

World Tax-Genuflecting to Plants and Impeachment

Rev. Austin Miles

This past Sunday (September 22) my birthday celebration took place. I won't say how old I am, but when they lit the candles on the cake, six people were overcome by the heat. This birthday has glided me into the most confusion-based era in history. The Demoncrats are putting their resources and finances into "impeaching" President Donald Trump. For what? For doing everything a president SHOULD do to protect his country from enemies, financial ruin, degradation of the country, security of its citizens, economic growth and stability, and freedom of religion. (?) He has done NOTHING wrong, but indeed, everything right for the good of America. The impeachment goal began the moment President Trump was elected and put in office even though America is in better shape than ever since his presidency began.

Impeachment? Are you kidding me? They are mad because it is us, the church going people of responsible character, that is now the leadership of America, and not them. The Demoncrat Party are immoral thugs with criminal hearts. They are rude, vulgar and totally uneducated for this role in life, and, looking at those in office, such as Congresswoman Alexandria O'CRAZIO Cortez, they are just plain dumb. This is a difference between good and evil. And each wants to run America. We are rooting for the good guy who is now in the Oval Office.

What a world we are facing. We are being warned about Global Warming (?) which will result in the earth erupting in flames, burning everything up including people, so they say. The earth will be no more, IF we do not do what the demoncrats insist that we do, this is our fate doncha know. OK Here's the skinny on this political lie: The ONLY thing that causes heat and cold

is the sun! Nothing else. NASA told me this in a phone call. However we do have a serious MAN-MADE pollution problem caused by fossil fuel used in transportation, factory exhaust, polluted rivers due to lazy factory owners who built factories on river banks so they could conveniently dump all their waste in them. At one time, we could drink water right out of the river, it was that clear and pure. Now even the fish we catch can cause us problems because of the dirty pollution within them including mercury due to our rivers turned into garbage cans by imbeciles..

And why is this so important to Demrats? American Politicians, have tried various ways to establish a global tax. For years the U.N. has tried to figure out a way to pull this off, knowing that all these perverted politicians would become unspeakably wealthy.as a result. A world tax needs only a few cents for each person to pay, but a few cents. even a couple of pennies from every person in the world adds up to a fortune. THIS is what is behind the Global Warming hoax. Got that? They've tried several times to present a reason for a world tax. This is the reason that is gaining traction and might make it happen.

We are living in an age where God's wrath seems to be growing. How could it not be considering the sins that can be charged

against us including cruel painful abortions to little babies in the womb who have done no wrong to anyone. I cannot understand God's patience considering the severity of all sin, especially those against innocent babies, the church and the sacredness of marriage. This writer is certain that the sins in Noah's time would be tame in comparison to what is taking place today. Yet if offended God to the extent that he destroyed the entire earth, saving only Noah and his family, the only family He saw as righteous.

Take a look around you. They are actually teaching sexual immorality to children in the public schools so we can have a world filled with sexual perverts. In my day, everything about sex was hushed up. One did not loudly proclaim exploits or new positions. Today

they are teaching in the clearest terms possible, that homosexuality is the new normal..NO IT IS NOT! Little girls are now taught in class, how to put a...condom on a little boy, using a metal man statue with his sexual organ extended on which the little gi...never mind, I can go no further with this part of the report.

We are now living in a world where nature itself seems disturbed and simply not working right...I frankly see that we are feeling the beginnings of God's judgements. We are daily reminded of the increasing danger of wildfires, tornadoes, hurricanes, fierce floods, erupting volcanoes, bank failures, financial crisis, rumors of wars and erectile dysfunction.

Things are not going to get better. If pastors do not man their pulpits and people of integrity show their disagreement

with these public school programs along with the children's transgender reading programs in libraries, where the story tellers are made-up in garish opposite sex clothing and makeup, where children climb in the laps of these sodomite freaks as they read stories to them. And this is allowed? Apparently, everyone is asleep at the wheel.

Meanwhile, the Union Theological Seminary in New York, now has students making confessions to...now sit down...to plants. Plants? Yes, plants! The plants, it seems have more roots than our seminaries. Paganism has come right in and is welcome. In a Christian magazine story about this new take on sacred duties, that is, confessing to plants, has a positive calming effect on these stupid a...er buttocks...knuckleheads. Or so they say.

We must make laws against anyone who sells products with nicotine. That drug has proved deadly with thousands of deaths for using that product that people MUST use once they begin. Nicotine is a highly addictive drug that once tried, hooks the user for life.

I did a feature on the new phenomenon for smokers, called, e-cigarettes and VAPING., the only writer to expose this including the fact those metal cigarettes are indeed filled with Nicotine...got that?..they publicly lied and said Vaping was much safer, giving one the full satisfaction of smoking without the danger of nicotine. They LIED. The moment my story broke, news stories headlined the facts that the people who used the product wound up in the hospital with severe lung problems and SEVERAL have died as a direct result of Vaping. The manufacturers of that product should be jailed forever. This is the part of Capitalism that causes hatred, especially when you have a loved one that has died as a result of using a

product totally misrepresented in order to 'make a buck.'

Final Word Dept: Please be kind to animals. Sign petitions the moment you hear of someone mistreating God's creatures. And join me in contacting your representatives to make it a law that anyone who hurts an animal or is cruel to an animal, is to be charged with a felony, with jail time mandatory. This writer has made several such contacts and has succeeded in getting some laws changed, such as making it a crime to import and export ivory, and to establish animal courts. These are specialized courts that handle all cases of animal abuse. We had three established courts right away and more are being put together.

Let us be kind to all creatures, both two legged and four legged ones. And please take care of yourselves. We need you, and want you.
