

What Do You Think of D.I.E., C.R.T., W.O.K.E & Men Competing in Women's Sports?

By Frosty Wooldridge

November 14, 2024

After an 80-day intense \$1,000,000,000.00 (billion), Kamala Harris' advertising campaign to win the White House, the Diversity, Inclusion, Equity candidate fell down Air Force II steps, in flames. What happened showed the entire nation that money cannot buy you the presidency.

The harsh reality remains: Biden invited her into the Vice Presidency with only two qualifications—she was a female and she was a person of color. Those two items were not and are not qualifications—they occur at birth by DNA. Not only that, her parents were not American citizens when they birthed her on American soil. They were legal visitors. One from Jamaica and the other from India. Kamala was an anchor baby who was not legally qualified to become president. Finally, in four years at the Vice Presidency, she accomplished NOTHING. She answered for nothing, and when asked if she would change anything during her Biden years, she answered, “Nothing comes to mind.”

Well, anchor baby lady, about 15 to 20 million illegal aliens invading our country under your “border czar” watch, “Come to our minds”, the citizens of the United States. We don't want hundreds or even thousands of Springfield, Ohio's with 15,000 illiterate Haitians flown into the towns in the dead of night

and dumped onto the American residents. Plus, we don't want to pay for them, their crimes, their kids, their food, their housing, and their medical care.

It also showed that Kamala Harris who over-spent that \$1.0 billion "buying" Oprah Winfrey with \$1 million price tag along with Beyoncé' and Taylor Swift, stands \$20 million in campaign debt. If she couldn't manage \$1.0 billion responsibly, how was she going to manage the trillions of dollars of the entire United States government? It shows you that Diversity, Inclusion, Equity, DO NOT WORK. As a nation, we cannot afford to promote anyone as to their gender, race, color, or ethnic group. In a free society, you must earn your way through education, hard work, critical thinking, and plain old common sense. You need to be qualified for a position. Kamala proved her only qualifications were to work at McDonald's flipping hamburgers, but she didn't even do that work!

Let's let D.I.E. die a common sense, rational and total death in America. You want to succeed in our country? Earn it!

What makes America great? Meritocracy, educational excellence, creativity, money management, get to work on time, discipline, principles, and dedication.

Trump promised to shake things up in "The Swamp." Looks like he's making that happen. With Secretary of Defense Pete Hegseth, with two Bronze Stars from combat in Iraq and Afghanistan, graduate of Princeton and Harvard, we won't see any more Critical Race Theory being force fed to our troops. We won't see generals with earrings in their ears and wearing dresses along with high heels. We won't see dudes who want to be girls in the fox hole with "toxic" American males charged with defending our country. In the end, as to the U.S. Marines and U.S. Army, you need a MAN in that foxhole who is willing to kill the enemy...not ask for a dance with him. We need men to lead other men, not baby them with promises of a pair of high heels, and a cocktail at a dinner party.

What about Critical Race Theory? It's a stupid, outlandish, racist rendition of absurdity that pits one American against another because of the color of their skin. It's outmoded, out of date, and out of touch with American values. Notwithstanding, multi-millionaires Joy Reid and Whoopi Goldberg can dance and scream about racism in America, but they wouldn't move back to their homeland in Africa for all the money in the world. If they did, they would stand in food lines, sleep in thatched huts and use stinky outhouses if they were lucky. They need to thank God for their lucky stars for being Americans.

What about W.O.K.E. thinking? Answer: "Woke has been used as shorthand for some ideas of the American Left involving identity politics and social justice, such as white privilege and reparations for slavery in the United States."

Since there hasn't been slavery in the USA for over 150 years, the term no longer applies to any race, creed, or color. You make it in America through your own choice of excellence in education, hard work, and discipline. While you may choose to live a subsistence life on welfare, people of color and all races in the United States of America live the highest standard of living in the world. W.O.K.E. excuses won't cut it.

Additionally, what about the insanity and stupidity of DNA males pretending to be females and competing in women's sports? Characters like "Lia" Thomas at 6'4", a swimmer, beat the bathing suits off women half his size and strength. For him to stand on the podium with a smile because he won a "Woman's Trophy" in a woman's race, must be the height of hubris/arrogance/narcissism and sheer mental illness. My bet: go with Riley Gaines, All-American, All-Woman.

For the NCAA people to allow it, and democrat politicians to support that kind of insanity--everyone needs to take a biology test on what DNA stands for and how it mandates a

“woman” and a “man.” No matter how much you pretend to be one or the other gender, you are forever confined to your male DNA XY or female DNA of XX chromosomes.

Yes, by all means, dress up like a girl if you’re a man, if that’s your deal. Dress up like a boy if you’re a woman. We don’t care. But if you want to compete in sports, organize your own “transgender” competitions and quit desecrating American women’s sports.

Finally, no matter what you think about the Ukraine War, yes, it’s horrible that over 200,000 kids have been killed. But it’s not our war. It’s not ours to spend \$200 billion of our tax dollars on their fight. If anyone should help them, it would be the entire group of European nations. We’ve got enough problems with 500,000 homeless, 250,000 drug overdose deaths in three years, Veterans living homeless in the streets, a \$35 trillion national debt, 45 millions functionally illiterate Americans, 30 million subsisting on food stamps, total incompetence in the White House under Biden-Harris, infrastructure decay, horrendous gangs and criminals usurping our cities, over 30 million illegal aliens, being financially bled to death with over \$120 billion cash transfers annually by legal and illegal migrants in our country back to their home countries.

We’ve got 80 million foreign born along with another 30 million illegal aliens, which disintegrates our culture, language and national cohesion. We’ve got American Muslims chanting, “Death to America” as they openly support the extermination of Israel and every last Jewish person. Hamas and Palestinians in our country openly defy our laws of religious freedoms. They fly their flags in open disgust for Old Glory. They need to be deported, starting with Rashida Tlaib in Detroit and Ilhan Omar in Minneapolis.

Why are we putting up with all this political crap? Why are democrats supporting such bulls**t in our country? Why aren’t

our lawmakers making logical and rational decisions to further American citizens' interests? Answer: DC is a majority swamp of corruption of career politicians that increase their bank accounts and do little to further American interests. We need "Term Limits" to get fresh uncorrupted blood into Congress every four years.

It matters little what you think of President Trump as to his personality, but the one thing you can count on is the fact that he loves America, and he works for all Americans. God help him and his cabinet and top staff to guide this country back onto a successful path in the next four years. Plus, let's give a "shout out" to Tulsi Gabbard for being extraordinarily astute, extremely well-spoken, highly intelligent, Colonel in the U.S. Army, Congresswoman, and now head of the Department of National Intelligence. If anything, she should be the next woman president of the United States of America.
