

Will the Gog Magog Quakes Destroy Much of the Temple Mount?

By Lewis Brackett

September 29, 2024

Will Ezekiel's Gog Magog earthquakes send the Southern end of the "Temple Mount" sliding into the Kidron valley? Some "experts" said some time ago that whole area of the wall could collapse at any time! That area is actually a structure with lots of room under it.

When you look closely at today's "Western Wall," you can clearly see that the top fifth of that wall is of recent construction, likely about 500 years ago by Suleiman the Magnificent. Below this is the wall built of ancient ashlar; stone blocks put in place hundreds of years before the Christian era. These blocks have withstood many major quakes over the centuries.

With all that landfill sliding off that mountain top, both the Al-Aqsa mosque and Dome of the Rock are likely to be just plain gone. This will make way for the building the third* temple.

After the obvious miracles done by God in wiping out Israel's enemies, and making it possible to build the temple, it should be a slam dunk to get the Temple built. With the forces of radical Shia Islam having just been destroyed by God, the more reasonable Sunni will go along with this. Of course, in reality it won't be just a Jewish temple. It will be an

interfaith temple for use by the three Abrahamic faiths, just like was recently built in Saudi Arabia.

So yes, the world will be greatly shaken by the coming quakes, fire and rocks from heaven, making way for the Counterfeit Christ.

*Yes, what with King Herod tearing down the second Temple built by Ezra, and building the third Temple, it's really the fourth temple that will soon be rebuilt.
