

What Are Sanctuary Cities REALLY Costing American Citizens?

By Frosty Wooldridge

December 16, 2024

Answer: a financial nightmare of costing billions if not trillions of dollars to U.S. taxpayers, murders of our citizens, rapes of our innocent women, billions-trillions in cash transfers out of our country, gangs taking up residence in our major cities, MS-13 plying its deadly drugs to our youth, shoplifting gangs, millions of homeless costing us billions of dollars, degradation of our cities with bums injecting meth syringes into their arms, anchor babies, degrading American culture, trashing our educational systems, changing our language...have I missed anything? Oh, we're \$36 trillion in national debt. Our politicians pit half the country against the other half of the country--instead of democrats and republicans working together for our betterment.

How bad is this national nightmare of four years of Biden's open borders, violating our U.S. Constitution, and spreading over 15 million illegal aliens across 50 states?

First of all, our absorbing refugees from 180 countries is not doing a single thing to alleviate the world's problems of 83 million new refugees, net gain annually--born into this world by third world citizens who lack or won't use birth control. Whether religion, poverty, or illiteracy, that's why humanity

faces an added 83 million new babies that cannot be fed, watered, educated or housed, annually. Whose fault, is it? The three aforementioned factors tell the sordid tale.

Will it stop, will they stop? The answer is a resounding, NO! World demographers show that humans add another 1.0 billion people to the planet every 12 to 14 years, net gain. So, the line never ends into first world countries. (Unless we gain the gumption to stop mass immigration by stopping it at our borders via our laws). While all Western Countries practice birth control of 2.0 children per woman, the other 4.0 billion humans on the planet, do not.

Therefore, what do "Sanctuary Cities" do to benefit America? Answer: absolutely nothing. They and their leaders, in fact, continue to house criminals, drug gangs, anchor babies, rapists, homeless, illiterate masses, shoplifters, and worse.

According to the Federation of American Immigration Reform, we, the U.S. taxpayers provide \$150 billion annually of our money to feed, house, educate, medicate and care for over 30 million illegal migrants who have crashed our shores. (Source: www.fairus.org ; additionally, www.cis.org or Center for Immigration Studies). That's a lot of cash leaving your wallet to be given to those people who have violated our borders, and arrived with no skills, no education, no language, and only their hands out for welfare.

To give you an example, New York City houses, at last count, 752,000 illegal aliens. One of their hotels, The Roosevelt Hotel, offers 1,300 rooms at \$500.00 a night for two people, and \$100.00 each for two people for food 24/7. Just do the math! We're talking billions for people who do not respect our laws and do not belong here. Chicago the same. Los Angeles, San Francisco, Atlanta, Boston, Detroit, Denver—all of those cities, their mayors and governors do not respect their oaths of office or the U.S. Constitution. They swore on the Bible to uphold our laws, and they aren't abiding by their oaths. Who

are they? Governor Newsom of California, Governor Jared Polis of Colorado, Kathy Hochul of New York, Governor Pritzker of Illinois, Governor Walz of Minneapolis, Governor Healy of Massachusetts, and the list grows. The respective mayors of major cities like Denver, Chicago, NYC, LA, San Francisco, and all the rest are legally a bunch of criminals for violating our federal laws.

Which laws are they? Article IV Section 4 of the U.S. Constitution. And, U.S. Code 8, Section 1324. It is illegal to transport, house or employ an illegal alien within the United States of America. Fines range to \$2,000.00 per illegal, and up to 5 years in prison. So if you transport, employ or house an illegal, or create a sanctuary city, you are a criminal, yourself. With 30 million illegals in America, we've got several million illegal American citizens who are feeding this nightmare.

What do you think it costs us in cash transfers to other countries from all these immigrants? Answer: \$800 billion annually is sent back to their home countries from the United States. In 2023, it hit \$857 billion because Biden engineered over 15 million more illegals. Understand that most of that money is paid in cash, so it's not taxed. It also means our own citizens remain on welfare rolls to the tune of 35 million subsisting on EBT cards, food stamps. That's our money going to their countries, all of it illegally gained. (Source: www.weforum.org) We're literally being financially bled to death by 55 million foreign born immigrants in our country, and we don't know what the 30 million illegals are sending back because we can't track them.

What else do those sanctuary cities do to America? They house the drug cartels that have killed 250,000 of our youth in the past four years. That's a lot of Americans killed because our government won't enforce our laws.

You hear that, "America's immigration system is broken."

FALSE! Biden and Congress won't enforce our laws that are already on the books. Who is broken? Answer: our career corrupt members of Congress and our Alzheimer's victim Joe Biden. That's where our system suffers "broken." You could pass any and all laws for immigration reform, but if you don't enforce the laws, any new system would be "broken" also. Meanwhile, we keep letting 4.0 million immigrants into the country annually.

What about our classrooms? Question: how do your own children enjoy a viable education in a classroom with 20-50 different languages? Answer: your kids are cheated out of a reasonable education because the teacher must always teach down to the lowest common denominator. How do I know? I taught in the inner city for two years. Our teachers across America are poorly paid, overworked, and given an impossible task to teach all the millions of kids from illegal and legal refugees.

What about those "anchor babies" that arrive at 300,000 annually according to www.CIS.org ? An illegal alien pregnant mother comes over here, drops her baby in our hospital, and you pay the bills. You pay about \$8,000 per birth. Then, K-12, you pay about \$9,000.00 annually for its education. You pay for its breakfast and lunch at around \$10.00 per meal X's 18 years. You pay for the mother's Section 8 housing.

Anyone wondering why we're \$36 trillion in national debt?

I want to scream or cry as I research what our idiot "Sanctuary City" mayors and governors are doing to us. It's a fact that Joe Biden, Kamala Harris, New York Governor Kathy Hochul, and Mayor Nick Adams directly are responsible for killing Laken Riley by an illegal Jose' Ibarra whom they set free after he was arrested in their jurisdiction. But Laken Riley is one of thousands of women raped or beaten by illegal aliens. We're just not hearing it on the mainstream news. People like Norah O'Donnell, David Muir and Lester Holt, Scott Simon, Terry Gross (NPR) and 60 Minutes make sure you don't

hear about the underbelly of illegal alien migration.

And, it's going to get much worse!

Coming Part 2: More underbelly of Sanctuary Cities usurping America's laws, and we pay for it.
