

# Water and Weather Modification – Crisis

Authored by Devvy Kidd not AI

June 3, 2025

Each day brings more and more information and evidence of massive corruption and waste of OUR tax dollars while illegitimate career criminal, Joe Biden, occupied the White House. Of course, Americans *whose blind loyalty is not to a political party* have suspected – which I believe is true – Biden not only was already suffering from dementia in 2020, but by the 2024 election, he was and is in the first stages of Alzheimer's.

Oh, let's not forget lying by omission Biden has metastasized cancer and is on borrowed time. Yet, here he is out on speaking engagements when he should be completely retired and receiving care at his primary residence. Or, since the Biden crime family has hauled in so much dirty money, Miss Jill can put him in a swanky Alzheimer's facility. It's beyond pathetic and I consider pushing him out there in public for the world to see is elder abuse. No doubt in my mind Biden was never cognitively able (even though he and the shadow government cheated to beat Trump in 2020) to carry out the duties of a sitting president of these united States of America. [BOMBSHELL ALLEGATION: Joe Biden Was So Mentally Gone That He Got Lost in HIS OWN CLOSET at the White House](#), May 31, 2025

**The danger to our country is almost beyond words. Who doesn't**

believe illegitimate president, Hussein Obama and several WH big shots were running the WH? And the now exposed 'autopen' scheming – Biden wasn't even in the U.S. when many EO's were "signed by the president". As usual we'll have some congressional hearings which are (I am able to watch many on C-SPAN; they do archive them) a lot of BS and outright lying by members of the Democrat/Communist Party USA for more donations to get reelected. *It's truly obscene.* The one wrecking ball I do support (besides Rep. Andy Biggs) is James Comer [R-KY].

Let's see what Blondie Bondi does with evidence – while the guilty run out the clock; statute of limitations. **We the People are fed up with no accountability or punishment, i.e., Hildebeast Clinton and Benghazi.**

I've pretty much tuned out a lot of talk radio which seems to focus on polls for 2026 & 2028 and "politics" while we have extreme problems that are NOT getting fixed which directly affect YOU, your family or even if you're not married or a widow like me. **Top of the list because we can't live without it: WATER.**

Americans, I would speculate more than the majority, have no clue just how dire the situation is either due to apathy, stupidity or they simply will not take the time to get informed or involved. Yes, I do remember what it was like to work full time taking care of my only child with zero support from her father who skipped to Canada when she was 2 years-old to avoid paying \$75.00 a month in child support. I asked for nothing but struggled financially to keep her in private school. We all have obligations. We would like to pursue life, liberty and happiness but that isn't possible for people like me and maybe you. Our republic is worth saving.

[Illegal Aliens Stealing Our Jobs, Food, Housing, Water, Clogging the Courts & Health Care System](#), (Mine), June 20, 2022 – When the human invasion was fully underway.

**“Water is liquid gold in this country right now.** The majority of Americans have NO IDEA how bad it is unless you live in a state or area suffering drought conditions. Tens of millions of gallons of water needed by Americans (especially farmers and ranchers) are being used up daily by double-digit millions of illegals.”

The global warming aka climate change hustlers have sold the world their lies and deception. Oh, climate change is causing droughts, wildfires, blah, blah, blah. That is a bald-faced lie. Geo-engineering is a major culprit as well as dirty electricity which I covered during the push for those dangerous ‘smart’ meters forced upon unsuspecting Americans across the country.

We can also blame the “greenie” extremists. [Desalinization plants in California and Fukushima](#), March 2, **2014**. (Mine). (You can bet the 8 million number skyrocketed after 2020. **I visited the desalination plant in Carlsbad, California** so I could see how they operate; in short, it’s pretty amazing. That one plant pumps out 50 million gallons of water a day. Originally sixteen locations along the California coastline were approved; so far six are in operation.)

“It’s estimated there are approximately 8 million illegal aliens in the State of California. How much water do you think 8 million illegals use every day for baths, showers, cooking, cleaning, drinking, laundry, flushing toilets and other activities? In Sacramento, the average use per person is 279 gallons per day; SF bay Area about 98, Palm Springs desert area a whopping 736 gallons a day and the LA basin where millions of liars, cheats and thieves live is about 180 gallons per day per person; [see chart here](#).

“Now you’re talking **millions of gallons of water used every day by illegal aliens** in just one state who have no right to be in California much less suck down badly needed resources. The people in California who continue to vote for poltroons

like Jerry Brown and reelect the same lunatics back to their legislature have no one to blame but themselves. It's not just illegal aliens, it's also environmental zealots:

### [California Fights Two Droughts, One Of Them Man-Made](#)

"Californians have not built a major reservoir since the New Melones Dam more than 30 years ago. As the state subsequently added almost 20 million people, it assumed that it was exempt from creating any more "unnatural" Sierra lakes and canals to store precious water during California's rarer wet and snowy years.

"Short-sightedness soon became conceit. Green utopians went further and demanded that an ailing 3-inch bait fish in the San Francisco delta receive more fresh oxygenated water. In the last five years, they have successfully gone to court to force millions of acre-feet of contracted irrigation water to be diverted from farms to flow freely out to sea.

"Others had even grander ideas of having salmon again in their central rivers, as they recalled fishing stories of their ancestors from when the state population was a fifth of its present size and farming a fraction of its present acreage. So they too sued to divert even more water to the sea in hopes of having game fish swim from the Pacific Ocean up to arid Fresno County on their way to the supposedly ancestral Sierra spawning grounds. The wages of both nature's drought and human folly are coming due."

### [And:](#)

"While the rains have not come down in the amounts needed, pouring 800,000 acres feet of water into the ocean last year because of the delta smelt is downright dumb. The Central Valley needs water, yet 50% of its water goes to the protection of fish. California has not been allowed to build a new water storage facility since 1972—when the environmentalists win the people of the State lose—and we have

been losers for more than 40 years.

“Short-sightedness soon became conceit. Green utopians went further and demanded that an ailing 3-inch bait fish in the San Francisco delta receive more fresh oxygenated water. In the last five years, they have successfully gone to court to force millions of acre-feet of contracted irrigation water to be diverted from farms to flow freely out to sea.”

### [Environmentalists Fraud—Want Farms to Close Down—THEN Refuse to Allow Development or Use of Land](#)

“The environmental movement has destroyed as many jobs as Obama—both claiming to “help”. California has a drought, so the enviros have a solution—close down farms. Of course the farmers will still be paying taxes on the land—they will want to develop it. At that point the environmentalists will claim we do not have the water or that an expensive EIR will show a heretofore unknown animal, bug or fish exists and needs protection—at the cost of the farmer.

“This is how environmentalists steal private land—they create policies that make the land unusable, then the owners have to walk away. Shame on us for allowing these thieves to steal, again. “She says instead of spending an estimated \$67 billion on the governor’s tunnels, a much smaller amount of money should be spent on buying up impaired land on the west side of the San Joaquin Valley and taking it out of growing thousands of almond and pistachio trees and miles of grape vines. But it’s not just the growth of permanent crops on the west side of the valley that has helped put the state into a water emergency, says Bill Jennings, executive director of the California Sportfishing Protection Alliance.”

“I am also convinced weather modification programs run by the U.S. government, the aerosol spraying of our skies, has drastically changed our weather patterns causing all of us to suffer. Geoengineering is yet another issue that can’t be

covered in 500 words or less. However, there are excellent, FACTUAL web sites for more information: [Brazen Propaganda From NASA](#) (aerosol crimes) by Clifford E Carnicom. [Full list of his columns is here](#). Also: [Agriculture Defense Coalition](#) has thousands of documents.

“During my adult years while living in California, there were droughts. I always wondered why California didn’t built desalinization plants? The single main factor fed to the public is too expensive. Well, when you have a multi-year drought that racks up BILLIONS for several years in a row in crop losses, unemployment and higher food costs for everyone, how expensive is that? Better to spend BILLIONS keeping liars, cheats and thieves in the state illegally. How expensive do you think this will be heaped on the backs of American citizens in California trying to put food on the table:” Rest at link.

Fast forward. First we have global lunatic organizations: the WEF (World Economic Forum) and world government advocates dripping with false altruism, Council on Foreign Relations: [Water Stress: A Global Problem That’s Getting Worse](#), April 3, 2023 – Water scarcity threatens the health and development of communities around the globe. **Climate change** is intensifying the problem, pushing governments to find more innovative, collaborative ways to address water stress.” Bird cage liner.

WEF: [Water demand is rising fast. Yet few realize how it impacts the climate crisis](#), Oct, 3, 2024. There is no climate crisis and both of those organizations know it. I should say those at the top of the dung heap; the rest are simply brainwashed, living in fear the planet is going to burn up next week, next year, next decade. *Hell, that same propaganda has been going on since the 1970’s.* **But make no mistake: We do have a dead serious water shortage problem in this country.**

Any solutions? If CON-gress would pass a bill to cut off ALL welfare, city, state, county, federal to tens of millions of

illegal aliens they would self-deport **saving billions of gallons of water every day**. ICE is doing a great job, **but until you shut off the big magnet: Free health care, free dental care, free cash (California), free housing, free, free, free paid for by the sweat of your labor while you and your family go without – illegals will continue to fight to stay here aided and abetted by mayors, governors and open border advocates (NGO's), law firms**. This should have been done in 1993. Could have been done in 2017 because the bill was already written (1993); Republicans controlled CON-gress with a GOP president. Nothing was done despite my best efforts.

Americans do waste a lot of water like letting the faucet run while doing dishes or taking 30-minute showers, but it really boils down to infrastructure and stopping the big lie about climate change. *We need more reservoirs and dams which create electricity greenies love to charge their EV's with*. Stop the insanity of cutting off water to ranchers and farmers which is deliberate.

Beware of the bureau-rats

[Idaho Farmers Issue Stark Warning About Nationwide Consequences After State Government Issues Order to Shut Off Their Water Supply: "Farms and banks will fail!" \[VIDEO\]](#), June10, 2024 "The SOSs being sent to the American public by these farmers is an eery reminder of how easily and quickly our local, state, and federal governments, which are supposed to represent the will of the people, can control our food sources simply by picking winners and loser when it comes to who gets life-sustaining water and whose right to water will be restricted or in the case of the Idaho farmers, cut off."

A "compromise" of sorts: [Oasis in the desert: how an agreement on the Eastern Snake Plain Aquifer hopes to strike a balance](#), Nov. 18, 2024

Mexico is NOT our friend. From allowing tens of millions of

illegals from Mexico and other countries to literally storm our borders to the fentanyl industry, the cartels are big bosses and they think nothing of killing anyone who stands in their way. Their new female president is worthless IMHO. Vacation in Mexico? You couldn't pay me; I also haven't purchased a single vegetable, fruit or anything else from Mexico since NAFTA.

[Trump threatens tariffs and sanctions on Mexico for 'stealing' water from Texas farmers](#) – Trump tells Mexico to give Texas the water they are owed under a decades-old treaty, **April 10, 2025**

“President Donald Trump threatened to impose tariffs, and possibly sanctions against Mexico, if it continues to rob South Texas farmers of Rio Grande water promised under a decades-old treaty.

‘In a post on Truth Social on Thursday, Trump proclaimed that Mexico owes Texas 1.3 million acre-feet of water under the 1944 Water Treaty, though Mexico was violating their obligation.

“This is very unfair, and it is hurting South Texas Farmers very badly,” the president wrote. “Last year, the only Sugar Mill in Texas CLOSED, because Mexico has been stealing the water from Texas Farmers. Ted Cruz has been leading the fight to get South Texas the water it is owed, but Sleepy Joe refused to lift a finger to help the Farmers. THAT ENDS NOW!”

**April 11, 2025:** [Mexico to make 'immediate' water payment to US as Trump threatens sanctions](#)

And for those uneducated Mexican mobs who believe the LIES out of the mouth of politicians, we did NOT steal Texas or any land you scream and yell about: [The Treaty of Guadalupe Hidalgo](#): “The Treaty of Guadalupe Hidalgo, that brought an official end to the Mexican-American War (1846-1848), was signed on February 2, 1848, at Guadalupe Hidalgo, a city north

of the capital where the Mexican government had fled with the advance of U.S. forces. By its terms, Mexico ceded 55 percent of its territory, including the present-day states California, Nevada, Utah, New Mexico, most of Arizona and Colorado, and parts of Oklahoma, Kansas, and Wyoming. Mexico also relinquished all claims to Texas, and recognized the Rio Grande as the southern boundary with the United States.”

The U.S. government at the time PAID the Mexican government \$15,000,000 in gold to wrap up the deal. [Note: Our state legislature . TX, just passed a new law to start repairing pipelines, etc., to help farmers and ranchers, urban growth; big chunk of money which should have been done years ago.]

[What Causes Water Conflict?](#), Nov. 8, 2024: “Mexican farmers set fire to government buildings, ambushed soldiers, took politicians hostage, and seized control of La Boquilla dam to prevent water from being diverted from their drought-parched fields and funneled away to the United States. “This is a war to survive . . . to feed my family,” affirmed a protest leader. National Guard troops opened fire, killing one.”

[The water wars of the future are here today](#) – “Seven thirsty states, including California, are fighting over the dwindling waters of the Colorado River. USC experts look at how we got here – and why this was inevitable. February 28, 2023”

[Texas Farm Bureau calls for action on water crisis](#), March 11, 2025: “Years of severe drought conditions combined with extreme population growth are putting pressure on the state’s water resources. During a recent Texas House Committee on Natural Resources hearing, Texas Farm Bureau testified on the critical need for immediate action to the water crisis.

“The state’s farmers and ranchers are the most vulnerable to drought and water supply disruptions. “We’re living it right now. We are the example of what happens if you do not have a water supply you can depend upon,” Billy Howe, TFB associate

director of Government Affairs, said.

"He noted the Texas cattle inventory is at near record lows and the national implications of that. "Ranchers are having to sell off livestock because they simply don't have the grass to graze them because it's not raining, and you can't feed your way out of a drought," he said." Extreme population growth: *We've been over run by ILLEGAL aliens using our water resources.*

There are too many heart-breaking stories about our ranchers and farmers in so many states because there's not enough water. Droughts have plagued this country for centuries and they were NOT caused by the BS climate change. Lack of planning, infrastructure bear the burden of blame. AND the spraying of our skies. Most Americans have NO appreciation for our farmers, ranchers and dairy farmers, they don't. It's a very hard life, work from sun up to sun down to feed YOU and your family. Water is absolutely critical to them.

I also firmly believe after countless hours of research that geo-engineering has done enormous damage to normal weather cycles in this country (and in dozens of countries worldwide). *He who controls the weather controls our food supply. This is not a conspiracy theory.*

#### State-Level Geoengineering Bans: Florida, Montana, and Beyond

(**In the works:** TX which I'm sure is dead because the session ended yesterday and doesn't come back until Jan. 2027), FL, MT, NJ, NC, PA, RI, VT) None of this would have been possible *if Americans had not been pounding on their legislatures about the poisoning of our skies.* Video at :14 seconds: Governor DeSantis regarding the bill.

The Paradise, Calif., fire was NOT started by geo-engineering or DEW's. That is a fact. The fire in Lahaina, Maui, same in my opinion after a hell of a lot of research. There is NO question in my mind having researched this since 2002,

spraying our skies to produce rain or fight the big lie, climate change, has caused droughts, destruction of crops and *caused a provable uptick in respiratory illness.*

[Contrails: Killing Us Softly?](#) Mine, March 19, 2007 – READ. One of the links at the bottom of my column: [Experimental Weather Modification, Adverse impacts on Agriculture and Micro-Climates, Current Weather Modification Programs](#) (2006): “U.S. Senate Bill 517 and U.S. House Bill 2995, a bill that would allow experimental weather modification by artificial methods and implement a national weather modification policy, does not include agriculture or public oversight.” Agriculture is being destroyed by weather modification.

And remember these: Big pharma – there’s no money in the cure, only the treatment and yesterday’s conspiracy theories are today’s truth.

**I highly recommend** [What in the World Are They Spraying?](#) The Chemtrail/Geo-Engineering Cover up Produced by G. Edward Griffin, Michael Murphy, and Paul Wittenberger – DVD – share the cost with friends. “By now everyone has seen crisscrossing streaks of white clouds trailing behind jet aircraft, stretching from horizon to horizon, eventually turning the sky into a murky haze. Our innate intelligence tells us these are not mere vapor trails from jet engines, but no one yet has probed the questions: WHO is doing this and WHY. With the release of this video, all of that has changed.” Watch the short trailer. And do share this truth. Demand your state legislature ban the spraying.

For a thorough, comprehensive education on the Fed, the income tax, education, Medicare, SS, the critical, fraudulent ratification of the Seventeenth Amendment and more, be sure to order my book by calling 800-955-0116 or click the link, [“Taking Politics Out of Solutions”](#). 400 pages of facts and solutions. Order two books and save \$10.00
