

World Economic Forum Marxists Want to Rewrite the Bible

So now the [World Economic Forum \(“Global Government ‘R’ Us”\)](#) [wants to rewrite the Bible](#) to make it “correct,” whatever that means. And it’s bound to turn out just peachy-keen because they’re going to use AI, “Artificial Intelligence,” to do the job. What could possibly go wrong?

Apparently God and His prophets through the ages got everything wrong and what the world needs now is a new Bible that’s transgender, transhumanist, and a bubbling mix of all the world’s religions—except, of course, for all those teachings that we won’t be allowed to hear anymore and all those things we won’t be allowed to say. The only way to Save Democracy and Save The Planet is for a massive global government to decide what is a permitted religious doctrine.. and what isn’t.

To those who think this is a sign that we have truly entered the End Times—well, what can I say?

Meanwhile, [amazon.com completely shut down a customer’s “smart home”](#) because a delivery man, while grooving on the tunes with his headphones on, **thought he heard some kind of Racist remark from the automated robot doorbell. He reported it to amazon, and amazon responded by locking the poor sucker out of his home for a week. They also turned off his lights, his electricity, and everything else—which they could do because

it was a “smart home” with everything hooked up to amazon. 0 brave new world, that has such dindles in it!

But see, this is the way we’re headed, giving power, power, and more power to inaccessible persons who will do with it anything they please. Right down to what they’ll include in a new “Bible” that isn’t the Bible anymore.

Ye shall be as gods—still the greatest con Satan ever pulled on us.

Some of our inalienable rights just got alienated.

How do they propose to “correct” our religion? Their primary target, of course, is the Christian religion; but please don’t think they’ll stop there. Mix ‘em all up—Christianity, Islam, Buddhism, Hinduism, the Jedi religion for science fiction movie buffs—and what have you got?

You’ve got whatever the globalist nabobs say you’ve got from day to day, depending on which side of the bed they got up on in the morning. Which is just another way of saying you’ve got nothing at all.

Yeahbut! Isn’t it worth it, to get a smart home? And a smart car that they can turn off whenever they please... if you’re still allowed to have a car at all. And maybe private home ownership will have to go, too: cram all the plebs together into high-rise cubbyholes. Again, it will all be managed by AI, so it’ll be great. And the big boys can always lock us down again if things get gnarly: their Science will see to it that there’s always a new Pandemic just around the corner.

It all sounds pretty hopeless; but the Bible, the real Bible, reminds us, “He that sitteth in the heavens shall laugh; the LORD shall have them in derision. Then shall He speak unto them in His wrath, and vex them in His sore displeasure” (Psalm 2: 4-5).

Examine the landfill of history to see what that displeasure means.
