

# What Must be Done for America to Survive as a Constitutional Republic?

By Andrew Wallace

September 13, 2025

By definition, this article is polemic, advocating a major restructuring of government to comply with the Constitution and the laws of Economics. Two things must happen for us to remain viable. Trump's programs must work...and I believe they will if we can defeat the Communist army's attempt to stop it ...and we must restructure our government Constitutionally. Both efforts must succeed, or we fail.

I have previously written that our Constitutional Republic has been mortally wounded by the Coup of 1913, which oppressed us with Income Taxes, an Unconstitutional Federal Reserve Bank, Tax-Free Foundations, and unlawful Fiat Money. This was the beginning of the end for our Constitutional Republic. Income Taxes replaced Tariffs as the primary source of income for Federal Establishment AKA Government.

You will note that I refer to the Federal Establishment, not Government, because it is not a Sovereign Government like the states.

The primary nail in the coffin was income taxes that reversed the Constitutional roles of the States and the Federal Establishment. Basically the Federal Establishment, by using federal income taxes, denied money to the states and allowed

the Federal Establishment to unlawfully usurp state functions and shift political power to Washington. There is only so much money available for taxation, and the income tax took most of it, leaving the states more or less destitute.

This was an attack on "States Rights", second only to the Civil War.

To correct this disaster, we must mitigate the harm of the income tax by compelling the Federal Establishment to return to a state 50% of taxes collected in that state. This is just an estimate; it could be more or less. The Federal government will have additional revenue from Tariffs. Federal Income is about \$5 Trillion now and returns \$1.1 Trillion to the states. But the Federal Establishment will spend an estimated \$7.5 Trillion. Government must reduce other expenses, in addition to removing a THOUSAND or so departments and agencies not authorized by the Constitution, compliance being a qualifying requirement of all Oaths of Office!

I am sure that few of my numerical estimates will survive forensic analysis, but they are a realistic starting point.

Returning our troops from overseas would save \$24.4 Billion. Terminating Unconstitutional Foreign Aid would save \$98.8 Billion or 1.2% of federal budget.

The Federal Establishment now unlawfully funds many usurped state programs and other unconstitutional programs. Medicaid consumes 56.8% of total funds to states, due to waste, fraud, abuse, and excessive use by illegals.

We must bring our military home because we will need them desperately to control and deport the Communist army of 25 million illegals brought into our country by our Communist Traitors masquerading as public officials. The Constitution says this is Treason, with a possible death penalty (to be determined by Congress).

We should erect a permanent public gallows in Washington as a warning and deterrent. Federal Law enforcement must investigate, prosecute and convict elected officials and government employees for all infractions of the law. There must be a recognized high probability of arrest for corruption and theft. Effective Federal Law enforcement no longer exists or we would not have a mostly corrupt Congress.

How many people were arrested for the waste, fraud, and abuse already uncovered by DOGE?

We also have no national security reason to have our military in a foreign country, since we can't be invaded. We can only be defeated by Weapons of Mass Destruction or the legion of illegals brought into our country by the Democrat/Communists, may they forever reside in hell. We may have to institute the draft to fight this horde of illegal invaders. The Federal agencies are doing a hell of a job, but they are not making a dent in the illegal invaders. Illegals must be deported before the 2030 census.

I want to make this clear. Welfare or charity of any kind is a forbidden function for the Federal Establishment, specifically excluded from its enumerated duties. Federal Welfare funds the Communist cities, and taxpayers don't want to fund Communism, which is their mortal enemy.

This return to Constitutionality also requires effective Federal law enforcement, for our government has evolved into mostly a Criminal Enterprise. Also, you must accept the reality that a majority of Congress is corrupt. But on the bright side, the unconstitutional departments, agencies, and programs can be terminated with the stroke of President Trump's pen.

I look forward to your comments at [natlmktg@gte.net](mailto:natlmktg@gte.net).

May God Bless You and the Republic
