

Why Don't ALL Americans Want Honest Elections?

By Coach Dave Daubenmire

Have you every played the slot machines at Las Vegas? You know, the one-armed bandit. Every time you give a tug on that sucker you are hoping to hit the jackpot.

Are our elections getting to be like that? What has happened to America where the idea of voter-fraud has become a normal part of the discussion today?

If you remember, it was Crooked Hillary who first brought it to our attention when she alleged that Donald Trump had stolen the Presidency from her. You do remember that...right? [Check this](#) out for a refresher. Didn't Al Gore claim the same thing?

Election fraud is nothing new...most old folks remember the cheating in Chicago by The Mob delivering the Presidency to JFK...but modern technology makes it so much more sophisticated...and technology makes it easier to hide.

From my living room here in Central Ohio it is hard to imagine any sane person voting for Harris...but there seems to be less sane people in this country today. The polls say the race is close, but the purpose of the polls is to make the race LOOK close so that it is easier to cheat.

I don't know about you, but I would like to return to the good old days of paper ballots and same-day in-person voting, with

some non-government accounting business actually doing the counting. Sadly, our "government" has become too political to trust either side and I sure as hell don't want the FBI investigating anybody or anything!

Can I get an amen?

But suddenly an old soldier comes riding out of the sunset. Dr. Jerome Corsi, you remember him from John Kerry and the Swiftboat veterans, has entered stage right with some hefty allegations about the honesty of our elections. His evidence is so convincing that Ohio Secretary of State Frank LeRose has opened an investigation.

I think this could be a BIG DEAL if it is handled properly. The question is will LeRose do a serious investigation or simply do a drive-by inspection? I don't trust either side nor do I trust their conclusions. BTW...how did that young punk get on the roof and shoot at the President? Maybe vengeance hunting Merrick Garland will get to the bottom of it for us...

But back to Dr Corsi. His evidence seems to be so credible that Ohio's LeRose has opened an investigation. This was blown wide open last week when the story was given a boost when the Gateway Pundit picked it up. [You can read about it here.](#)

And wouldn't you know it...just a few days after LeRose agrees to investigate we find out that here in Ohio illegal border-jumpers have been caught voting. [Read and weep.](#) It's only 600, so they want us to know it didn't really affect the election. Yeah right. I wonder if they chased down illegal voters with the same zeal that they chased down J6ers?

Which is worse, walking into the Capitol Building to complain about an election or having illegals vote in our elections? Could someone check with AG Garland for me? Are all the FBI agents out looking for Fake voters? Somehow, I think not. Just another vast right-wing conspiracy...eh Hillary?

Which brings me back to Dr. Corsi. Check out his website www.godsfivestones.com where he lays out the proof that someone...ahem...has inserted algorithms into the voter roles that "creates" voters according to an embedded code that has been inserted into the whole process.

Did you ever play the slot machines in a casino? You know, the one-armed bandits that you just know is going to pay out with the next yank on the arm. Rumor has it that the slot machines also have embedded codes that insure that the "house" wins more than it loses. Wouldn't Las Vegas go broke if the machines were on the up and up?

But Coach Dave, you are probably asking, did we just do a huge investigation about that? You remember Sidney Powell, Rudy Giuliani, and Lynn Wood being made to look like fools as the blamed the machines for the fraud? Yeah, I remember them, but could it have been the old bait and switch? You know, getting everyone chasing Dominion's machines when it could have been an algorithm programmed into the system that is almost impossible to find?

That is what Dr. Jerome Corsi is alleging. Sorta like hunting for rabbits in a forest. You may find a few but it is the skunks that are stinking up the place. You never find what you are looking for if you are looking in the wrong place or for the wrong thing.

Dr Corsi has proof...his words...that the algorithms exist...and if they are not rooted out the chances are someone will be elected that the majority of Americans did not vote for.

Visit Dr Corsi's website www.godsfivestones.com for more details. The investigation is on-going in Ohio. We must make sure it is a REAL investigation. Perhaps I am a conspiracy theorist but what are the odds that if they did it in Ohio, they also did it elsewhere?

The most important election in American History is three

months away. Why don't ALL Americans want honest elections?
Who made this a partisan issue?

In person, paper ballots, on election day. What is so hard about that? Why would anyone object? It is sad to think that the American Republic could again come down to a roll of the dice.

Let us Make Elections Honest Again! MEHA. I think I'll make a hat.

God bless 76-year-old Jerome Corsi. Pray for him.
