

We Must Stop Wars that Have No Declaration of War

By Andrew Wallace

September 23, 2025

We have had Unmitigated Treason for more than 80 years. The American people have suffered a monumental loss of Lives, Freedom, and Prosperity because of Wars for Profit that have nothing to do with National Security. But they have everything to do with obscene profits for the Parasitic Super-Rich Ruling Class (PSRRC) and Congress.

The greed and corruption is so entrenched in Congress and the people are so brainwashed by the media that all attempts to stop this Treason have failed. It is understood by most that the PSRRC, the Jewish Lobby and Media, control our government.

My solution is to let members of the Military resign from the service if the government enters an armed conflict with a nation that can't invade us, and there is no Declaration of War, or if it is War for Profit. Attacks on pirates or the rescue of American hostages would continue. These requirements are simple to understand, and are the only way I can see to stop these wars for the profit of the PSRRC and Congress at the expense of The People.

How can you find fault with this dramatic and scary proposal if it saves our young people and returns us to the American Dream and prosperity when nothing else has worked?

Following are the critical and sad facts that support any

radical attempt to stop Wars for Profit, Unconstitutional Wars without a Declaration of War, and Wars against Adversaries who can't invade us:

1. We have engaged in Wars for profit for 80 years, and lost every one of them.
2. We lost 105,000 members of our armed forces, killed millions, destroyed entire nations and incurred hatred of the entire world.
3. Every single war was for profit, not National Security, as we had no direct interest.
4. Effectively, Congress sold our military as Mercenaries to Big Money aka PSRRC.
5. Today, Congress is spending \$428.4 Billion on Foreign Aid, Deployed Military and Bases Overseas, without any boots on the ground, yet this costs about 10% of its income.
6. Foreign Expenses of any kind are causing Inflation and lowering the living standards of Americans, pushing us closer to Economic Dystopia.
7. We need our military at home to confront and deport Illegal Invaders. The need is so great we may have to resort to the Draft. Our military numbers only 2.1 million, while Invaders are more than 20 Million. The numbers should be reversed for the Guerilla Warfare that many are predicting.
8. The United States can't be invaded because of our oceans, making reciprocal defense treaties with NATO a sick joke on us. The proper defense posture for United States is non-involvement, for we can only be defeated by weapons of mass destruction or from within.
9. There is absolutely no justifiable Constitutional or

rational reason for foreign expenditures of any kind Wars for profit, with or without a Declaration War, are Treason.

10. We have 177,209 Troops deployed in 80 countries. They are like canaries in a cold mine that serve no National Security Purpose. If they are attacked, we can't save them.

The single most important reason for this unconstitutional government is the failure of the corrupt and complicit FBI to investigate, prosecute, and convict criminals in government.

President George Washington in his 1796 Farewell speech warned us against forming permanent alliances and engaging in foreign entanglements that could pull us into Europe's conflicts. He further stated that we have NO DIRECT INTEREST in Europe's wars. This advice would have kept us out of World War One and Two, and the last 80 years of Wars for Profit. Japan attacked us because of our actions against them.

If we had followed President Washington's advise and the Constitution, we would now have prosperity beyond all comprehension.
