

What's Wrong With this Picture 2008-2020

By Lex Greene

January 23, 2024

It must be the new math taught to kids in the government-controlled education (*read: indoctrination*) system these days, but something doesn't look quite right about USA elections during this time frame.

Note this....

- [Obama](#) wins the 2008 Presidential race after **losing 72%** of the counties across the country...
- [Obama](#) wins re-election in 2012 after **losing 78%** of the counties across the country...
- Trump wins the 2016 Presidential race by **winning 82%** of the counties across the country...
- Trump loses re-election after **winning 79%** of the counties across the country...
- And Biden wins the 2020 Presidential race after **losing a record 85%** of the counties across the country...

In other words, more than 70% of the country voted *against* both [Obama and Biden](#), but they still allegedly won. In contrast, with 79% to 82% of the country voting *for Trump*, somehow, miraculously, almost as impressive as Jesus walking on water, Biden defeats Trump in 2020 having won only 15% of the counties across the country.

Anyone see a problem here?

Of course, democrats have an answer for this obvious anomaly. Democrats control the majority of the voting population in about twenty or so major urban areas. In other words, about 20-democrat illegal sanctuary toiles are controlling the entire country, despite 80% of the country or more, standing opposed.

This is in fact how extreme LEFT democrats stole control of the entire country, despite 80% of the country voting against them in every election cycle. In fact, there isn't a single "blue state" anywhere in the country. There are only a handful of blue cities, all of them democrat destroyed bastions of crime, corruption, homelessness, drug and sex addiction, murder, and mayhem.

This is why Trump is often referred to as a "populous President," one highly popular all across the country, all voting demographics, about 80% of the 3143 counties in the USA. The country is not controlled by the people in 80% of the country, but rather the populations in a handful of extreme LEFT urban areas rotten with crime and corruption.

To put a fine point on the matter, democrats and their voters currently control the entire nation from just 477 of 3143 counties won by Biden in 2020. The rest of the country be damned!

This is possible due to USA election systems, which do indeed include many methods of cheating on the part of democrats, especially in 2020 under COVID19 "emergency voting methods."

As a result, democrat voters feel empowered by their ability to run roughshod over the nation at election time, all from just a handful of urban areas controlled by the DNC, Soros and the WEF. But they didn't think this all the way through...as they become increasingly tyrannical and heavy handed in their open distain for all freedom and liberty loving Americans in the other 2666 counties....

Fatal Flaws in the LEFTIST End Game

Through their corruption, and many methods of election interference and cheating, they have been able to steal elections and treat the other 80% of the country like a bunch of dumb hicks with no political power at all.

Of course, sooner or later, those kind, generous and patient folks in the other 2666 counties will give up on saving their country in the election booth. They will tire of being run over by a bunch of sniveling bedwetters still living in their mommy's basement and voting for the worst leaders alive in the USA today and solve the problem another way.

While a handful of urban illegal sanctuaries may have figured out how to outvote 80% of the country, when they force the game to change, the odds will change too.

Most of us on the political RIGHT, for lack of a better term, have been very peaceful and even more patient with the anti-American LEFT, willing to exhaust all peaceful means of saving our Republic from democrats clearly out to destroy it, before moving to the same last resort our Founders were forced to use in 1776.

If democrats continue to force 80% of the country to that breaking point, well, then in an instant, the odds shift hard in favor of all true Americans, those who know we are a Constitutional Republic and not a Marxist democracy.

While 477 counties might be able to outvote the other 2666 counties across the country, they will have no chance at all against 80% of the country in the streets.

Personally, I hope calmer heads and peaceful processes can still prevent that moment in history. But that's actually up to the democrats.

The Republic will be defended, along with freedom and liberty,

and it will be saved. It's totally in the hands of democrats, whether that will happen peacefully, or violently. They will either stop using tyrannical tactics to force Americans into a corner, or they will find out the hard way what it's like for about twenty democrat cities to go to war with more than 2666 counties from sea to sea.

Even the vast majority of California is RED, as is Colorado, Michigan, Illinois, and several other democrat-run states.

When the game changes, so do the odds... If democrats have even two brain cells to rub together, they need to stop forcing Americans into this corner, while they still can.

I don't want this to be settled in the streets...but it sure is easy to predict it.

In 2024, we will either have [free, fair, lawful, and transparent elections](#), or we will be off to the races. 2024 is the breaking point. Trust me on this... I follow growing public sentiments very closely.

WAKE UP DEMOCRATS...WHILE YOU STILL CAN!
