helped design X-ray machines that greatly helped cancer patients and worked on radar research for the Allies during World War II...

“At the time, the FBI pointed to Dr. Trump’s report as evidence that Tesla’s vaunted “Death Ray” particle beam weapon didn’t exist, outside of rumors and speculation. But in fact, the U.S. government itself was split in its response to Tesla’s technology. Marc Seifer, author of the biography *Wizard: The Life & Times of Nikola Tesla*, says a group of military personnel at Wright Patterson Air Force Base in Dayton, Ohio, including Brigadier General L.C. Craigee, had a very different opinion of Tesla’s ideas.

“Craigee was the first person to ever fly a jet plane for the military, so he was like the John Glenn of the day,” Seifer says. “He said, ‘there’s something to this—the particle beam weapon is real.’ So you have two different groups, one group dismissing Tesla’s invention, and another group saying there’s really something to it.”

Is it possible Tesla’s inventions have something to do with UFO/UAPs? I absolutely believe so but that’s just my opinion. There are still many unanswered questions.

There were additional submissions before the hearing started worth reading; they are embedded in this article: [Russian UFO engagements, secret ‘Tic Tac’ report and 3 key figures slip under radar at Congressional hearing](#), July 29, 2023 – “The Times story claimed that Sen. Reid and two colleagues in the Senate (Daniel Inouye and Ted Stevens) had secured \$22 million in **black budget** funds to investigate UFOs.” Reid, Inouye and Stevens are all deceased.

As for George Knapp’s submission, he wrote, “An initial report was compiled by DIA personnel then shared with AAWSAP.” John Ratcliffe, who I believe is actually one of the good guys was Director of National Intelligence (DNI) under President Trump. He would know so let’s get him under oath.

As the whole world knows, career crook and liar, illegitimate president, Joe Biden, is in deep legal trouble stemming from

his drug addicted son's stupidity in leaving his computer at a repair shop and never coming back to pick it up. Not just the filthy porn, but Hunter's big mouth regarding his father, influence peddling and foreign business dealings.

The IRS whistleblower hearing on July 19, 2023, which I [covered in my last column](#), is just the tip of the iceberg. Rep. Comer and his people have done more in six months to ferret out the truth than the corrupted Federal Dept of InJustice – *by design*. Of course, the slime on “the left” have been frothing at the mouth trying to defend Uncle Joe. It's not going to work this time. Those GOP Republicans on the Oversight & Accountability Committee are out for blood (metaphorically speaking) and are not going to retreat.

Devon Archer is due to testify today. Archer is Hunter Biden's very long-time friend and business associate. Archer has been hiding out in an undisclosed location for safety reasons. Ya think? Allegedly, Archer's testimony is going to bury both Hunter and poppa Joe. I will be watching on C-SPAN. Or, maybe not: [BREAKING: Corrupt DOJ Requests Court to Order Devon Archer's Surrender for Imprisonment Prior to Testimony on Biden Crime Family](#) (VIDEO), July 30, 2023 – “In an unprecedented move, the Department of Justice (DOJ) has issued a letter to a federal judge in the Southern District of New York, suggesting that Devon Archer, a business associate of Hunter Biden, be ordered to surrender and begin his term of imprisonment.

“This development comes amidst Archer's ongoing appeal and just before his scheduled testimony about the criminal activities involving the Biden crime family.”

Time to Wag the Dog for Joe Biden. Bring on a much-ballyhooded committee hearing about UFOs. Saturation by the liars for hire in the “mainstream” media, boob tube, Internet. Conspiracy! Government cover-up! They're (extra-terrestrials) so far advanced from us! Whip up the scare

appetizer.

WH spokes mouths, Democrat professional liars on the IRS committee hearing and the Mockingbird media want Americans to focus on UFOs and bury any talk of impeaching Joe Biden. We'll see if a new 'crisis' hits (perhaps a medical emergency for Joe which would garner sympathy) after Archer's testimony – IF he's allowed to testify – to divert people away from impeachment talks if the UFO hearing fizzles out. Show your support by calling or emailing your Congress critter: Impeach Biden.
