

Why Are We Devolving America's Western Culture? Can We Save Ourselves?

By Frosty Wooldridge

May 8, 2025

"In such a view of society, however greatly you might wish to benefit from an endless supply of cheap labour, a wider range of cuisine or the salving of a generation's conscience, you still would not have a right to wholly transform your society. Because that which you inherited that is good should also be passed on. Even were you to decide that some of the views or lifestyles of your ancestors could be improved upon, it does not follow that you should hand over to the next generation a society that is chaotic, fractured and unrecognizable." Douglas Murray, *The Strange Death of Europe: Immigration, Identity, Islam*

To tell you the truth, I am worried about America's future. I've watched our country enjoy post WWII, but now in my 78 years, I'm watching a slow methodical decline. I've watched it from a perspective few can appreciate as I have traveled across six continents, dozens of cultures, and dozens of languages. I've heard dozens of world views --some compatible and many not so compatible with Western culture. I've seen racial trauma on every one of those six continents. I've witnessed religious conflict. I've observed some really nasty human behavior along the way.

The biggest lesson I learned: you can't mix incompatible

cultures because they always end in conflict. You can't maintain competing languages in the same country. Why do you think Pakistan and India separated? Answer: totally incompatible religions, cultures and languages!

British author Douglas Murray wrote a classic rendition of Europe's decline into a devolving collection of third world countries. Today, Sweden is rocked by racial violence with its Muslim/African immigrants. From the most peaceful, prosperous and successful society on this planet, middle eastern and Africa immigrants have trashed Sweden's schools, trashed entire cities, terrified average Swedes, women can no longer walk safely down the streets of Melmo or Stockholm, "no go" zones everywhere, and now, Islamic leaders have told the Swedes that Sweden is no longer their country. The same happens in Norway, Finland, Great Britain, France, Spain, Germany, Denmark, Belgium, et al.

"And so all the time the European brain has held onto two contradictory things. The first is the dominant established narrative of a generation: that anyone in the world can come to Europe and become a European, and that in order to become a European you merely need to be a person in Europe. The other part of the European brain has spent these years watching and waiting. This part could always recognize that the new arrivals were not only coming in unprecedented numbers but were bringing with them customs that, if not all unprecedented, had certainly not existed in Europe for a long time. The first part of the brain insists that the newcomers will assimilate and that, given time, even the most hard-to-swallow aspects of the culture of the new arrivals will become more recognizably European. Optimism favors the first part of the brain. Events favor the second, which increasingly begins to wonder whether anyone has the time for the changes that are meant to happen." –Douglas Murray

Immigrants assimilating is not happening as to becoming a "European." Muslims NEVER assimilate. They intend to

dominate. Notice France's "no go zones" where Europeans dare not enter. Over 200 of them throughout Europe. In Great Britain, Muslims run hundreds of Sharia Courts that do not pay attention to nor abide by British laws. Female genital mutilation is performed on every Muslim female child. Honor killings continue all over Europe. Women remain half the value of a man. Women are forced into becoming non-beings by wearing a Burka to hide their entire bodies. They cannot be educated under Sharia Law. That's Europe today, in 2025.

It's as if Europe's leaders want to kill their Western Cultures. They want to devolve European countries down to the basics of 6th century Islam's Sharia Law and political governance. In other words, those leaders want to abolish free speech, women's rights, animal rights, children's rights and religious choice.

"A continent which imports the world's peoples will also import the world's problems." —Douglas Murray

Have you visited Detroit, Michigan lately. You won't see America in "The Motor City." It's now "Islam City" that chanted "Death to America" since October 7, 2023 when Hamas slaughtered 1,200 Israeli Jews and took 200 plus hostages to torture, most of them dead at this point.

Have you visited Minneapolis' "Somaliland" of 125,000 immigrated Somalians with an average IQ of 68? When your collective IQ drops to that level, you have no interest in education, ethics, morality or the Social Contract. Case in point, several years ago, they scammed the American taxpayers of \$200 million in EBT card money. Virtually 90 percent of them remain on welfare after 10 years in America. If you're illiterate, there's not too much you can do in any workplace.

Have you noticed the numbers? In 1990, only 300 mosques in America. Today? A whopping 2,769 plus mosques dominate the American landscape as their own fortresses of conquest. Over

10,989 mosques in Europe! If you even think for yourself in Islam, you could be/will be decapitated.

Have you noticed that China has purchased 350,000 acres of American farmland. China owns American food processing plants. When it comes to trade, our whole country is "Made in China."

Within the last month, Islam announced it would build a 400 acre "Islamic City" near Dallas, Texas—completely walled off from Americans and America.

Are you watching the blatant anti-semitism at our universities? What about religious freedoms? Have you heard those rioters want to exterminate Jewish people right here in America?

Did you see the Venezuelan teen gangs attack New York Policeman this past week? What happens when our politicians encourage another 12-20 million illegal aliens on top of the 12 million that were already here previous to Joe Biden? Are you aware that we now house in excess of 85 million foreign-born people in America? Have you noticed they fly Palestinian flags and dozens of other countries' flags more than Old Glory?

Did you notice last week that an immigrant from India, Shri Thanedar (D-MI) now a U.S. House Member, wrote seven articles of impeachment against President Trump? Do you understand that his world view cannot and does not coalesce nor is it compatible with American world view? He's a political Covid virus!

What were Biden's handlers and all of our U.S. Congressional representatives thinking when they encouraged, engineered and invited over 12 million illegal aliens from all over the planet to usurp our laws, and invade our borders? It cost us \$150 billion annually for four years, and now billions more to deport them. They brought drugs that killed 270,000 of our kids. And, still, much like Europe's moronic leaders, we have

millions of illegal aliens protected in Sanctuary Cities by our leaders who do not respect our laws or their oaths of office.

Last week, I interviewed on “Zeb At The Ranch” with nationally famous Zeb Bell on his radio station where he asked me if America was going to pull out of this multicultural–immigration nosedive?

I replied, “Given 25 more years with the projected 100 million more legal and illegal immigrants and their birth rates, along with their incompatible cultures and religions, added to America—I don’t see how we’ll survive as an intact, cohesive culture and/or a sustainable civilization. As a matter of fact, I know we won’t.”

What do you think? Do you honestly think we will survive? Does anyone think it’s time for a 20 year pause in all immigration?
